CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q292-Q297):

NEW QUESTION # 292

In order to get info about assignment (FW, SND) of all CPUs in your SGW, what is the most accurate CLI command?

- A. fw ctl sdstat
- B. fw ctl multik stat
- C. cpinfo
- D. fw ctl affinity -l -a -r -v

Answer: D

Explanation:

The fw ctl affinity -l -a -r -v command is the most accurate CLI command to get info about assignment (FW, SND) of all CPUs in your SGW. This command displays the affinity settings of all interfaces and processes in a verbose mode, including the Firewall (FW) and Secure Network Distributor (SND) instances. NEW QUESTION # 293

Which of the following authentication methods ARE NOT used for Mobile Access?

- A. TACACS+
- B. Username and password (internal, LDAP)
- C. RADIUS server
- D. SecurID

Answer: A

NEW QUESTION # 294

On the following picture an administrator configures Identity Awareness:

After clicking "Next" the above configuration is supported by:

- A. The ports 443 or 80 what will be used by Browser-Based and configured Authentication.
- B. Obligatory usage of Captive Portal.
- C. Kerberos SSO which will be working for Active Directory integration
- D. Based on Active Directory integration which allows the Security Gateway to correlate Active Directory users and machines to IP addresses in a method that is completely transparent to the user.

Answer: D

Explanation:

Explanation

After clicking "Next", the above configuration is supported by Active Directory integration which allows the Security Gateway to correlate Active Directory users and machines to IP addresses in a method that is completely transparent to the user. This is a feature of Identity Awareness that allows the Security Gateway to identify users and machines on the network and enforce security policies based on their identity. The administrator can configure Identity Awareness to use various methods for acquiring identity, including Active Directory integration, browser-based authentication, terminal servers, and transparent authentication1.

NEW QUESTION # 296

Which Mobile Access Application allows a secure container on Mobile devices to give users access to internal website, file share

and emails?

- A. Check Point Capsule Remote
- B. Check Point Capsule Workspace
- C. Check Point Remote User
- **D. Check Point Mobile Web Portal**

Answer: D

Explanation:

Explanation

Check Point Mobile Web Portal is a Mobile Access Application that allows a secure container on mobile devices to give users access to internal websites, file shares and emails. The Mobile Web Portal is a web-based application that can be accessed from any browser on any device. It provides a user-friendly interface to access various resources on the corporate network without requiring a VPN client or additional software installation.

The Mobile Web Portal supports authentication methods such as user name and password, certificate, one-time password (OTP), etc. The Mobile Web Portal also supports security features such as encryption, data leakage prevention (DLP), threat prevention, etc. References: R81 Mobile Access Administration Guide
