Original JN0-253 Questions & JN0-253 Study Tool

Our company is a multinational company with sales and after-sale service of JN0-253 exam torrent compiling departments throughout the world. In addition, our company has become the top-notch one in the fields, therefore, if you are preparing for the exam in order to get the related certification, then the Mist AI, Associate (JNCIA-MistAI) exam question compiled by our company is your solid choice. All employees worldwide in our company operate under a common mission: to be the best global supplier of electronic JN0-253 Exam Torrent for our customers through product innovation and enhancement of customers' satisfaction. Wherever you are in the world we will provide you with the most useful and effectively JN0-253 guide torrent in this website, which will help you to pass the exam as well as getting the related certification with a great ease.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q30-Q35):

NEW QUESTION # 30

You are asked to create a label that will be applied to a WLAN template.
In this scenario, under which level should you create the label?

- **A. site**
- B. clients
- C. WLAN
- D. organization

Answer: A

Explanation:

When creating a label to be applied to a WLAN template in Mist AI, you should create the label at the site level. This is because WLAN templates are designed to be associated with specific sites or site groups, allowing you to customize WLAN configurations per site. Creating labels at the site level ensures that these configurations are applied appropriately within the desired site context.

NEW QUESTION # 31

At which two configuration levels are WLAN objects created? (Choose two.)

- A. device level
- B. user level
- **C. site level**
- **D. org level**

Answer: C,D

Explanation:

Site Level: WLAN objects can be created at the site level, allowing specific configurations for different locations within an organization. This helps in customizing WLAN settings based on the unique requirements of each site.

Org Level: WLAN objects can also be created at the organization level, which provides a standardized configuration that can be applied across multiple sites. This ensures consistency in WLAN settings throughout the entire organization.

NEW QUESTION # 32

Exhibit:

Referring to the exhibit, which SLE would an administrator investigate to troubleshoot weak signal issues?

- A. Successful Connects
- B. Coverage
- C. Roaming
- D. Throughput

Answer: B

Explanation:

In Juniper Mist Wireless Assurance, Service Level Expectations (SLEs) are key metrics that measure different aspects of the end-user experience. Each SLE focuses on a distinct area of network performance such as Connection, Roaming, Throughput, and Coverage. The Coverage SLE specifically measures whether wireless clients are receiving adequate signal strength (RSSI) and signal quality (SNR) from access points. According to the Juniper Mist AI Operations and SLE Analytics Guide, this metric is defined as: "The Coverage SLE quantifies the percentage of client sessions that meet the required signal strength and quality thresholds. Low coverage indicates areas with weak or inconsistent RF signal levels." When users experience weak signal or dead zones, the Coverage SLE provides insight into where and why these issues occur. Mist AI identifies sub-classifiers such as Signal Quality, Wi-Fi Interference, or Airtime Utilization, allowing administrators to isolate the cause of poor signal conditions. Therefore, in the exhibit shown, an administrator would investigate the Coverage SLE (79%), as it directly relates to signal weakness or RF coverage problems.

NEW QUESTION # 33

Which location-based service does User Engagement provide?

- A. wayfinding
- B. Wi-Fi presence analytics
- C. asset tracking
- D. ultra wide band location

Answer: B

NEW QUESTION # 34

Which two statements correctly describe Mist organizations and sites? (Choose two.)

- A. Multiple organizations may be contained within a single site.
- **B. A site is contained within an organization.**
- C. An organization is contained within a site.
- **D. Multiple sites may be contained within a single organization.**

Answer: B,D

Explanation:

In the Mist architecture, an organization is a higher-level entity that can contain multiple sites.

A site is contained within an organization: Each site operates under the umbrella of an organization, allowing centralized management and policy enforcement.

Multiple sites may be contained within a single organization: This structure enables organizations to manage and monitor different geographical locations or different business units within a single centralized framework.

This hierarchical structure facilitates scalable and organized network management.

NEW QUESTION # 35

.....

Our product boosts many merits and high passing rate. Our products have 3 versions and we provide free update of the Juniper exam torrent to you. If you are the old client you can enjoy the discounts. Most important of all, as long as we have compiled a new version of the JN0-253 Exam Questions, we will send the latest version of our Juniper exam questions to our customers for free during the whole year after purchasing. Our product can improve your stocks of knowledge and your abilities in some area and help you gain the success in your career.
