

ATM Exam Collection - ATM Passed

P.S. Free & New ATM dumps are available on Google Drive shared by TrainingDumps: <https://drive.google.com/open?id=1HzLSl8wnIyeGQDHZu3TRCeKbnxqwzua>

The contents of ATM study materials are all compiled by industry experts based on the examination outlines and industry development trends over the years. And our ATM exam guide has its own system and levels of hierarchy, which can make users improve effectively. Our ATM learning dumps can simulate the real test environment. After the exam is over, the system also gives the total score and correct answer rate.

Our ATM Exam Braindumps are the hard-won fruit of our experts with their unswerving efforts in designing products and choosing test questions. Pass rate is what we care for preparing for an examination, which is the final goal of our ATM certification guide. According to the feedback of our users, we have the pass rate of 99%, which is equal to 100% in some sense. The high quality of our products also embodies in its short-time learning. You are only supposed to practice Advanced Test Management Exam v3.0 - ISTQB guide torrent for about 20 to 30 hours before you are fully equipped to take part in the examination.

ATM Passed, Latest ATM Version

Are you concerned for the training material for ATM certification exam? So, your search is ended as you have got to the place where you can catch the finest ATM certification exam dumps. Those entire applicants who put efforts in ATM certification exam want to achieve their goal, but there are diverse means of preparing ATM exams. Everyone might have their own approach to discover, how to associate ATM Certified professional. It really doesn't matter how you concoct for the ATM certification exam, you'd need some provision to make things calmer. Some candidates like to take help of their friends or tutors, while some simply rely on ATM books. However, the easiest way to prepare the certification exam is to go through the study.

ISTQB Advanced Test Management Exam v3.0 - ISTQB Sample Questions (Q10-Q15):

NEW QUESTION # 10

You are the Test Manager of a new project aimed at developing a software system that must be certified at level B of the DO-178B standard. The project will follow a V-Model software development life cycle and it will have four formal levels of testing: component, integration, system and acceptance testing.

You must produce the test plan documentation for this project by providing an adequate coordination across the four levels of testing in order to assure audit ability.

Which of the following answers would you expect to best describe how to organize the test plan?

- A. Produce a master test plan that covers three levels (component, integration, system test) and a separate acceptance test plan
- B. Produce a single master test plan that covers in detail all four levels, describing the particular activities for all test levels
- C. Produce a master test plan describing the relationship between the four levels, and four separate detailed level test plans, one for each level

- D. Produce four separate detailed level test plans, one for each level, without a master test plan

Answer: C

NEW QUESTION # 11

The following chart plots the cumulative number of defects opened against the cumulative number of defects closed during system testing of a software product.

Which of the following statements is true?

- A. The chart indicates that you have plenty of problems left to find
- B. The chart seems to indicate that the defect management process is not working well
- **C. The chart seems to indicate that the defect management process is working well**
- D. The chart can be used to reveal test progress problems

Answer: C

NEW QUESTION # 12

The main objectives the senior management team wants to achieve are:

- to reduce the costs associated with dynamic testing
- to use reviews to ensure that the project is on course for success and following the plan
- to use reviews as a well-documented and effective bug-removal activity following a formal process with well-defined roles
- to determine the effectiveness of reviews in terms of phase containment
- to improve phase containment effectiveness

Which of the following answers would you expect to describe the best way to achieve these objectives?

K4 3 credits

- A. You should plan for lightweight exit-phase reviews at the end of each development and testing phase, and plan for a process of gathering information from testing to perform an analysis aimed at identifying the larger cluster of defects
- **B. You should plan for formal exit-phase reviews at the end of each development and**

testing phase, and plan for a process of gathering information from testing to perform an analysis of the bugs found during testing to determine the phase in which they have been introduced

- C. You should plan for formal exit-phase reviews at the end of each development phase and testing phase, and plan for a process of gathering information from testing to perform an analysis of the bugs found during testing to determine the people responsible for those bugs
- D. You should plan for formal exit-phase reviews at the end of each development and testing phase, and plan for a process of gathering information from testing to perform an analysis aimed at identifying the larger cluster of defects

Answer: B

NEW QUESTION # 13

In the test strategy document your organization declares:

- To adopt a V-model development lifecycle, with three formal levels of testing unit, integration and system testing
 - To use a blended risk-based and regression-averse testing strategy for each level of testing
- The following is an excerpt of the "approach" section for the system test plan document of a new project:

"Testing will only use manual tests. Due to the short period of time for test execution, the following activities will be performed in parallel with test execution: Test planning, test analysis and test design.

Basic metrics will be taken for test effort (i.e. person-hours), test cases executed (passed/failed), and incidents (no more metrics, such as code coverage, will be collected)." In the system test plan, no deviations from the test strategy are described.

Based only on the given information, which of the following statements is true?

- A. The approach described the system test plan document is inconsistent with both the risk-based and regression testing strategies
- B. The approach described in the system test plan document is consistent with the regression testing strategy, but it is inconsistent with the risk-based testing strategy
- C. The approach described in the system test plan document is consistent with the test strategy
- D. The approach described in the system test plan document is consistent with the risk-based testing strategy, but it is inconsistent with the regression testing strategy

Answer: A

NEW QUESTION # 14

What is the purpose of test control?

- A. To take corrective actions required to meet the test objectives
- B. To return the test environment to its starting state and data
- C. To project detect trends and outcomes
- D. To monitor the testing

Answer: A

Explanation:

* Definition:

* Test control involves monitoring and taking actions to align testing with objectives, addressing deviations in test progress or outcomes.

* Evaluation of Options:

* A. To monitor the testing:

* Incorrect. Monitoring is part of the process but does not define the purpose of test control.

* B. To return the test environment to its starting state and data:

* Incorrect. This pertains to test environment setup or cleanup, not test control.

* C. To project detect trends and outcomes:

* Incorrect. Detecting trends is part of monitoring, not control.

- * D. To take corrective actions required to meet the test objectives:
 * Correct. Test control is proactive, focusing on corrective measures to ensure test objectives are met (Syllabus section TM-1.5.3).
