The unique, trustworthy, and error-free material will turn your preparation for the SAP C-S4EWM-2023 certification exam productive, organized, and helpful.

SAP C-S4EWM-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	Warehouse Processing, Warehouse Task and Order Creation, Strategies: This topic includes defining warehouse process types and setting up determination, as well as defining putaway and picking strategies.
Topic 2	Warehouse Management (Monitor - Cockpit): This topic involves monitoring warehouse activities using the Warehouse Management Monitor, Warehouse Cockpit, and analytical apps.

Topic 3	• Cross Topics (Labor Management, Exception Handling, Batches, Serial Numbers): This topic includes setting up labor management and exception handling, and working with additional product information.
Topic 4	• Internal processing (Physical Inventory, Replenishment): This topic involves defining physical inventory processes and setting up and executing replenishment.
Topic 5	• System Integration, Master Data and Delivery Document Customizing: This focuses on setting up system integration, distributing master data, and customizing delivery documents.
Topic 6	• Shipping and Receiving: It focuses on configuring Yard Management, SAP Dock Appointment Scheduling, and using the Shipping Cockpit.
Topic 7	• Inbound Processes (Value Added Services, Cross-docking, Quality Management): This topic includes executing inbound processes with value added services (VAS) or deconsolidation, and setting up deliveries for cross-docking (CD) or quality inspection (QIE).
Topic 8	• Process and Layout Oriented Storage Control: It covers creating customizing settings and using Process and Layout-Oriented Storage Control.
Topic 9	• Managing Clean Core: It covers evaluating and applying clean core principles to ERP to maximize business process agility, reduce adaptation efforts, and accelerate innovation.
Topic 10	• Warehouse Structure, Resource Management and SAP EWM Master Data: This topic encompasses defining the warehouse structure and setting up resource management, along with creating SAP EWM master data like storage bins and products, packaging specifications, supply chain units, and business partners.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q25-Q30):

NEW QUESTION # 25

What can you do with a hotspot in the warehouse management monitor?

- A. Change from the list view to the form view of the selected object.
- **B. Call a method to perform actions on the selected object.**
- C. Create a basic measurement service.
- D. Call the corresponding user interface on the selected object.

Answer: B

Explanation:

A hotspot in the SAP Warehouse Management Monitor allows you to:

* B. Call a Method to Perform Actions on the Selected Object:

* Hotspots enable execution of predefined methods, such as triggering actions or navigating to specific functions related to the object in focus.

Incorrect Options:

* A: Calling user interfaces is not the purpose of hotspots.

* C: Changing from list view to form view is unrelated to hotspot functionality.

* D: Creating basic measurement services is outside the scope of hotspots.

* SAP Help Portal: Warehouse Management Monitor Features

* SAP EWM Documentation: Hotspots and Methods in the Monitor

NEW QUESTION # 26

Which parameter indicates the type of goods movement when you define a new warehouse process type?

- A. Process type determination indicator

- B. Warehouse process category
- C. Warehouse order creation rule
- D. Storage process

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The warehouse process type in SAP EWM defines the type of goods movement (e.g., putaway, picking). Option B ("Warehouse process category") is correct because it categorizes the movement (e.g., "1" for putaway, "2" for picking), set in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Warehouse Task > Define Warehouse Process Type. Option A (WOCR) groups tasks, option C (determination indicator) aids in assignment, and option D (storage process) is a specific process step, none of which directly indicate the movement type.

NEW QUESTION # 27

Which of the following actions are possible based on a value-added service (VAS) order? Note: There are 3 correct answers to this question.

- A. Capture costs.
- B. Perform quality inspection
- C. Capture time required.
- D. Consume auxiliary products.
- E. Assemble a kit.

Answer: C,D,E

Explanation:

A Value-Added Service (VAS) order in SAP Extended Warehouse Management (EWM) enables enhanced activities for goods that go beyond the standard warehouse operations. Here's how the selected actions are supported:

* Capture Time Required (A):

* VAS orders allow for tracking the time spent on specific value-added services.

* The time can be recorded and used for subsequent costing or reporting purposes.

* This is configured in the VAS activity details in EWM.

* Assemble a Kit (C):

* VAS orders facilitate kitting processes, where individual products are combined into a kit as part of warehouse operations.

* The system supports creating and managing kits via predefined VAS templates and work instructions.

* Consume Auxiliary Products (D):

* Auxiliary products, such as packaging materials or additional items used during the value-added service, can be consumed and accounted for through the VAS order process.

* This consumption is defined in the VAS template, which specifies materials and quantities.

References:

* SAP S/4HANA Cloud Private Edition Documentation for EWM: Value-Added Services Setup

* SAP Help Portal: Configuration and Execution of VAS Orders

NEW QUESTION # 28

For quality inspections in decentralized SAP EWM with QM integration, you need a quality inspection rule and the inspection setup in the material master. How can you simplify the master data creation?

- A. Create the quality inspection rule and distribute it to create the inspection setup in the material master.
- B. Use the inspection type 01.
- C. Use the inspection object type 07.
- D. Create the inspection setup in the material master and distribute it to create the quality inspection rule.

Answer: D

NEW QUESTION # 29

Which stocks can be displayed in the SAP Extended Warehouse Management warehouse management monitor? Note: There are 2

correct answers to this question.

- A. Stock at third party
- B. Stock in transit
- **C. Stock in transportation units**
- **D. Stock on resources**

Answer: C,D

Explanation:

Warehouse Management Monitor Stock Display

* The SAP EWM Warehouse Management Monitor provides visibility into various stock types:

* Stock on Resources (A): Includes stocks physically located on a resource such as forklifts or carts.

* Stock in Transportation Units (C): Refers to stock contained within transportation units like trailers or containers.

Excluded Options

* Stock at Third Party (B): Not directly managed or displayed in EWM's warehouse monitor.

* Stock in Transit (D): Managed in SAP ERP and not typically displayed in the EWM warehouse monitor.

SAP S/4HANA Cloud Private Edition Reference

* Refer to Warehouse Management Monitor Overview in SAP EWM Help documentation for more details.

NEW QUESTION # 30
