Reliable JN0-481 Exam Pattern - JN0-481 Exam Quiz

By taking our Juniper JN0-481 practice exam, which is customizable, you can find and strengthen your weak areas. Additionally, we provide a specialized 24/7 customer support team to assist you with any problems you may run into while using our Data Center, Specialist (JNCIS-DC) exam questions. Our Juniper JN0-481 desktop-based practice exam software's ability to be used without an active internet connection is another incredible feature.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q59-Q64):

NEW QUESTION # 59

You have recently committed a change after creating a new blueprint in Juniper Apstra. In the main dashboard, you see a number of anomalies related to BGR. What is a likely cause of these anomalies?

- A. You have misconfigured ASNs.
- **B. The fabric has not converged yet.**
- C. Spine-leaf links are incorrectly set.
- D. A generic system has not been configured.

Answer: B

Explanation:

In Juniper Apstra, a blueprint is a logical representation of the network design and configuration.

When you create a new blueprint, you need to commit the changes to apply them to the network devices. However, committing the changes does not mean that the network is immediately updated and operational. It may take some time for the network to converge and reflect the new state of the blueprint. During this time, you may see some anomalies related to BGP in the main dashboard, which indicate that the BGP sessions are not established or stable between the devices. These anomalies are usually temporary and will disappear once the network converges and the BGP sessions are up and running.

NEW QUESTION # 60

Which statement is correct about the Juniper Apstra Rendered configuration?

- A. It is rendered from the graph database and stored locally.
- **B. It is dynamically tendered at commit time.**
- C. It is stored in a NoSQL database and incrementally updated.
- D. It is built at commit time and stored in a MySQL database.

Answer: B

Explanation:

The Juniper Apstra Rendered configuration is the configuration that is generated from the staged blueprint and applied to the devices in the network. The Rendered configuration is dynamically rendered at commit time, which means that it is created on the fly based on the latest changes and validations in the blueprint. The Rendered configuration is not stored in any database, but it can be viewed in the Apstra UI or downloaded as a file. The Rendered configuration reflects the desired state of the network as defined by the intent of the blueprint.

NEW QUESTION # 61

In the Apstra design phase, what is the role of DC Reference Design?

- A. It determines the placement of security cameras in the data center
- B. It refers to the design of data center furniture layout
- C. It specifies the color scheme for network cables
- **D. It provides a blueprint for the overall data center architecture and configuration**

Answer: D

NEW QUESTION # 62

When working with logical devices, you specify where each port group is connected. In this scenario, which two Juniper Apstra UI options are available to the operator? {Choose two.}

- **A. unused**
- **B. generic**
- C. firewall
- D. router

Answer: A,B

Explanation:

When working with logical devices, you specify where each port group is connected by selecting the port group layout and the port speed and role (s) for each port group. The Juniper Apstra UI offers two options to the operator for the port group role: unused and generic.

Unused: This option means that the port group is not configured or used by Apstra. This can be useful for ports that are faulty, reserved, or not part of the data center fabric.

Generic: This option means that the port group is configured with a generic role that is not specific to any device type or function. This can be useful for ports that are used for testing, troubleshooting, or custom purposes.

NEW QUESTION # 63

You are creating a new template that will connect two rack based templates together. Which rack type should be used to accomplish this task?

- A. isolated
- B. collapsed
- C. pod based
- D. rack based

Answer: C

NEW QUESTION # 64

.....

The DumpsTests guarantees their customers that if they have prepared with Juniper JN0-481 practice test, they can pass the Juniper JN0-481 certification easily. If the applicants fail to do it, they can claim their payment back according to the terms and conditions. Many candidates have prepared from the actual Juniper JN0-481 Practice Questions and rated them as the best to study for the examination and pass it in a single try with the best score.
