Amazon AWS Certified Cloud Practitioner Sample Questions (Q490-Q495):

NEW QUESTION # 490

Which AWS service will track user activity on AWS?

- A. Amazon GuardDuty
- B. AWS Trusted Advisor
- C. Amazon CloudWatch
- **D. AWS CloudTrail**

Answer: D

NEW QUESTION # 491

What is a benefit of moving to the AWS Cloud in terms of improving time to market?

- **A. Increased business agility**
- B. Increased application security
- C. Decreased deployment speed
- D. Increased backup capabilities

Answer: A

Explanation:

Increased business agility is a benefit of moving to the AWS Cloud in terms of improving time to market.

Business agility refers to the ability of a company to adapt to changing customer needs, market conditions, and competitive pressures. Moving to the AWS Cloud enables business agility by providing faster access to resources, lower upfront costs, and greater scalability and flexibility. By using the AWS Cloud, companies can launch new products and services, experiment with new ideas, and respond to customer feedback more quickly and efficiently. For more information, see [Benefits of Cloud Computing] and [Business Agility].

NEW QUESTION # 492

What is an AWS Region?

- **A. A physical location around the world where data centers are clustered**
- B. One or more discrete data centers with redundant power, networking, and connectivity
- C. A broad set of global, cloud-based products that include compute, storage, and databases
- D. A service that developers use to build applications that deliver latencies of single-digit milliseconds to users

Answer: A

Explanation:

AWS has the concept of a Region, which is a physical location around the world where we cluster data centers. We call each group of logical data centers an Availability Zone. Each AWS Region consists of multiple, isolated, and physically separate AZs within a geographic area.

NEW QUESTION # 493

IT systems should be designed to reduce interdependencies, so that a change or failure in one component does not cascade to other components.

This is an example of which principle of cloud architecture design?

- A. Scalability
- B. Automatic scaling
- C. Automation
- **D. Loose coupling**

Answer: D

Explanation:
