Remarkable NCP-CN-6.10 Practice Guide Grants You High-quality Exam Materials - Exam4Tests

As is known to us, the quality is an essential standard for a lot of people consuming movements, and the high quality of the NCP-

CN-6.10 guide questions is always reflected in the efficiency. We are glad to tell you that the NCP-CN-6.10 actual dumps from our company have a high quality and efficiency. If you decide to choose NCP-CN-6.10 Actual Dumps as you first study tool, it will be very possible for you to pass the exam successfully, and then you will get the related certification in a short time.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q117-Q122):

NEW QUESTION # 117
A Platform Engineer works for a service provider and needs to establish access and authentication for multiple clients into an NKP cluster. Each client has their own LDAP source that should be used for authentication into the cluster.
How would this be accomplished?

- A. The LDAP connector configuration would be modified to include an array for each client LDAP source to authenticate with. Users would provide the client name defined in the array as part of their login.
- B. A common LDAP source needs to be established and client specific groups and users need to be configured within this common LDAP provider. Then an LDAP connector would be created for this LDAP provider.
- C. An NKP workspace needs to be created for each client and an LDAP connector would be created for each NKP workspace.
- D. An NKP project would be created for each client and an LDAP connector would be created for each NKP project. Users would provide the project name their company was assigned as part of their login.

Answer: C

NEW QUESTION # 118
A Platform Engineer is preparing to deploy a new NKP cluster on Nutanix infrastructure into an air- gapped environment. As part of the preparation process, the engineer is supplying a Ubuntu
22.04 instance to be used for NKP cluster nodes that conforms to the corporate OS image hardening standards. However, during the NIB preparation process, the error shown in the exhibit is received. What is the likely reason the NIB preparation attempt has failed?

- A. The engineer has supplied the inartifacts directory for the OS package bundle in the NIB-prep command.
- B. The engineer has not created the OS package bundle prior to the NIB-prep attempt.
- C. The engineer has not seeded the local registry with the required NKP images prior to the NIB-prep attempt.
- D. Ubuntu 22.04 is not a supported OS for NKP nodes on Nutanix infrastructure, therefore the necessary OS package bundle does not exist.

Answer: B

NEW QUESTION # 119
A company has enabled auto-scaling within an NKP cluster. What is the behavior for auto- scaling?

- A. CPU is hot-added or hot-removed from a node.
- B. Memory is hot-added or hot-removed from a node.

- C. The Power-On Status/Mode of a node is changed to meet load conditions.
- D. Nodes will be CAPI-created or CAPI-deleted as needed by the cluster.
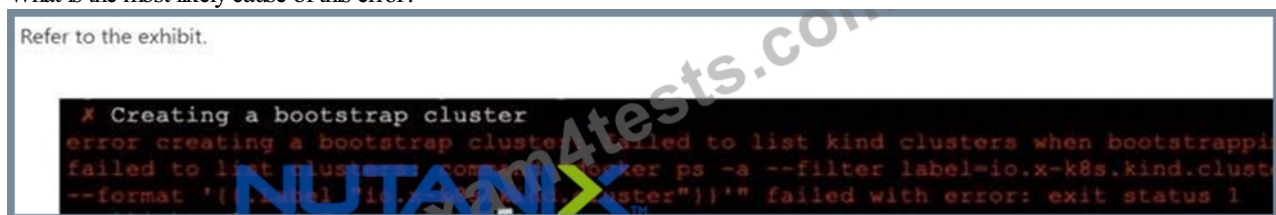

Answer: D

NEW QUESTION # 120

A Cloud Engineer is deploying an NKP cluster into an AWS environment. By default, when deploying NKP on AWS infrastructure, it generates the supporting infrastructure necessary for the cluster (VPC, subnets, ELBs). However, the AWS team has insisted that the NKP cluster be deployed on existing AWS infrastructure. How can the engineer meet this requirement?

- A. Create an NKP infrastructure provider for AWS in the NKP UI. When deploying the NKP cluster through the UI, specify the pre-existing VPC, subnets, and ELB to use in the appropriate fields of the 'Infrastructure' section of the Create Cluster page.
- B. When using the nkp adopt infrastructure aws command set, include the valid parameters with the pre-existing VPC, subnets, and ELB to use. Deploy the NKP cluster using the nkp create cluster aws command set.
- C. Create an overrides file with the pre-existing VPC, subnets, and ELB to use. When using the nkp create cluster aws command set, include the overrides parameter with the overrides file that was created.
- D. When using the nkp create cluster aws command set, include the valid parameters with the pre- existing VPC, subnets, and ELB to use.

Answer: C

NEW QUESTION # 121

A Platform Engineer is trying to create a new NKP cluster and is getting the error shown in the exhibit.
What is the most likely cause of this error?

- A. Informatting in the Ansible playbook
- B. A docker compatible runtime is not running
- C. Inpermissions to the NKP binary
- D. An inHelm chart repo was referenced

Answer: B

NEW QUESTION # 122
