Top AZ-104 Download Free Dumps 100% Pass | High-quality AZ-104: Microsoft Azure Administrator 100% Pass

Our AZ-104 study questions will update frequently to guarantee that you can get enough test banks and follow the trend in the theory and the practice. That is to say, our product boasts many advantages and to gain a better understanding of our Microsoft Azure Administrator guide torrent. It is very worthy for you to buy our product and please trust us. If you still can't fully believe us, please read the introduction of the features and the functions of our product as follow.

Microsoft AZ-104 Certification Exam is intended for IT professionals who want to advance their careers in Azure administration. Microsoft Azure Administrator certification is widely recognized in the cloud industry and can help you stand out from other candidates in the job market. By earning the AZ-104 certification, you can demonstrate your expertise in managing and administering Azure services, which can lead to better job opportunities and higher salaries. It is a valuable certification for anyone who wants to build a career in cloud administration.

Preparation Process

You can ace this certification test at the first attempt by studying the appropriate resources. The good news is that Microsoft offers extensive materials to help the candidates prepare for this exam. Thus, pay attention to some of the following study options to prepare for Microsoft AZ-104 like a pro:

- **Official Practice Test**

The students can also take advantage of the official practice test available on the Microsoft website to evaluate their skills and knowledge of topics before attempting the actual exam. They can measure their readiness by working through the questions and understanding the right answers.

- **Instructor-Led Training**

Microsoft recommends two instructor-led training courses to prepare for this exam. The first course is Microsoft Azure Administrator. It focuses on how to manage Azure subscriptions, administer infrastructures, secure identities, connect on-premises and Azure sites, configure VN, implement storage solutions, and manage network traffic, among others. The second instructor-led training, known as Azure Administration for AWS SysOps, is a two-day course. It is created to equip the learners with an understanding of the differences between AWS and Azure and how to administer Azure. It covers different topics, ranging from Azure Administration and Azure Compute to Azure Networking, Azure Governance, and Azure Storage.

- **Free Online Training**

Microsoft also offers free learning paths to help the individuals gain the competence required to achieve success in the certification exam. There are a total of six learning paths with varying modules. Those who prefer the self-paced preparation method will do well with these resources.

Microsoft Azure Administrator Sample Questions (Q289-Q294):

NEW QUESTION # 289

You have a sync group named Sync1 that has a cloud endpoint. The cloud endpoint includes a file named File1.txt. You on-premises network contains servers that run Windows Server 2016. The servers are configured as shown in the following table.

Name	Share	Share contents
Server1	Share1	File1.txt, File2.txt
Server2	Share2	File2.txt, File3.txt

You add Share1 as an endpoint for Sync1. One hour later, you add Share2 as an endpoint for Sync1. For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
On the cloud endpoint, File1.txt is overwritten by File1.txt from Share1.	☐	☐
On Server1, File1.txt is overwritten by File1.txt from the cloud endpoint.	☐	☐
File1.txt Share1 replicates to Share2.	☐	☐

Answer:

Explanation:

Statements	Yes	No
On the cloud endpoint, File1.txt is overwritten by File1.txt from Share1.	☐	☐
On Server1, File1.txt is overwritten by File1.txt from the cloud endpoint.	☐	☐
File1.txt Share1 replicates to Share2.	☐	☐

Statement 1: Yes

If you add an Azure file share that has an existing set of files as a cloud endpoint to a sync group, the existing files are merged with any other files that are already on other endpoints in the sync group.

Statement 2: No

Files present in any server endpoint will not be overwritten by the files present in cloud endpoint. Hence this statement is false.

If you add a server location with an existing set of files as a server endpoint to a sync group, those files will be merged with any other files already on other endpoints in the sync group but not vice versa.

Statement 3: Yes

Azure File Sync has a simple architecture : cloud endpoints, which is the Azure File Sync service and server endpoints, which are the registered servers with the service. On top of that, we have Sync Groups, which combine one cloud endpoint with one or more server endpoints. All members of this group will receive the replicated data where the central location will be the cloud endpoint.

NEW QUESTION # 290

Peering for VNET2 is configured as shown in the following exhibit.

Peering for VNET3 is configured as shown in the following exhibit.

How can packets be routed between the virtual networks? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Packets from VNET1 can be routed to:

- VNET2 only
- VNET3 only
- VNET2 and VNET3

Packets from VNET2 can be routed to:

- VNET1 only
- VNET3 only
- VNET1 and VNET3

Answer:

Explanation:

Packets from VNET1 can be routed to:

- VNET2 only
- VNET3 only
- VNET2 and VNET3

Packets from VNET2 can be routed to:

- VNET1 only
- VNET3 only
- VNET1 and VNET3

<https://docs.microsoft.com/en-us/azure/virtual-network/virtual-network-peering-overview>

NEW QUESTION # 291

You are configuring serverless computing in Azure.

You need to receive an email message whenever a resource is created in or deleted from a resource group. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create an Azure Event Grid trigger

Create an Azure Service Bus namespace

Create conditions and actions

Create an Azure Logic App

Create an event subscription

Answer Area

Answer:

Explanation:

Actions

- Create an Azure Event Grid trigger
- Create an Azure Service Bus namespace
- Create conditions and actions
- Create an Azure Logic App
- Create an event subscription

Answer Area

- Create an Azure Logic App
- Create an Azure Event Grid trigger
- Create conditions and actions

Reference:

<https://docs.microsoft.com/en-us/azure/event-grid/monitor-virtual-machine-changes-event-grid-logic-app>

NEW QUESTION # 292

Drag and Drop Question

You have an on-premises network that you plan to connect to Azure by using a site-to-site VPN.

In Azure, you have an Azure virtual network named VNet1 that uses an address space of 10.0.0.0/16. VNet1 contains a subnet named Subnet1 that uses an address space of 10.0.0.0/24.

You need to create a site-to-site VPN to Azure.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choice is correct. You will receive credit for any of the correct orders you select.

Actions

- Create a local gateway.
- Create a VPN gateway.
- Create a gateway subnet.
- Create a custom DNS server.
- Create a VPN connection.
- Create an Azure Content Delivery Network (CDN) profile.

Answer Area

⬅
➡

⬆
⬇

Answer:

Explanation:

Actions

Create a gateway subnet.

Create a VPN gateway.

Create a local gateway.

Create a VPN connection.

Create a custom DNS server.

Create an Azure Content Delivery Network (CDN) profile.

Answer Area

⬅

➡

⬅

➡

Explanation:

As per documentation:

1. Create a virtual network
2. Create a VPN gateway
3. Create a local network gateway
4. Create a VPN connection
5. Verify the connection
6. Connect to a virtual machine

Reference:

<https://docs.microsoft.com/en-us/azure/vpn-gateway/vpn-gateway-about-vpn-gateway-settings>

<https://docs.microsoft.com/en-us/azure/vpn-gateway/vpn-gateway-howto-site-to-site-classic-portal>

NEW QUESTION # 293

You have an Azure subscription named Subscription1 that contains the resources shown in the following table.

Name	Type	Location	Resource group
RG1	Resource group	East US	Not applicable
RG2	Resource group	West US	Not applicable
Vault1	Recovery Services vault	West Europe	RG1
storage1	Storage account	East US	RG2
storage2	Storage account	West US	RG1
storage3	Storage account	West Europe	RG2
Analytics1	Log Analytics workspace	East US	RG1
Analytics2	Log Analytics workspace	West US	RG2
Analytics3	Log Analytics workspace	West Europe	RG1

You plan to configure Azure Backup reports for Vault1.

You are configuring the Diagnostics settings for the AzureBackupReports log.

Which storage accounts and which Log Analytics workspaces can you use for the Azure Backup reports of Vault1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Storage accounts:

storage1 only

storage2 only

storage3 only

storage1, storage2, and storage3

Log Analytics workspaces:

Analytics1 only

Analytics2 only

Analytics3 only

Analytics1, Analytics2, and Analytics3

Answer:

Explanation:

Storage accounts:

- storage1 only
- storage2 only
- storage3 only
- storage1, storage2, and storage3

Log Analytics workspaces:

- Analytics1 only
- Analytics2 only
- Analytics3 only
- Analytics1, Analytics2, and Analytics3

Explanation:

Box 1: storage3 only

Vault1 and storage3 are both in West Europe.

Box 2: Analytics3

Vault1 and Analytics3 are both in West Europe.
