With the PDF version, you can access the collection of actual Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) questions with your smart devices like smartphones, tablets, and laptops.

## Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q11-Q16):

### NEW QUESTION # 11

You have an Azure subscription that contains a resource group named RG1. The role assignments for RG1 are shown in the following exhibit.

```
Azure:/
PS Azure:\> Get-AZRoleAssignment -ResourceGroupName RG1 | Where DisplayName -Like 'User*'
| Select DisplayName, RoleDefinitionName
```

DisplayName	RoleDefinitionName
User3	User Access Administrator
User2	Backup Contributor
User1	Contributor
User4	Security Admin

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

<div><div></div><div></div><div></div><div></div></div> <div>User1</div> <div>User2</div> <div>User3</div> <div>User4</div>	can create a Recovery Services vault in RG1
<div><div></div><div></div><div></div><div></div></div> <div>User1</div> <div>User2</div> <div>User3</div> <div>User4</div>	can assign User4 as an owner of RG1

Answer:

Explanation:

<div><div></div><div></div><div></div><div></div></div> <div>User1</div> <div>User2</div> <div>User3</div> <div>User4</div>	can create a Recovery Services vault in RG1
<div><div></div><div></div><div></div><div></div></div> <div>User1</div> <div>User2</div> <div>User3</div> <div>User4</div>	can assign User4 as an owner of RG1

Explanation

Graphical user interface, application, table Description automatically generated

<div><div></div><div></div><div></div><div></div></div> <div>User1</div> <div>User2</div> <div>User3</div> <div>User4</div>	can create a Recovery Services vault in RG1
<div><div></div><div></div><div></div><div></div></div> <div>User1</div> <div>User2</div> <div>User3</div> <div>User4</div>	can assign User4 as an owner of RG1

Box 1: User2

Graphical user interface, application, table Description automatically generated

Management Operation	Minimum Azure role required	Scope Required
Create Recovery Services vault	Backup Contributor	Resource group containing the vault

Note:

Backup Contributor - This role has all permissions to create and manage backup except deleting Recovery Services vault and giving access to others. Imagine this role as admin of backup management who can do every backup management operation.

Box 2: User3

The User Access Administrator role lets you manage user access to Azure resources.

## NEW QUESTION # 12

You have an SAP production landscape that uses SAP HANA databases.

You configure a metric alert for the primary HANA server as shown in the following exhibit.

Statements		Yes	No
HANA Admins will be alerted by email if the server is at 85 percent for one minute, and then lowers to 40 percent.		<input type="radio"/>	<input type="radio"/>
HANA Admins will be alerted if the server is at 95 percent for 15 minutes.		<input type="radio"/>	<input type="radio"/>
Amy@contoso.com will be alerted by email if the server CPU cycles between 80 and 90 percent for 15 minutes.		<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements		Yes	No
HANA Admins will be alerted by email if the server is at 85 percent for one minute, and then lowers to 40 percent.		<input type="radio"/>	<input checked="" type="radio"/>
HANA Admins will be alerted if the server is at 95 percent for 15 minutes.		<input checked="" type="radio"/>	<input type="radio"/>
Amy@contoso.com will be alerted by email if the server CPU cycles between 80 and 90 percent for 15 minutes.		<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Graphical user interface, text, application, email Description automatically generated

Statements	Yes	No
HANA Admins will be alerted by email if the server is at 85 percent for one minute, and then lowers to 40 percent	<input type="radio"/>	<input checked="" type="radio"/>
HANA Admins will be alerted if the server is at 95 percent for 15 minutes	<input checked="" type="radio"/>	<input type="radio"/>
Amy@contoso.com will be alerted by email if the server CPU cycles between 80 and 90 percent for 15 minutes	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: No

The period is 15 minutes. Only alerts or emails will be sent.

Box 2: Yes

Box 3: Yes

### NEW QUESTION # 13

A company named Contoso, Ltd. has users across the globe. Contoso is evaluating whether to migrate SAP to Azure.

The SAP environment runs on SUSE Linux Enterprise Server (SLES) servers and SAP HANA databases. The Suite on HANA database is 4 TB.

You need to recommend a migration solution to migrate SAP application servers and the SAP HANA databases. The solution must minimize downtime.

Which migration solutions should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

SAP application servers:

	▼
AzCopy	
Azure Site Recovery	
SAP HANA system replication	
System Copy for SAP Systems	

SAP HANA databases:

	▼
AzCopy	
Azure Site Recovery	
SAP HANA system replication	
System Copy for SAP Systems	

**Answer:**

Explanation:

Box 1: Azure Site Recovery

Microsoft Azure Site Recovery (ASR) now supports SUSE Linux Enterprise Server 11 SP3/SP4 and SUSE Linux Enterprise Server 12 SP1/SP2/SP3. This is great for customers that are planning to migrate systems to Microsoft Azure or customers who need to have a business continuity strategy for their Azure deployments.

Azure Site Recovery enables SUSE customers to migrate their non-Azure virtual machines or physical servers to Microsoft Azure virtual machines.

Box 2: SAP Hana System replication

#### NEW QUESTION # 14

You have an on-premises third-party enterprise resource planning (ERP) system that uses Microsoft SQL Server 2016. You plan to migrate the ERP system to SAP Business Suite on SAP HANA on Azure virtual machines. You need to identify the appropriate sizing for Business Suite on HANA. What should you use?

- A. SAP Cloud Platform Cockpit
- B. HANA Cockpit
- **C. SAP Quick Sizer for HANA Cloud**
- D. SAP Quick Sizer for HANA

**Answer: C**

Explanation:

If a customer runs non-SAP systems, the only way of Sizing the required Hardware for SAP HANA is the Quick-Sizer tool. HANA-based Cloud Quick Sizer: Please use this version, if the product that you want to size shall run in the Cloud; e.g. SAP S/4HANA Cloud and SAP Data Warehouse Cloud.

<https://www.sap.com/about/benchmark/sizing.html#quick-sizer>

#### NEW QUESTION # 15

You have an Azure subscription. The subscription contains a virtual machine named Server1 that runs Windows Server and hosts SAP Central Services (SCS). To Server1, you deploy the new version of the Azure VM Extension for SAP solutions. You need to validate whether the extension is collecting performance metrics. What should you do on Server1?

- A. Run the Get-AzMetric cmdlet.
- B. From Microsoft Edge, navigate to <http://169.254.169.254/metadata/instance?api-version=2021-02-01>.
- C. Run the Get-AzVMDiagnosticsExtension cmdlet.
- **D. From Microsoft Edge, navigate to <http://127.0.0.1:1812/azure4sap/metrics>.**

**Answer: D**

#### NEW QUESTION # 16

.....
