## Microsoft Power Automate RPA Developer Sample Questions (Q167-Q172):

### NEW QUESTION # 167

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a cloud flow that will use two Update Row actions to interact with Microsoft Dataverse.

Neither of these actions are dependent on each other.

You must minimize the amount of processing time require to complete the flow.

You need to implement the actions in the cloud flow.

Solution: Create a parallel branch for the two Update Row actions.

Does the solution meet the goal?

- A. No
- B. Yes

**Answer: B**

### NEW QUESTION # 168

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A procurement department is using email to collect large volumes of quotes from vendors.

Data from quotes, including vendor data and quote terms, must be stored in Microsoft Dataverse.

You need to create a solution to automate the process.

Solution: Extract custom information from documents AI Builder model

Does the solution meet the goal?

- A. No
- B. Yes

**Answer: B**

### NEW QUESTION # 169

You manage automation solutions for a company.

You need to select the appropriate patch type for each scenario.

Which patch types should you use? To answer, drag the appropriate patch types to the correct requirements.

Each patch type may be used once, more than once, or not at all. You may need to drag the bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

Graphical user interface, text, application Description automatically generated

### NEW QUESTION # 170

You are editing a cloud flow in the Power Automate flow designer.

You need to resubmit the most recent trigger.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows the Power Automate interface. On the left, under the 'Actions' tab, there is a list of actions: 'Select Manually.', 'Select Save and Test.', 'Select Test.', 'Select With a recently used trigger.', 'Select the run you want to resubmit.', 'Select Automatically.', and 'Select Resubmit.'. On the right, there is an 'Answer area' which is currently empty. Navigation arrows are visible between the two panels.

**Answer:**

**Explanation:**

The screenshot shows the same Power Automate interface as before, but now the 'Answer area' on the right contains five actions in a specific sequence, enclosed in a dashed red box. The actions are: 'Select the run you want to resubmit.', 'Select Test.', 'Select Automatically.', 'Select With a recently used trigger.', and 'Select Save and Test.'. The 'Actions' list on the left remains the same.

**Explanation**

A detailed view of the 'Answer Area' from the previous screenshot. It shows a vertical list of five actions: 'Select the run you want to resubmit.', 'Select Test.', 'Select Automatically.', 'Select With a recently used trigger.', and 'Select Save and Test.'. The actions are arranged in the correct sequence for resubmitting the most recent trigger.

### NEW QUESTION # 171

You are developing a flow that interacts with a Microsoft Dataverse table named Account. The table includes the following columns:

| Name            | Data type | Description                                                                                       |
|-----------------|-----------|---------------------------------------------------------------------------------------------------|
| websiteurl      | URL       |                                                                                                   |
| crabtriggerflow | Choice    | Option 1 text: Yes<br>Option 1 value: 126690000<br>Option 2 text: No<br>Option 2 value: 126690001 |

The flow must only trigger when a record is added to the Accounts table and the following conditions are met:

\* the websiteurl field is set to https://microsoft.com
