Reliable PL-400 Exam Labs - Exams PL-400 Torrent

The most advantage of our PL-400 exam torrent is to help you save time. It is known to us that time is very important for you. As the saying goes, an inch of time is an inch of gold; time is money. If time be of all things the most precious, wasting of time must be the greatest prodigality. We believe that you will not want to waste your time, and you must want to pass your PL-400 Exam in a short time, so it is necessary for you to choose our PL-400 prep torrent as your study tool. If you use our products, you will just need to spend 20-30 hours to take your exam.

The PL-400 certification exam is ideal for developers who have experience with programming languages such as JavaScript, C#, or TypeScript and want to expand their skills to develop business solutions using the Power Platform. Developers who have experience with Power Apps, Power Automate, and Power BI will find this certification exam to be a great way to validate their skills and knowledge.

Microsoft PL-400 exam is intended for developers who have experience in building solutions using the Power Platform. You should have a good understanding of the Power Platform and its various components, as well as experience in designing and implementing solutions using these components. PL-400 Exam is suitable for developers who work with customers or organizations that use Microsoft Dynamics 365, Microsoft Power Apps, or Microsoft Power Automate.

Microsoft Power Platform Developer Sample Questions (Q140-Q145):

NEW QUESTION # 140

A Power Platform solution includes the following Web API call:

GET [http://contoso.crm.dynamics.com/api/data/v9.1/RelationshipDefinitions?\\$select=SchemaName](http://contoso.crm.dynamics.com/api/data/v9.1/RelationshipDefinitions?$select=SchemaName) You need to explain what this line of code is doing.

What does the code do?

- A. Retrieve a list of one-to-many relationships with other tables.
- B. Retrieve a list of tables that are related to each other.
- C. Retrieve a list of many-to-many relationships with other tables.
- D. Retrieve the list of relationships between tables.
- E. Retrieve a list of tables that have more than one relationship.

Answer: E

Explanation:

<https://docs.microsoft.com/en-us/power-apps/developer/data-platform/webapi/query-metadata-web-api>

NEW QUESTION # 141

An organization has a Dynamics 365 Sales environment. In the development environment, you create a business rule named BusinessRule1 on the Account entity. You deploy BusinessRule1 to production as part of a managed solution.

You need to remove BusinessRule1 from the production environment.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
In the development environment, navigate to Solutions.	
Create a new managed solution in the production environment.	
Export the solution as managed and import it in the production environment.	
In the production environment, add a new business rule.	
Select the solution that has BusinessRule1 and deactivate the rule.	
Select the solution that has BusinessRule1, navigate to the appropriate entity, and delete the rule.	

Microsoft

Answer:

Explanation:

Actions	Answer Area
In the development environment, navigate to Solutions.	In the development environment, navigate to Solutions.
Create a new managed solution in the production environment.	Export the solution as managed and import it in the production environment.
Export the solution as managed and import it in the production environment.	Select the solution that has BusinessRule1, navigate to the appropriate entity, and delete the rule.
In the production environment, add a new business rule.	
Select the solution that has BusinessRule1 and deactivate the rule.	
Select the solution that has BusinessRule1, navigate to the appropriate entity, and delete the rule.	

Microsoft

Explanation

In the development environment, navigate to Solutions.

Export the solution as managed and import it in the production environment.

Select the solution that has BusinessRule1, navigate to the appropriate entity, and delete the rule.

Step 1: In the development environment, navigate to Solutions.

The only supported way of transferring customizations from one CRM organization to another has been through Solutions.

With Solution Management came the concept of Managed and Unmanaged Solutions.

Step 2: Export the solution as managed and import it in the production environment.

Managed is a way to protect your IP (Intellectual Property) with an easy concept of install and uninstall.

Step 3: Select the solution that has BusinessRule1, navigate to the appropriate entity, and delete the rule.

NEW QUESTION # 142

You need to assign the minimum environment security role to the appropriate users.

Which security roles should you use? To answer, drag the appropriate security roles to the correct users. Each security role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Security roles	User	Security role
System Administrator	UserA	Security role
System Customizer	UserB	Security role
Common Data Service User	UserC	Security role
Environment Maker	All employees	Security role

Answer:

Explanation:

Security roles	User	Security role
System Administrator	UserA	Common Data Service User
System Customizer	UserB	Environment Maker
Common Data Service User	UserC	System Administrator
Environment Maker	All employees	System Customizer

NEW QUESTION # 143

Five high schools test a custom app from AppSource. They provide feedback that the Course credit entity should include additional fields that cover information shared by the schools.

You do not have access to each high school organization.

Each high school administrator must be able to apply the updates to the Course credit entity.

You need to deliver a custom program that creates the additional fields.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Retrieve the Course credit entity metadata by using RetrieveEntityRequest with LogicalName.
- Retrieve the Course credit entity metadata by using RetrieveEntityRequest with MetadataId.
- Define the AttributeMetadata for each new field.
- Call the CreateAttributeRequest constructor for each new field.
- Call the RetrieveAttributeRequest with LogicalName for each new field.
- Call the login logic.
- Retrieve the Course credit entity metadata by using RetrieveEntityRequest with EntityFilters = Attributes and LogicalName.

Answer Area

Answer:

Explanation:

The screenshot shows the exam interface with the 'Actions' list on the left and the 'Answer Area' on the right. The 'Answer Area' contains four actions in a specific sequence, indicated by dashed red boxes and arrows. The actions are:

- Call the login logic.
- Retrieve the Course credit entity metadata by using RetrieveEntityRequest with EntityFilters = Attributes and LogicalName.
- Define the AttributeMetadata for each new field.
- Call the RetrieveAttributeRequest with LogicalName for each new field.

The 'Actions' list on the left contains the same seven actions as in the first image. The 'Answer Area' also has up and down arrow icons for reordering.

Explanation

Call the login logic.

Retrieve the Course credit entity metadata by using RetrieveEntityRequest with EntityFilters = Attributes and LogicalName.

Define the AttributeMetadata for each new field.

Call the RetrieveAttributeRequest with LogicalName for each new field.

Step 1: Call the login logic.

Step 2: Retrieve the Course credit entity metadata by using RetrieveEntityRequest with EntityFilters = Attributes and LogicalName. The RetrieveEntityRequest.EntityFilters property gets or sets a filter to control how much data for the entity is retrieved.

Step 3: Define the AttributeMetadata for each new field.

Step 4: Call the RetrieveAttributeRequest with LogicalName for each new field.

The RetrieveAttributeRequest contains the data that is needed to retrieve attribute metadata.

<https://docs.microsoft.com/en-us/dotnet/api/microsoft.xrm.sdk.messages.retrieveentityrequest.entityfilters?view=>

NEW QUESTION # 144

You need to complete a Power Apps component framework (PCF) control.

How should you define the order in the manifest? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

<resources>

<code path="scripts/HelloWorldControlWave.js" order="1" />

<code path="scripts/HelloWorldControlRandom.js" order="2" />

<css path="style/HelloWorldControl.css" order="

1

2

3

" />

<html path="HelloWorldControlWaveRandom.htm" order="

1

2

3

" />

</resources>

Answer:

Explanation:

```

<resources>
<code path="scripts/HelloWorldControlWave.js" order="1" />
<code path="scripts/HelloWorldControlRandom.js" order="2" />
<css path="style/HelloWorldControl.css" order="
" />

<html path="HelloWorldControlWaveRandom.htm" order="
" />
</resources>

```
