

AZ-104 Questions Exam & Pass AZ-104 Rate

What's more, part of that Free4Torrent AZ-104 dumps now are free: <https://drive.google.com/open?id=1v3yiCZPbGGKutFaelwaBL1VteCMSgecT>

In this Desktop-based Microsoft AZ-104 practice exam software, you will enjoy the opportunity to self-exam your preparation. The chance to customize the Microsoft AZ-104 practice exams according to the time and types of Microsoft AZ-104 practice test questions will contribute to your ease. This format operates only on Windows-based devices. But what is helpful is that it functions without an active internet connection. It copies the exact pattern and style of the real Microsoft AZ-104 Exam to make your preparation productive and relevant.

Module 1: The Management of Azure Governance and Identities

This section covers the hybrid identity of the Azure. Professionals should learn about how to set up the Active AD Join in a given situation, create groups and users as well as manage their properties, perform the interpretation of the access assignments, and more. After completing the learning track of this module, learners will be able to handle end-to-end management of Azure AD objects along with the RBAC. Notable importance has also been given to Azure subscription management and governance.

Microsoft Azure Administrator Exam Demo - AZ-104 Torrent Vce & Microsoft Azure Administrator Pass Guide

There is no exaggeration that you can be confident about your coming exam just after studying with our AZ-104 preparation questions for 20 to 30 hours. Tens of thousands of our customers have benefited from our AZ-104 Exam Materials and passed their

exams with ease. The data showed that our high pass rate is unbelievably 98% to 100%. Without doubt, your success is 100% guaranteed with our AZ-104 training guide.

Microsoft Azure Administrator Sample Questions (Q805-Q810):

NEW QUESTION # 805

You have an Azure subscription that contains several virtual machines and an Azure Log Analytics workspace named Workspace1. You create a log search query as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

If you run the query on Monday, the query will return the events from the last [answer choice].

The query results will be displayed in a [answer choice].

1 day
7 days
8 days
14 days
21 days

table that has two columns
table that has three columns
graph that has the Computer values on the Y axis
graph that has the avg(CounterValue) values on the Y axis

Answer:

Explanation:

If you run the query on Monday, the query will return the events from the last

The query results will be displayed in a

1 days
7 days
8 days
14 days
21 days

table that has two columns
table that has three columns
graph that has the Computer values on the Y axis
graph that has the avg(CounterValue) values on the Y axis

Box 1: 14 days

Two weeks will be covered.

Note: Startofweek returns the start of the week containing the date, shifted by an offset, if provided.

Start of the week is considered to be a Sunday.

Endofweek returns the end of the week containing the date, shifted by an offset, if provided.

Last day of the week is considered to be a Saturday.

Box 2:

The render operator renders results in as graphical output. Timechart is a Line graph, where the first column is x-axis, and should be datetime. Other columns are y-axes. In this case the Y axis has avg(CounterValue) Values.

NEW QUESTION # 806

You have an Azure subscription that contains the following resources:

- * a virtual network named VNet1
- * a replication policy named ReplPolicy1
- * a Recovery Services vault named Vault1
- * an Azure Storage account named Storage1

You have an Amazon Web Services (AWS) EC2 virtual machine named VM1 that runs Windows Server. You need to migrate VM1 to VNet1 by using Azure Site Recovery.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

- Install Azure Site Recovery Unified Setup.
- Create an Azure Migrate project.
- Enable Windows PowerShell remoting on VM1.
- Deploy an EC2 virtual machine as a configuration server.
- Enable replication for VM1.

Answer:

Explanation:

The screenshot shows the exam interface with the 'Actions' list on the left and the 'Answer Area' on the right. The correct sequence of three actions is highlighted with green boxes in the 'Actions' list and red boxes in the 'Answer Area'. The actions are: 1. Deploy an EC2 virtual machine as a configuration server. 2. Install Azure Site Recovery Unified Setup. 3. Enable replication for VM1. The 'Answer Area' also shows navigation arrows (up and down) to the right of the selected actions.

Explanation:

Step 1: Deploy an EC2 virtual machine as a configuration server

Prepare source include:

Use an EC2 instance that's running Windows Server 2012 R2 to create a configuration server and register it with your recovery vault.

Configure the proxy on the EC2 instance VM you're using as the configuration server so that it can access the service URLs.

Step 2: Install Azure Site Recovery Unified Setup.

Download Microsoft Azure Site Recovery Unified Setup. You can download it to your local machine and then copy it to the VM you're using as the configuration server.

Step 3: Enable replication for VM1.

Enable replication for each VM that you want to migrate. When replication is enabled, Site Recovery automatically installs the Mobility service.

NEW QUESTION # 807

Hotspot Question

You have an Azure AD user named User1 and a read-access geo-redundant storage (RA-GRS) account named contoso2023.

You need to meet the following requirements:

- User1 must be able to write blob data to contoso2023.
- The contoso2023 account must fail over to its secondary endpoint.

Which two settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

IAM to give user the access.

GEO Replication to set the policy.

<https://learn.microsoft.com/en-us/azure/storage/common/storage-initiate-account-failover?tabs=azure-portal#initiate-the-failover>

NEW QUESTION # 808

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the

review screen.

You have an Azure subscription named Subscription1. Subscription1 contains a resource group named RG1.

RG1 contains resources that were deployed by using templates.

You need to view the date and time when the resources were created in RG1.

Solution: From the RG1 blade, you click Automation script.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

From the RG1 blade, click Deployments. You see a history of deployment for the resource group.

NEW QUESTION # 809

You have an Azure Active Directory tenant named Contoso.com that includes following users:

Name	Role
User1	Cloud device administrator
User2	User administrator

Contoso.com includes following Windows 10 devices:

Name	Join type
Device1	Azure AD registered
Device2	Azure AD joined

You create following security groups in Contoso.com:

Name	Join type	Owner
Group1	Assigned	User1
Group2	Dynamic Device	User2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can add Device2 to Group1	☐	☐
User2 can add Device1 to Group1	☐	☐
User2 can add Device2 to Group2	☐	☐

Answer:

Explanation:

The minimum number of copies of the storage account will be [Answer choice]

To reduce the cost of infrequently accessed data in the storage account, you must modify the [Answer choice] setting.

Explanation

Statements	Yes	No
User1 can add Device2 to Group1	☒	☐
User2 can add Device1 to Group1	☐	☒
User2 can add Device2 to Group2	☒	☐

Box 1: Yes

User1 is a Cloud Device Administrator.

Device2 is Azure AD joined.

Group1 has the assigned to join type. User1 is the owner of Group1.

Note: Assigned groups - Manually add users or devices into a static group.

Azure AD joined or hybrid Azure AD joined devices utilize an organizational account in Azure AD Box 2: No User2 is a User Administrator.

Device1 is Azure AD registered.

Group1 has the assigned join type, and the owner is User1.

Note: Azure AD registered devices utilize an account managed by the end user, this account is either a Microsoft account or another locally managed credential.

Box 3: Yes

User2 is a User Administrator.

Device2 is Azure AD joined.

Group2 has the Dynamic Device join type, and the owner is User2.
