## AWS-Solutions-Associate Exam Torrent - AWS-Solutions-Associate Practice Test & AWS-Solutions-Associate Quiz Torrent

You don't need to install any separate software or plugin to use it on your system to practice for your actual AWS Certified Solutions Architect - Associate (SAA-C02) (AWS-Solutions-Associate) exam. Amazon web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.

## Amazon AWS Certified Solutions Architect - Associate (SAA-C02) Sample Questions (Q888-Q893):

### NEW QUESTION # 888

A media company has deployed a multi-tier architecture on AWS. Web servers are deployed in two Availability Zones using an Auto Scaling group with a default Auto Scaling termination policy. The web servers' Auto Scaling group currently has 15 instances running.

Which instance will be terminated first during a scale-in operation?

- A. The instance closest to the next billing hour.
- B. The oldest instance in the group.
- C. The instance in the Availability Zone that has most instances.
- D. The instance with the oldest launch configuration.

Answer: C

#### NEW QUESTION # 889

You have an environment that consists of a public subnet using Amazon VPC and 3 instances that are running in this subnet. These three instances can successfully communicate with other hosts on the Internet. You launch a fourth instance in the same subnet, using the same AMI and security group configuration you used for the others, but find that this instance cannot be accessed from the internet. What should you do to enable Internet access?

- A. Deploy a NAT instance into the public subnet.
- B. Configure a publically routable IP Address in the host OS of the fourth instance.
- C. Modify the routing table for the public subnet.
- **D. Assign an Elastic IP address to the fourth instance.**

**Answer: D**

#### NEW QUESTION # 890

A company has registered its domain name with Amazon Route 53. The company uses Amazon API Gateway in the ca-central-1 Region as a public interface for its backend microservice APIs. Third-party services consume the APIs securely. The company wants to design its API Gateway URL with the company's domain name and corresponding certificate so that the third-party services can use HTTPS.

Which solution will meet these requirements?

- A. Create Route 53 DNS records with the company's domain name. Point the alias record to the Regional API Gateway stage endpoint. Import the public certificate associated with the company's domain name into AWS Certificate Manager (ACM) in the us-east-1 Region.
- **B. Create a Regional API Gateway endpoint. Associate the API Gateway endpoint with the company's domain name. Import the public certificate associated with the company's domain name into AWS Certificate Manager (ACM) in the us-east-1 Region. Attach the certificate to the API Gateway APIs. Create Route 53 DNS records with the company's domain name. Point an A record to the company's domain name.**
- C. Create a Regional API Gateway endpoint. Associate the API Gateway endpoint with the company's domain name. Import the public certificate associated with the company's domain name into AWS Certificate Manager (ACM) in the same Region. Attach the certificate to the API Gateway endpoint.
- D. Create stage variables in API Gateway with Name="Endpoint-URL" and Value="Company Domain Name" to overwrite the default URL. Import the public certificate associated with the company's domain name into AWS Certificate Manager (ACM).

**Answer: B**

#### NEW QUESTION # 891

A Solutions Architect plans to migrate a load balancer tier from a data center to AWS.

Several websites have multiple domains that require secure load balancing. The Architect decides to use Elastic Load Balancing Application Load Balancers.

What is the MOST efficient method for achieving secure communication?

- A. Create a secondary proxy server to terminate SSL traffic before the traffic reaches the Application Load Balancer
- B. Let a third-party Certificate Manager manage certificates required to all domains and upload them to the Application Load Balancer
- **C. Create an SNI certificate and upload it to the Application Load Balancer**
- D. Create a wildcard certificate and upload it to the Application Load Balancer

**Answer: C**

Explanation:

#### NEW QUESTION # 892

Your security team requires each Amazon ECS task to have an IAM policy that limits the task's privileges to only those required for its use of AWS services. How can you achieve this?

- A. Connect to each running Amazon ECS container instance and add discrete credentials
- B. Reboot each Amazon ECS task programmatically to generate new instance metadata for each task
- C. Use IAM roles on the Amazon ECS container instances to associate IAM roles with each ECS task on that instance
- **D. Use IAM roles for Amazon ECS tasks to associate a specific IAM role with each ECS task definition**

**Answer: D**

## NEW QUESTION # 893

.....

In the era of rapid development in the IT industry, we have to look at those IT people with new eyes. They use their high-end technology to create many convenient place for us. And save a lot of manpower and material resources for the state and enterprises. And even reached unimaginable effect. Of course, their income must be very high. Do you want to be the kind of person?
