AZ-104 Online soft test engine supports all web browsers and it has testing history and performance review, and you can have a general review of what you have learnt before next learning.

### Microsoft Azure Administrator Sample Questions (Q44-Q49):

#### NEW QUESTION # 44

Your on-premises network contains an SMB share named Share1.

You have an Azure subscription that contains the following resources:

A web app named webapp1

A virtual network named VNET1

You need to ensure that webapp1 can connect to Share1.

What should you deploy?

- A. an Azure Active Directory (Azure AD) Application Proxy
- **B. an Azure Virtual Network Gateway**
- C. an Azure Application Gateway

**Answer: B**

Explanation:

Explanation

A Site-to-Site VPN gateway connection can be used to connect your on-premises network to an Azure virtual network over an IPsec/IKE (IKEv1 or IKEv2) VPN tunnel.

This type of connection requires a VPN device, a VPN gateway, located on-premises that has an externally facing public IP address assigned to it.

Reference:

<https://docs.microsoft.com/en-us/azure/vpn-gateway/vpn-gateway-howto-site-to-site-resource-manager-portal>

#### NEW QUESTION # 45

You have an Azure App Service plan that hosts an Azure App Service named App1.

You configure one production slot and four staging slots for App1.

You need to allocate 10 percent of the traffic to each staging slot and 60 percent of the traffic to the production slot.

What should you add to App1?

- A. templates to the Automation script blade
- B. a performance test
- C. a WebJob
- **D. slots to the Testing in production blade**

**Answer: D**

Explanation:

Besides swapping, deployment slots offer another killer feature: testing in production. Just like the name suggests, using this, you can actually test in production. This means that you can route a specific percentage of user traffic to one or more of your deployment slots.

Example:

Reference:

<https://stackify.com/azure-deployment-slots/>

#### NEW QUESTION # 46

You have two Azure subscriptions named Sub1 and Sub2 that contain the virtual networks shown in the following table.

| Name  | Location | Subscription | Contains virtual machine |
|-------|----------|--------------|--------------------------|
| VNet1 | East US  | Sub1         | VM1                      |
| VNet2 | West US  | Sub2         | VM2                      |

You need to ensure that VM1 and VM2 can communicate. The solution must minimize costs and administrative effort. What should you use?

- A. an Azure VPN gateway
- B. a network virtual appliance (NVA)
- C. Azure Route Server
- **D. network peering**
- E. a user-defined route (UDR)

**Answer: D**

Explanation:

You can connect virtual networks to each other with virtual network peering. These virtual networks can be in the same region or different regions (also known as global virtual network peering). Once virtual networks are peered, resources in both virtual networks can communicate with each other over a low-latency, high-bandwidth connection using Microsoft backbone network. Azure Virtual Network is free of charge. Every subscription can create up to 50 virtual networks across all regions.

<https://azure.microsoft.com/en-us/pricing/details/virtual-network/>

<https://learn.microsoft.com/en-us/azure/vpn-gateway/vpn-gateway-about-vpngateways>

#### NEW QUESTION # 47

You have a pay-as-you-go Azure subscription that contains the virtual machines shown in the following table.

| Name | Resource group | Daily cost |
|------|----------------|------------|
| VM1  | RG1            | 20 euros   |
| VM2  | RG2            | 30 euros   |

You create the budget shown in the following exhibit.

### BUDGET SUMMARY

|               |                      |
|---------------|----------------------|
| Name          | Budget1              |
| Scope         | RG1 (Resource group) |
| Filters       | -                    |
| Amount        | 1,000.00 EUR         |
| Budget period | Resets billing month |
| Start date    | 6/20/2019            |
| End date      | 6/19/2021            |

### BUDGET ALERTS

| Alert conditions         | % OF BUDGET       | AMOUNT | ACTION GROUP | ACTION GROUP |
|--------------------------|-------------------|--------|--------------|--------------|
|                          | 50%               | €500   | AG1          | 1 Email      |
|                          | 70%               | €700   | AG2          | 1 SMS        |
|                          | 100%              | €1,000 | AG3          | 1 Azure app  |
| Alert recipients (email) | User1@Contoso.com |        |              |              |

The AG1 action group contains a user named admin@contoso.com only.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

When the maximum amount in Budget1 is reached: [answer choice].

- VM1 and VM2 are turned off
- VM1 and VM2 continue to run
- VM1 is turned off, and VM2 continues to run

Based on the current usage costs of the virtual machines. [answer choice].

- no email notifications will be sent each month
- one email notification will be sent each month
- two email notifications will be sent each month
- three email notifications will be sent each month

**Answer:**
