## ATMA PREPARATION TIPS

**1** GET FAMILIAR  
WITH ATMA  
EXAM PATTERN  
AND SYLLABUS

**2** FOCUS ON  
CONCEPTUAL  
CLARITY

**3** CREATE A  
STRATEGIC  
STUDY  
SCHEDULE

**4** SOLVE MOCK  
TESTS AND  
SAMPLE  
QUESTION  
PAPERS

**5** REVISE FROM  
NOTES AND  
STUDY  
MATERIALS

BONUS!!! Download part of LatestCram ATM dumps for free: <https://drive.google.com/open?id=1oInQifbxZgSyqK0DN8CVPs0G4X3aMXvx>

First and foremost, you can get the latest version of our ATM study materials for free during the whole year. Second, our responsible after sale service staffs are available in twenty four hours a day, seven days a week, so if you have any problem after purchasing ATM study materials, you can contact our after sale service staffs on our ATM Study Guide at any time. Last but not least, we have installed the most advanced operation machines in our website, so the most effective and the latest ATM study materials is right here waiting for you.

We can promise that you would like to welcome this opportunity to kill two birds with one stone. If you choose our ATM Test Questions as your study tool, you will be glad to study for your exam and develop self-discipline, our ATM latest question adopt diversified teaching methods, and we can sure that you will have passion to learn by our products. We believe that our products will help you successfully pass your exam and hope you will like our product.

## ATM Valid Practice Questions | Reliable ISTQB New ATM Exam Price: Advanced Test Management Exam v3.0 - ISTQB

The clients can download our products and use our ATM study materials immediately after they pay successfully. Our system will send our ATM learning prep in the form of mails to the client in 5-10 minutes after their successful payment. The mails provide the links and if only the clients click on the links they can log in our software immediately to learn our ATM Guide materials. As long as the clients buy our ATM training quiz they can immediately use our product and save their time.

## ISTQB Advanced Test Management Exam v3.0 - ISTQB Sample Questions (Q44-Q49):

### NEW QUESTION # 44

You are a new test manager in an organization. You have been asked to assess the defect process to determine if there are any efficiency improvements that could be made that would reduce the cost of quality. You have started digging through the defect information. What information would be most helpful for this investigation?

- A. Areas of the software producing the most defects
- B. Defect priorities and severities as related to time from reporting to closure
- C. Risk areas in which defects have been detected and the
- **D. relationship between the risk rating of the software and the severity of the defect**
- E. The phase in which a defect was introduced versus the phase in which it was found

**Answer: D**

Explanation:

\* Key Data for Defect Process Improvement:

\* Analyzing when defects are introduced versus when they are detected is critical to identifying process inefficiencies.

\* This information helps pinpoint gaps in earlier phases, allowing the team to implement preventive measures and reduce overall costs.

\* Evaluation of Options:

\* A and B are useful but do not address the root cause of inefficiencies.

\* C (Risk areas and severity relationship) is helpful but secondary to understanding phase discrepancies.

\* D is correct as it provides the most actionable insights for process improvement.

References and Syllabus Alignment:

\* Defect lifecycle analysis is discussed under "Defect Management" (TM-2.3.1) in the ISTQB syllabus.

### NEW QUESTION # 45

Assume you are working on a CAS (Conditional Access System) for Pay-TV that allows the access, selection and transfer of services and media to authorized users. Authorized users can choose their services through different channels: Web Customer Portal, IVR (Interactive Voice Response), Call Centre and SMS. The system uses a Smart Card to receive and decrypt the broadcasted encrypted control words which allow decrypting pay-per-view TV. Every authorized user must have a Smart Card and a Set-Top Box to view the contents.

The following is an excerpt from the product risk analysis document:

Both likelihood and impact have been rated on the following scale: (1 - Very low, 2 - Low, 3 - Medium, 4 - High, 5 - Very High). The required test environment and code have been delivered. All test cases for each identified product risk item have been written and are ready to be executed. The Database used to contain the Smart Cards is empty and so only new Smart Cards can be used during test execution.

A Smart Card can only be activated if it has been previously pre-activated. This means the post-conditions for the execution of the test cases to test the pre-activation of the Smart Card are the pre-conditions for activation of the Smart Card.

Which of the following statements represents the most effective contribution of the stakeholders to the completion of the failure mode analysis table?

Potential Failure Mode(s) - Quality Risk(s)	Priority	Severity	Detection	Detection Method(s)
Fails to connect to the PCMCIA card		3		Test; Debug
Fails to transfer the maps from the PCMCIA card		3		Test; Debug
Fails to load the transferred map		3		Test; Debug
Fails to switch from one map to another		2		Test; Debug

- A. The aircraft pilot and the customer representative should contribute to assess the priority. The chief software engineer, the system architect and the expert tester should contribute to assess the detection.
- B. The system architect and the chief software engineer should contribute to assess the priority. The expert tester is the only one who should contribute to assess the detection.
- C. The aircraft pilot and the customer representative should contribute to assess the detection. The chief software engineer, the system architect and the expert tester should contribute to assess the priority.
- D. The aircraft pilot is the only one qualified to contribute to assess the priority and thus should be assigned this task. The customer representative should contribute to assess the detection.

**Answer: A**

Explanation:

Section: Testing Process

Explanation/Reference:

#### NEW QUESTION # 46

Consider an information system of a Pay-Tv company based on a SOA architecture.

The integrated system currently consists of three core systems:

- a CRM (Customer Relationship Management) system
- a BRM (Billing and Revenue Management) system
- a CAS (Conditional Access System) system all of them communicating with SOA Middleware.

You have been asked to manage the testing activities for the integration of two additional off-the-shelf systems from two different vendors: a SMS (Short Message Service) server and an IVR (Interactive Voice Response) system.

Assume that there is a high likelihood that the two off-the-shelf systems will be low-quality and that you have a clear proof that the testing performed by the two vendors on their systems has been unsystematic and unprofessional. This obviously leads to higher quality risk for the overall integrated system.

You are the Test Manager of this project. Your main goal is to plan for testing activities to mitigate this risk.

Which of the following answers best describes the test activities (assuming it is possible to perform all of them) you should plan for?

K4 3 credits

- A. You should plan for an informal and minimal acceptance test of the two off-the-shelf systems and then a single end-to-end test of the overall integrated system

- B. You should plan for adequate re-testing of both the systems followed by a system integration test and an end-to-end test of the overall integrated system
- C. You should plan for two levels: a system integration test and an end-to-end test of the overall integrated system
- D. You should directly plan for a single end-to-end test focused on end-to-end tests of the overall integrated system without an acceptance test of the two off-the-shelf systems

**Answer: B**

#### NEW QUESTION # 47

Which of the following statements, about the test reporting activities for a project adopting an iterative lifecycle model with very short iterations (e.g. two weeks iterations), is correct?

K2 1 credit

- A. Test reporting activities are still important with an iterative lifecycle. The reports can be used to conduct post-iteration review sessions before starting with the next iteration
- B. Test reporting activities can't be influenced by the use of an iterative lifecycle model with short iterations
- C. Test reporting activities are not important for projects adopting an iterative lifecycle model with short iterations
- D. Test reporting activities are less important for projects adopting an iterative life cycle model with short iterations. They should be performed at the end of the last iteration

**Answer: A**

#### NEW QUESTION # 48

You are managing the test team that is testing a new mobile application that provides a 'step-by-step' hiking guide Your risk assessment resulted in the following table:

Risk Level	Test Object	Mitigation
Very high	Accuracy of GPS data	Test for accuracy within 3 feet
High	Usability	Perform usability analysis
Medium	Trail finder	Test for access to information on all supported trails
Low	Feedback page	Test for access to feedback page and capture of data

Your team has done the depth and breadth testing for the GPS accuracy and usability features but when the product was given to beta testers there were some issues Despite the users reporting the app was easy to use at least one user walked off the edge of a cliff and another one ended up in a river. Your team has confirmed that the functionality is working correctly, and the GPS information is accurate.

What other area of testing should you now prioritize?

- A. Security
- B. Functionality
- C. Usability
- D. Performance

**Answer: C**

Explanation:

\* Analysis of the Situation:

\* The GPS accuracy and functionality have been confirmed to work correctly as per depth and breadth testing.

\* Despite this, users experienced severe issues such as walking off a cliff or into a river. These incidents point to usability problems related to user interpretation of the GPS data and system feedback.

\* Testing Prioritization:

\* Usability testing evaluates how effectively and safely users interact with the application. Here, it should focus on improving user guidance, error prevention, and alerts.

\* Functionality and Performance are not the problem since they passed testing.

\* Security is unrelated to the specific reported issues.

References and Syllabus Alignment:

\* This aligns with usability-focused risk mitigation strategies in the ISTQB Advanced Test Management syllabus under "Test Process" and "Test Techniques" (TM-1.3.4).

## NEW QUESTION # 49

.....

There are many merits of our product on many aspects and we can guarantee the quality of our Advanced Test Management Exam v3.0 - ISTQB ATM practice engine. Firstly, our experienced expert team compile them elaborately based on the real exam. Secondly, both the language and the content of our ISTQB ATM Study Materials are simple.

**New ATM Exam Price:** <https://www.latestcram.com/ATM-exam-cram-questions.html>

How long are your ATM test dumps valid, ISTQB ATM Valid Practice Questions Download and copy the Mp3 Files on any MP3 Device and study anywhere, Then you can use the ATM practice material freely, ISTQB ATM Valid Practice Questions We are here to offer help, ISTQB ATM Valid Practice Questions The three versions are: PDF version, SOFT version and APP version, With the help of our ATM study guide, you can adjust yourself to the exam speed and stay alert according to the time-keeper that we set on our ATM training materials.

Later in this chapter, we cover how to optimize ATM Valid Practice Questions the architecture of your database to maximize its storage performance and parallelism. We'll be looking at how to access the weather ATM Valid Dumps Demo information provided by the OpenWeatherMap web service through an Android application.

## Highly-demanded ATM Exam Braindumps demonstrate excellent Learning Questions - LatestCram

How long are your ATM Test Dumps valid, Download and copy the Mp3 Files on any MP3 Device and study anywhere, Then you can use the ATM practice material freely.

We are here to offer help, The three ATM versions are: PDF version, SOFT version and APP version.
