Free PDF Quiz 2025 Amazon AWS-Solutions-Architect-Associate: AWS Certified Solutions Architect - Associate (SAA-C02) – Trustable Hot Spot Questions

Our AWS-Solutions-Architect-Associate exam guide are not only rich and varied in test questions, but also of high quality. A very high hit rate gives you a good chance of passing the final AWS-Solutions-Architect-Associate exam. According to past statistics, 98 % - 99 % of the users who have used our AWS-Solutions-Architect-Associate Study Materials can pass the exam successfully. So without doubt, you will be our nest passer as well as long as you buy our AWS-Solutions-Architect-Associate practice braindumps.

Amazon AWS Certified Solutions Architect - Associate (SAA-C02) Sample Questions (Q40-Q45):

NEW QUESTION # 40

A major customer has asked you to set up his AWS infrastructure so that it will be easy to recover in the case of a disaster of some sort. Which of the following is important when thinking about being able to quickly launch resources in AWS to ensure business continuity in case of a disaster?

- A. All items listed here are important when thinking about disaster recovery.
- B. Regularly run your servers, test them, and apply any software updates and configuration changes.

- C. Create and maintain AMIs of key servers where fast recovery is required.
- D. Ensure that you have all supporting custom software packages available in AWS.

Answer: A

Explanation:

In the event of a disaster to your AWS infrastructure you should be able to quickly launch resources in Amazon Web Services (AWS) to ensure business continuity.

The following are some key steps you should have in place for preparation:

- 1 . Set up Amazon EC2 instances to replicate or mirror data.
- 2 . Ensure that you have all supporting custom software packages available in AWS.
- 3 . Create and maintain AMIs of key servers where fast recovery is required.
- 4 . Regularly run these servers, test them, and apply any software updates and configuration changes.
- 5 . Consider automating the provisioning of AWS resources.

NEW QUESTION # 41

An International company has deployed a multi-tier web application that relies on DynamoDB in a single region. For regulatory reasons they need disaster recovery capability in a separate region with a Recovery Time Objective of 2 hours and a Recovery Point Objective of 24 hours. They should synchronize their data on a regular basis and be able to provision the web application rapidly using CloudFormation.

The objective is to minimize changes to the existing web application, control the throughput of DynamoDB used for the synchronization of data and synchronize only the modified elements.

Which design would you choose to meet these requirements?

- A. Send also each item into an SQS queue in the second region; use an auto-scaling group behind the SQS queue to replay the write in the second region.
- B. Use EMR and write a custom script to retrieve data from DynamoDB in the current region using a SCAN operation and push it to DynamoDB in the second region.
- C. Use AWS data Pipeline to schedule a DynamoDB cross region copy once a day. create a 'LastUpdated' attribute in your DynamoDB table that would represent the timestamp of the last update and use it as a filter.
- D. Use AWS data Pipeline to schedule an export of the DynamoDB table to S3 in the current region once a day then schedule another task immediately after it that will import data from S3 to DynamoDB in the other region.

Answer: C

NEW QUESTION # 42

A user is using CloudFormation to launch an EC2 instance and then configure an application after the instance is launched. The user wants the stack creation of ELB and AutoScaling to wait until the EC2 instance is launched and configured properly.

How can the user configure this?

- A. The user can use the DependentCondition resource to hold the creation of the other dependent resources.
- B. The user can use the WaitCondition resource to hold the creation of the other dependent resources.
- C. It is not possible that the stack creation will wait until one service is created and launched.
- D. The user can use the HoldCondition resource to wait for the creation of the other dependent resources.

Answer: B

Explanation:

AWS CloudFormation is an application management tool that provides application modeling, deployment, configuration, management, and related activities. AWS CloudFormation provides a WaitCondition resource that acts as a barrier and blocks the creation of other resources until a completion signal is received from an external source, such as a user application or management system.

NEW QUESTION # 43

Is there any way to own a direct connection to Amazon Web Services?

- A. You can create an encrypted tunnel to VPC, but you don't own the connection.
- B. Yes, it's called Amazon Dedicated Connection.
- C. No, AWS only allows access from the public Internet.
- **D. Yes, it's called Direct Connect.**

Answer: D

NEW QUESTION # 44

A company recently migrated a message processing system to AWS. The system receives messages into an ActiveMQ queue running on an Amazon EC2 instance. Messages are processed by a consumer application running on Amazon EC2. The consumer application processes the messages and writes results to a MySQL database running on Amazon EC2. The company wants this application to be highly available with low operational complexity. Which architecture offers the HIGHEST availability?

- A. Add a second ActiveMQ server to another Availability Zone. Add an additional consumer EC2 instance in another Availability Zone. Replicate the MySQL database to another Availability Zone.
- **B. Use Amazon MQ with active/standby brokers configured across two Availability Zones. Add an Auto Scaling group for the consumer EC2 instances across two Availability Zones. Use Amazon RDS for MySQL with Multi-AZ enabled.**
- C. Use Amazon MQ with active/standby brokers configured across two Availability Zones. Add an additional consumer EC2 instance in another Availability Zone. Use Amazon RDS for MySQL with Multi-AZ enabled.
- D. Use Amazon MQ with active/standby brokers configured across two Availability Zones. Add an additional consumer EC2 instance in another Availability Zone. Replicate the MySQL database to another Availability Zone.

Answer: B

NEW QUESTION # 45

.....

If you choose Getcertkey, success is not far away for you. And soon you can get Amazon Certification AWS-Solutions-Architect-Associate Exam certificate. The product of Getcertkey not only can 100% guarantee you to pass the exam, but also can provide you a free one-year update service.

AWS-Solutions-Architect-Associate Valid Test Topics: https://www.getcertkey.com/AWS-Solutions-Architect-Associate_braindumps.html

Pass Your Examination With Our AWS-Solutions-Architect-Associate Actual Questions And Answers, I think it is time to get some certifications to make you more qualified, such as AWS-Solutions-Architect-Associate certification, Amazon AWS-Solutions-Architect-Associate Valid Test Topics follows a logical path, each level of Amazon AWS-Solutions-Architect-Associate Valid Test Topics will enable students to obtain higher, more professional and more complex qualifications, What's more, the AWS-Solutions-Architect-Associate valid vce torrent is the best valid and latest, which can ensure 100% pass.

If the small version of the image were more AWS-Solutions-Architect-Associate tightly cropped, the image would maintain its initial impact, even when scaled down on the small screen, Right now, as stated previously, AWS-Solutions-Architect-Associate New Dumps Ppt all content is on the Master content layer because that was the default layer.

AWS-Solutions-Architect-Associate valid test questions & AWS-Solutions-Architect-Associate free download dumps & AWS-Solutions-Architect-Associate reliable study torrent

Pass Your Examination With Our AWS-Solutions-Architect-Associate Actual Questions And Answers, I think it is time to get some certifications to make you more qualified, such as AWS-Solutions-Architect-Associate certification.
