- A. Connect disparate data sources to provide a virtual view of your data.
- B. Uses a dialog format to talk with your data to get insights.
- C. Produces a AI based dashboard to let users analyze business data.
- D. Produces statistics and graphs to let users analyze and explore master data.

Answer: D

It produces master data views along with statistics, graphs, and insights that allow users to explore, analyze, and understand their master data entities (e.g., customers, products). A Cloud Pak for Data installation was initially deployed on Microsoft Azure via the automated deployment option. What can be used to upgrade the environment?

- A. Cloud Providers Marketplace

- C. Command Line Interface (CLI)
- D. PowerShell

Answer: C

Explanation:

For environments deployed via automated cloud options (such as Azure or AWS), upgrades are performed using the Command Line Interface (CLI). The CLI allows administrators to pull the latest operators, update foundational services, and upgrade installed
