Best Way To Ensure Success With APMG-International ISO-IEC-27001-Foundation Exam Questions

Exam4Tests's study material is available in three different formats. The reason we have introduced three formats of the ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) practice material is to meet the learning needs of every student. Some candidates prefer ISO-IEC-27001-Foundation practice exams and some want real ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) questions due to a shortage of time. At Exam4Tests, we meet the needs of both types of aspirants. We have ISO-IEC-27001-Foundation PDF format, a web-based practice exam, and ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) desktop practice test software.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 2	<ul style="list-style-type: none"> Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 3	<ul style="list-style-type: none"> Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 4	<ul style="list-style-type: none"> Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 5	<ul style="list-style-type: none"> Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 6	<ul style="list-style-type: none"> Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 7	<ul style="list-style-type: none"> Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q18-Q23):

NEW QUESTION # 18

Which item is required to be included in an information security policy?

- A. A commitment to satisfy applicable requirements related to information security
- B. A framework enabling concerns with the information security policy to be addressed
- C. A Statement of Applicability which defines the necessary controls to be implemented
- D. A plan for the continual improvement of the information security management system

Answer: A

Explanation:

Clause 5.2 (Information security policy) requires that the policy:

- * "includes information security objectives (or provides a framework for setting them)"
- * "includes a commitment to satisfy applicable requirements related to information security"
- * "includes a commitment to continual improvement of the ISMS."

Among the listed options, the exact mandatory requirement is "a commitment to satisfy applicable requirements related to information security". Option B partially reflects Clause 5.2 (commitment to continual improvement), but the wording given in the standard prioritizes the satisfaction of applicable requirements (e.g., legal, regulatory, contractual). Option C is not a policy requirement. Option D (Statement of Applicability) is a separate mandatory document (Clause 6.1.3) and not part of the policy itself. Thus, the correct answer is A.

NEW QUESTION # 19

To whom does the scope of the Terms and conditions of employment control apply?

- A. Personnel and the organization
- B. Contractors only
- C. All employees, contractors and third-party users
- D. Employees only

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is D.

NEW QUESTION # 20

Which of the following is required to be considered when selecting appropriate information security risk treatment options?

- A. Criteria for accepting identified risks
- B. Criteria for performing risk assessments
- C. Only risk controls in Annex A of ISO/IEC 27001
- D. Only risk controls in ISO/IEC 27002

Answer: A

Explanation:

Clause 6.1.3 (c) requires organizations to:

"compare the controls determined in 6.1.3 b) with those in Annex A and verify that no necessary control has been omitted; and prepare a Statement of Applicability." It also requires organizations to select risk treatment options considering "the organization's risk acceptance criteria." This shows that risk acceptance criteria are a fundamental factor when selecting risk treatment options.

Options C and D are incorrect because Annex A and ISO/IEC 27002 are reference sets, not the sole sources of controls - organizations can design their own. Criteria for performing risk assessments (B) are part of 6.1.2 (risk assessment process), not risk treatment.

Thus, the correct requirement is A: Criteria for accepting identified risks.

NEW QUESTION # 21

Identify the missing word(s) in the following sentence.

When planning the ISMS, the organization is specifically required to plan actions to address risks and opportunities and how to [?] these actions.

- A. apply competent resources to
- B. improve the effectiveness of
- C. communicate
- D. evaluate the effectiveness of

Answer: D

Explanation:

Clause 6.1.1 (Planning) states:

"The organization shall plan:

d) actions to address these risks and opportunities; and

e) how to:

* integrate and implement the actions into its ISMS processes; and

* evaluate the effectiveness of these actions."

This confirms the missing words are "evaluate the effectiveness of". Communication (A), applying resources (B), and improving effectiveness (C) are important concepts elsewhere but not the direct requirement stated in this clause.

NEW QUESTION # 22

Which statement describes a requirement of an internal audit programme?

- A. All processes must be audited within a 3-year cycle
- B. Previous audit results are disregarded to ensure objectivity
- C. The programme must use third party auditors to ensure impartiality
- D. The programme must consider the importance of the target processes

Answer: D

Explanation:

Clause 9.2.2 of ISO/IEC 27001:2022 specifies requirements for the internal audit programme. It requires organizations to: "Plan, establish, implement and maintain an audit programme(s) including the frequency, methods, responsibilities, planning requirements and reporting, which shall take into consideration the importance of the processes concerned, changes affecting the organization, and the results of previous audits." This makes option C correct, since importance of the processes is a required factor. Option A is incorrect because audits do not need third-party auditors; objectivity can be maintained internally if independence is respected. Option B is wrong because previous audit results must be considered, not disregarded. Option D is also incorrect - the standard does not specify a 3-year cycle; frequency depends on risks and needs. Thus, the correct verified answer is C.

NEW QUESTION # 23

.....

We offer three different formats for preparing for the ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam questions, all of which will ensure your definite success on your ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam dumps.
