How much ISTQB ATM Exam cost

ISTQB ATM Exam cost is \$395 USD. ISTQB Foundation is the first stage in achieving an ISTQB Certification, it is a requirement to be certified before you can take the exam. Due to the growth of the software testing industry, there has been a significant demand for more testers. Price rises are often based on the laws of supply and demand. National certification boards have created a standard set of guidelines that are used to enforce these laws. Supply is often based on the number of people who are interested in software testing. Offer is often based on the number of companies that are offering software testing jobs. Demand is often based on the number of companies that are actively trying to hire testers.

The ATM Certification is offered by the International Software Testing Qualification Board (ISTQB), a non-profit organization that aims to standardize software testing practices globally. The syllabus for the exam is designed according to industry standards, and the certification is recognized worldwide. Advanced Test Management Exam v3.0 - ISTQB certification is an excellent choice for testing professionals seeking to advance their careers in software testing and enhance their knowledge and skills.

ISTQB Advanced Test Management Exam v3.0 - ISTQB Sample Questions (Q11-Q16):

NEW QUESTION # 11

After the presentation, you are asked to explain the chart.
Assume you have applied a full risk-based testing strategy.

Which of the following answers would you expect to best describe the pie chart?
K4 3 credits

- A. Only the lowest-risk items, tests and bugs should remain in the blue and red areas. Therefore the application can be released at any time subject to management of the items identified in those areas
- B. All the risk items have been covered with tests. No more risk items remain to test
- C. According to the full risk-based testing strategy applied, it is very likely that the highest-risk items, tests and bugs remain in the blue and red areas. Therefore, it is very risky to release the application
- D. 97 percent of the risk items has been tested. No open bugs or test failures remain. Only 3 percent of risk items remains to be covered by the remaining test

Answer: A

NEW QUESTION # 12

You are the Test Manager for a project to develop a client-server application that allows wine vendors to order custom-assorted packages of wines of several winemakers to sell special packages in their wine shops.
You decide to apply a blended risk-based and reactive testing strategy. Below the exit criteria for the system testing.

EXCR1- Each "critical" quality risk item must be covered by at least one test condition EXCR2- Each "critical" requirement must be covered by at least one test condition The following are the "critical" requirements of the application:

REQ-SEL-1. The application shall allow the user to order only one package at a time REQ-SEL-2. The application shall allow the user to select between four different packages (2-bottles, 6-bottles, 12-bottles, 15-bottles)

REQ-SEL-3. The application shall allow the user to order a package containing at least 1 bottle and no more bottles than the package size. No error messages shall be displayed if the user selects a valid number of bottles (at least 1 bottle and no more than the package size) REQ-SEL-4. The application shall display an error message "Invalid number of bottles" if an invalid number of bottles is selected by the user (zero bottles or a number higher than the package size) REQ-PAY-1. The application shall allow the user to pay with the three accepted credit cards (Visa, MasterCard, American Express) REQ-PAY-2. The application shall display an error message "Invalid credit card" if invalid credit card data are given by the user The following is the unique "critical" quality risk item that has been identified:

CR-RSK-1. The GUI of the application might accept non-integer values for the input field designed to get the number of bottles from the user Test analysis for system testing has just begun and the following test conditions have been identified.

TC-SEL-2. Test the selection of the package sizes

TC-SEL-4. Test wrong numbers of bottles for an order

TC-CR-RSK-1. Test the accepted values from the input field designed to get the number of bottles from the user What is the MINIMUM number of test conditions that must be added to fulfill both the EXCR1 and EXCR2 exit criteria?

- A. 0
- B. 1
- C. 2
- D. 3

NEW QUESTION # 13

Which of the following is required to apply an experience-based testing approach"

- A. Tester knowledge of the system and its usage
- B. Detailed requirements
- C. Usage models
- D. A full risk-assessment to support risk prioritization

Answer: A

Explanation:

* Experience-Based Testing:

* This testing approach relies on the testers' knowledge, experience, and intuition about the system and its usage rather than formal requirements or models.

* It is often used when documentation is incomplete or time constraints limit more structured approaches.

* Evaluation of Options:

* A(Detailed requirements) and B(Usage models) are associated with structured testing techniques.

* C is correct as experience-based testing depends on the testers' understanding of the system.

* D(Full risk assessment) supports risk-based testing, not experience-based testing.

References and Syllabus Alignment:

* Experience-based testing is detailed under "Test Techniques" (TM-1.4.1) in the ISTQB syllabus.

NEW QUESTION # 14

You are the Test Manager of a new project aimed at developing a software system that must be certified at level B of the DO-178B standard. The project will follow a V-Model software development life cycle and it will have four formal levels of testing: component, integration, system and acceptance testing.

You must produce the test plan documentation for this project by providing an adequate coordination across the four levels of testing in order to assure audit ability.

Which of the following answers would you expect to best describe how to organize the test plan?

K3 2 credits

- A. Produce a single master test plan that covers in detail all four levels, describing the particular activities for all test levels
- B. Produce a master test plan that covers three levels (component, integration, system test) and a separate acceptance test plan
- C. Produce four separate detailed level test plans, one for each level, without a master test plan
- **D. Produce a master test plan describing the relationship between the four levels, and four separate detailed level test plans, one for each level**

Answer: D

NEW QUESTION # 15

Which of the following answers describes a factor that may reduce the effort spent when using distributed test teams without negatively affecting system quality?

K2 1 credit

- A. Difficulties in communication between the distributed test teams due to time zone differences
- B. With several distributed test teams, every team assumes that some test conditions are covered by other teams but actually no one covers them
- **C. With several distributed test teams, all of the distributed test teams use a single unified test dashboard**
- D. With several distributed test teams, two or more teams assume some test conditions are covered by their team and their team alone. But all of the teams actually cover them

Answer: C
