HPE Hybrid Cloud Solutions Sample Questions (Q72-Q77):

NEW QUESTION # 72

Drag and Drop Question

Match the RAID level with its capacity overhead. (Each option may be used once, more than once, or not at all.)

	Answer Area	
Capacity of one drive		RAID 1
Capacity of two drives		RAID 0
Zero overhead from capacity prospective		RAID 5
		RAID 6

Answer:

Explanation:

	Answer Area	
Capacity of one drive	Capacity of one drive	RAID 1
Capacity of two drives	Zero overhead from capacity prospective	RAID 0
Zero overhead from capacity prospective	Capacity of one drive	RAID 5
	Capacity of two drives	RAID 6

NEW QUESTION # 73

You connect to the Compute Ops Management (CoM) through the GreenLake Cloud Platform dashboard. The server you want to manage is missing. Where should the server be added so it appears in the CoM?

- A. Compute Ops Management - Servers
- B. Compute Ops Management - Server Groups
- C. GreenLake Cloud Platform - Manage Subscriptions
- **D. GreenLake Cloud Platform - Onboard Devices**

Answer: D

Explanation:

Understanding the Scenario:

You are accessing Compute Ops Management (CoM) through the GreenLake Cloud Platform dashboard.

A specific server is not appearing in the CoM, indicating it needs to be added.

Steps to Add the Server:

A: Compute Ops Management - Server Groups: This option manages existing groups of servers but does not handle the initial onboarding.

B: GreenLake Cloud Platform - Onboard Devices: This is the process to add new devices (servers) to the GreenLake Cloud Platform, ensuring they appear in the CoM.

C: Compute Ops Management - Servers: Used to manage servers already onboarded to the platform.

D: GreenLake Cloud Platform - Manage Subscriptions: Related to managing service subscriptions rather than onboarding devices.

Onboarding Process: The server needs to be onboarded to the GreenLake Cloud Platform for it to be visible and manageable in the Compute Ops Management interface.

Correct Procedure: Onboarding devices is the initial step required to integrate new hardware into the platform's management tools.

NEW QUESTION # 74

A customer has a large database stored on a DL380 server that is configured with a large RAID 6 set. What can the customer install that will directly improve the existing storage performance bottleneck?

- A. Second CPU
- B. GPU accelerator
- C. SmartCache
- D. Physical Memory

Answer: C

Explanation:

SmartCache: HPE SmartCache is a controller-based caching solution that caches the most frequently accessed data ("hot" data) onto lower latency SSDs to improve the performance of read-intensive applications like databases. This is particularly effective for large RAID sets where disk I/O performance can be a bottleneck.

NEW QUESTION # 75

Your customer asks you to explain the benefits that the HPE GreenLake consumption model can provide.

Match the GreenLake benefits to their outcomes.

Benefit		Outcome
Managed by HPE and HPE Partners		Provides customers with a simple point-and-click automated provisioning
Pay-per-use		Provides financial flexibility for customers, frees up capital, and provides better control costs
Scale up and down		Manages capacity ahead of demand and allows customers to easily add resources when they are needed
Self-service		Allows customer IT employees to be more productive within an organization

Answer:

Explanation:

Benefit		Outcome
Managed by HPE and HPE Partners	Self-service	Provides customers with a simple point-and-click automated provisioning
Pay-per-use	Pay-per-use	Provides financial flexibility for customers, frees up capital, and provides better control costs
Scale up and down	Scale up and down	Manages capacity ahead of demand and allows customers to easily add resources when they are needed
Self-service	Managed by HPE and HPE Partners	Allows customer IT employees to be more productive within an organization

Explanation:

Managed by HPE and HPE Partners: Allows customer IT employees to be more productive within an organization

Pay-per-use: Provides financial flexibility for customers, frees up capital, and provides better control costs

Scale up and down: Manages capacity ahead of demand and allows customers to easily add resources when they are needed

Self-service: Provides customers with a simple point-and-click automated provisioning

NEW QUESTION # 76

You need to explain how the HPE GreenLake platform can help your customers business become more agile.

What information you provide? (Select two)

- A. HPF GreenLake provides a larger hardware port f01i0 than traditional HPE hardware solutions
- B. HPE GreenLake provides infinite scale to the customer at no additional cost with its scale up policy.
- C. The HPE GreenLake platform is always managed by HPE, reducing the need for internal IT staff.
- **D. HPE active-ty monitors, manages, and deploys capacity ahead of demand so the customer can scale With ease within an installed buffer**
- **E. customers can control costs Since advanced metering allows them to only pay tor what is used.**

Answer: D,E

Explanation:

HPE GreenLake is a cloud services platform that delivers on-demand capacity and planning, combining the agility and economics of the public cloud with the security and performance of on- premises IT. Some of the benefits of HPE GreenLake include:

- Customers can control costs since advanced metering allows them to only pay for what is used:

HPE GreenLake offers a pay-per-use model that aligns costs with actual usage, reducing overprovisioning and improving cash flow.

Customers can also scale up or down as needed and only pay for what they use.

- HPE actively monitors, manages, and deploys capacity ahead of demand so the customer can scale with ease within an installed buffer: HPE GreenLake provides customers with buffer capacity that is ready to use in minutes, not months, enabling them to respond quickly to changing business needs. Customers can also access a range of cloud services from HPE and partners through a self-service portal.
