

Authorized Databricks-Certified-Data-Analyst-Associate Test Dumps - Valid Test Databricks-Certified-Data- Analyst-Associate Fee

2025 Latest Test4Engine Databricks-Certified-Data-Analyst-Associate PDF Dumps and Databricks-Certified-Data-Analyst-Associate Exam Engine Free Share: https://drive.google.com/open?id=1H-jVft5_UWgshC_aIPRiNbs8PP-bLxs3

Test4Engine senior experts have developed exercises and answers about Databricks certification Databricks-Certified-Data-Analyst-Associate exam with their knowledge and experience, which have 95% similarity with the real exam. I believe that you will be very confident of our products. If you choose to use Test4Engine's products, Test4Engine can help you 100% pass your first time to attend Databricks Certification Databricks-Certified-Data-Analyst-Associate Exam. If you fail the exam, we will give a full refund to you.

Databricks Databricks-Certified-Data-Analyst-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	Analytics applications: It describes key moments of statistical distributions, data enhancement, and the blending of data between two source applications. Moreover, the topic also explains last-mile ETL, a scenario in which data blending would be beneficial, key statistical measures, descriptive statistics, and discrete and continuous statistics.
Topic 2	- Databricks SQL: This topic discusses key and side audiences, users, Databricks SQL benefits, complementing a basic Databricks SQL query, schema browser, Databricks SQL dashboards, and the purpose of Databricks SQL endpoints - warehouses. Furthermore, the delves into Serverless Databricks SQL endpoint - warehouses, trade-off between cluster size and cost for Databricks SQL endpoints - warehouses, and Partner Connect. Lastly it discusses small-file upload, connecting Databricks SQL to visualization tools, the medallion architecture, the gold layer, and the benefits of working with streaming data.

Topic 3	• Data Visualization and Dashboarding: Sub-topics of this topic are about of describing how notifications are sent, how to configure and troubleshoot a basic alert, how to configure a refresh schedule, the pros and cons of sharing dashboards, how query parameters change the output, and how to change the colors of all of the visualizations. It also discusses customized data visualizations, visualization formatting, Query Based Dropdown List, and the method for sharing a dashboard.
Topic 4	• Data Management: The topic describes Delta Lake as a tool for managing data files, Delta Lake manages table metadata, benefits of Delta Lake within the Lakehouse, tables on Databricks, a table owner's responsibilities, and the persistence of data. It also identifies management of a table, usage of Data Explorer by a table owner, and organization-specific considerations of PII data. Lastly, the topic it explains how the LOCATION keyword changes, usage of Data Explorer to secure data.
Topic 5	• SQL in the Lakehouse: It identifies a query that retrieves data from the database, the output of a SELECT query, a benefit of having ANSI SQL, access, and clean silver-level data. It also compares and contrasts MERGE INTO, INSERT TABLE, and COPY INTO. Lastly, this topic focuses on creating and applying UDFs in common scaling scenarios.

Superb Databricks-Certified-Data-Analyst-Associate Exam Questions Supply You Marvelous Learning Dumps - Test4Engine

Our Databricks-Certified-Data-Analyst-Associate exam torrent boosts 3 versions and they include PDF version, PC version, and APP online version. The 3 versions boost their each strength and using method. For example, the PC version of Databricks-Certified-Data-Analyst-Associate exam torrent boosts installation software application, simulates the Real Databricks-Certified-Data-Analyst-Associate Exam, supports MS operating system and boosts 2 modes for practice and you can practice offline at any time. You can learn the APP online version of Databricks-Certified-Data-Analyst-Associate guide torrent in the computers, cellphones and laptops and you can choose the most convenient method to learn.

Databricks Certified Data Analyst Associate Exam Sample Questions (Q57-Q62):

NEW QUESTION # 57

A data analyst creates a Databricks SQL Query where the result set has the following schema:

region STRING

number_of_customer INT

When the analyst clicks on the "Add visualization" button on the SQL Editor page, which of the following types of visualizations will be selected by default?

- A. IBar Chart
- B. Line Chart
- C. There is no default. The user must choose a visualization type.
- D. Histogram
- E. Violin Chart

Answer: A

Explanation:

According to the Databricks SQL documentation, when a data analyst clicks on the "Add visualization" button on the SQL Editor page, the default visualization type is Bar Chart. This is because the result set has two columns: one of type STRING and one of type INT. The Bar Chart visualization automatically assigns the STRING column to the X-axis and the INT column to the Y-axis. The Bar Chart visualization is suitable for showing the distribution of a numeric variable across different categories. Reference: Visualization in Databricks SQL, Visualization types

NEW QUESTION # 58

A data analyst is attempting to drop a table `my_table`. The analyst wants to delete all table metadata and data.

They run the following command:

```
DROP TABLE IF EXISTS my_table;
```

While the object no longer appears when they run `SHOW TABLES`, the data files still exist.

Which of the following describes why the data files still exist and the metadata files were deleted?

- A. The table did not have a location
- B. The table's data was smaller than 10 GB
- C. The table's data was larger than 10 GB
- **D. The table was external**
- E. The table was managed

Answer: D

Explanation:

An external table is a table that is defined in the metastore, but its data is stored outside of the Databricks environment, such as in S3, ADLS, or GCS. When an external table is dropped, only the metadata is deleted from the metastore, but the data files are not affected. This is different from a managed table, which is a table whose data is stored in the Databricks environment, and whose data files are deleted when the table is dropped. To delete the data files of an external table, the analyst needs to specify the `PURGE` option in the `DROP TABLE` command, or manually delete the files from the storage system. Reference: `DROP TABLE`, Drop Delta table features, Best practices for dropping a managed Delta Lake table

NEW QUESTION # 59

Data professionals with varying titles use the Databricks SQL service as the primary touchpoint with the Databricks Lakehouse Platform. However, some users will use other services like Databricks Machine Learning or Databricks Data Science and Engineering.

Which of the following roles uses Databricks SQL as a secondary service while primarily using one of the other services?

- A. Business analyst
- B. Data analyst
- **C. Data engineer**
- D. SQL analyst
- E. Business intelligence analyst

Answer: C

Explanation:

Data engineers are primarily responsible for building, managing, and optimizing data pipelines and architectures. They use Databricks Data Science and Engineering service to perform tasks such as data ingestion, transformation, quality, and governance. Data engineers may use Databricks SQL as a secondary service to query, analyze, and visualize data from the lakehouse, but this is not their main focus. Reference: Databricks SQL overview, Databricks Data Science and Engineering overview, Data engineering with Databricks

NEW QUESTION # 60

A data analyst created and is the owner of the managed table `my_table`. They now want to change ownership of the table to a single other user using Data Explorer.

Which of the following approaches can the analyst use to complete the task?

- A. Edit the Owner field in the table page by selecting the Admins group
- B. Edit the Owner field in the table page by removing all access
- **C. Edit the Owner field in the table page by selecting the new owner's account**
- D. Edit the Owner field in the table page by removing their own account
- E. Edit the Owner field in the table page by selecting All Users

Answer: C

Explanation:

The Owner field in the table page shows the current owner of the table and allows the owner to change it to another user or group. To change the ownership of the table, the owner can click on the Owner field and select the new owner from the drop-down list.

This will transfer the ownership of the table to the selected user or group and remove the previous owner from the list of table access control entries¹. The other options are incorrect because:

- A) Removing the owner's account from the Owner field will not change the ownership of the table, but will make the table ownerless².
- B) Selecting All Users from the Owner field will not change the ownership of the table, but will grant all users access to the table³.
- D) Selecting the Admins group from the Owner field will not change the ownership of the table, but will grant the Admins group access to the table³.
- E) Removing all access from the Owner field will not change the ownership of the table, but will revoke all access to the table⁴.

Reference:

- 1: Change table ownership
- 2: Ownerless tables
- 3: Table access control
- 4: Revoke access to a table

NEW QUESTION # 61

What is used as a compute resource for Databricks SQL?

- A. Single-node clusters
- **B. SQL warehouses**
- C. Standard clusters
- D. Downstream BI tools integrated with Databricks SQL

Answer: B

NEW QUESTION # 62

.....

We can assist you with learning by simplified information by our Databricks-Certified-Data-Analyst-Associate learning guide. At the same time, our specialists will update Databricks-Certified-Data-Analyst-Associate learning materials daily and continue to improve the materials. Therefore, you can use our Databricks-Certified-Data-Analyst-Associate exam questions faster and more efficiently, which means that you can save a lot of time to do more meaningful and valuable things. When you are learning our Databricks-Certified-Data-Analyst-Associate Learning Materials, you can find confidence in the process of learning materials and feel happy in learning. After about 20-30 hours, you can get your Databricks certificate.
