## Why RealExamFree Is One Of The Best Platform To Prepare For USGBC LEED-Green-Associate Exam?

Simplified language allows candidates to see at a glance. With this purpose, our LEED-Green-Associate learning materials simplify the questions and answers in easy-to-understand language so that each candidate can understand the test information and master it at the first time, and they can pass the test at their first attempt. Our experts aim to deliver the most effective information in the simplest language. Each candidate takes only a few days can attend to the LEED-Green-Associate Exam. In addition, our LEED-Green-Associate LEED-Green-Associate provides end users with real questions and answers. We have been working hard to update the latest LEED-Green-Associate learning materials and provide all users with the correct LEED-Green-Associate answers. Therefore, our LEED-Green-Associate learning materials always meet your academic requirements.

## USGBC LEED-Green-Associate Exam Syllabus Topics:

| Topic   | Details  |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"><li>• Energy and Atmosphere: This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.</li></ul>   |
| Topic 2 | <ul style="list-style-type: none"><li>• LEED Process: This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.</li></ul> |
|         |  |

|         |   |
|---------|---|
| Topic 3 | <ul style="list-style-type: none"> <li>Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.</li> </ul> |
| Topic 4 | <ul style="list-style-type: none"> <li>Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.</li> </ul>   |
| Topic 5 | <ul style="list-style-type: none"> <li>Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.</li> </ul>   |
| Topic 6 | <ul style="list-style-type: none"> <li>Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.</li> </ul>   |
| Topic 7 | <ul style="list-style-type: none"> <li>Materials and Resources: This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.</li> </ul>   |
| Topic 8 | <ul style="list-style-type: none"> <li>Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.</li> </ul>  |

## USGBC LEED Green Associate Exam Sample Questions (Q268-Q273):

### NEW QUESTION # 268

When considering water conservation and water-efficient landscaping, which two types of water would be most useful for landscape irrigation?

- A. Clean water
- B. Blackwater
- C. Rainwater
- D. Potable water

**Answer: C**

Explanation:

The Guide specifies:

"Use nonpotable water for irrigation such as captured rainwater, graywater or municipally reclaimed wastewater..." Potable water use is discouraged, and blackwater cannot be used unless treated.

### NEW QUESTION # 269

What organization reviews and provides final LEED certification report to projects?

- A. U.S. Green Building Council
- B. ASHRAE
- C. Green Business Certification Inc.
- D. Green Building Initiative (GBI)

**Answer: C**

Explanation:

Explanation

The Green Business Certification Inc. (GBCI) reviews and provides the final LEED certification report to projects. GBCI was established in 2008 as a separately incorporated entity with the support of the U.S. Green Building Council (USGBC). GBCI administers project certifications for LEED and other green business certification programs. References: LEED Green Associate

#### NEW QUESTION # 270

Which industry benchmarking tool is used for measuring ongoing energy performance?

- A. Bright Power's EnergyScoreCard
- B. U.S. Department of Energy's EnerCop
- **C. EPA's ENERGY STAR Portfolio Manager**
- D. U.S. Department of Energy's EnergyIQ

**Answer: C**

Explanation:

ENERGY STAR Portfolio Manager is an online tool developed by the U.S. Environmental Protection Agency (EPA) that allows building owners and managers to measure and track the energy and water performance of their buildings, as well as benchmark their buildings against similar buildings nationwide. The tool uses a 1-100 ENERGY STAR score to rate the energy efficiency of a building relative to its peers, where a score of 50 represents median performance and a score of 75 or higher indicates top performance<sup>1</sup>. References: LEED v4 Green Associate Candidate Handbook<sup>1</sup>, ENERGY STAR Portfolio Manager

#### NEW QUESTION # 271

What is pre-consumer recycled content?

- A. Waste material that is generated from factories
- B. Virgin material that is not utilized in production
- **C. Waste material that is diverted from the waste stream during the manufacturing process**
- D. Waste material that is generated by households or by commercial use

**Answer: C**

Explanation:

Explanation

Pre-consumer recycled content refers to waste material that is diverted from the waste stream during the manufacturing process. This can include scraps or trimmings that are collected and returned to the manufacturing process. It does not include rework, regrind, or scrap materials capable of being reclaimed within the same process that generated them. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

#### NEW QUESTION # 272

Which of the following is an effective way to identify occupant comfort issues in a space based on LEED best practices?

- A. Install energy meters in the building
- B. Wait for occupants to alert facilities management team of issues
- C. Discuss potential issues with building owner
- **D. Conduct an occupant comfort survey with all building occupants**

**Answer: D**

Explanation:

Conducting an occupant comfort survey with all building occupants is an effective way to identify occupant comfort issues in a space based on LEED best practices. An occupant comfort survey is a tool that collects feedback from building occupants about their satisfaction with various aspects of their indoor environment, such as thermal comfort, lighting quality, acoustic quality, air quality, ergonomics, and aesthetics. An occupant comfort survey can help identify areas of improvement and potential solutions for enhancing occupant comfort and well-being. The other options are not effective ways to identify occupant comfort issues in a space based on LEED best practices. Installing energy meters in the building is a strategy that measures energy performance, but does not directly address occupant comfort. Discussing potential issues with building owner is a subjective and limited way of gathering information, as the building owner may not represent the views and experiences of all building occupants. Waiting for occupants to alert facilities management team of issues is a passive and reactive way of addressing occupant comfort, as some occupants may not

voice their concerns or may have already suffered from discomfort. Reference: LEED Green Associate Candidate Handbook, page 25; USGBC, [Guide to LEED Certification: Commercial], page 13.

## NEW QUESTION # 273

.....

As the old saying goes people change with the times. People must constantly update their stocks of knowledge and improve their practical ability. Passing the test LEED-Green-Associate certification can help you achieve that and buying our LEED-Green-Associate test practice dump can help you pass the test smoothly. Our LEED-Green-Associate study question is superior to other same kinds of study materials in many aspects. Our products' test bank covers the entire syllabus of the test and all the possible questions which may appear in the test. Each question and answer has been verified by the industry experts. The research and production of our LEED-Green-Associate Exam Questions are undertaken by our first-tier expert team.
