2025 Die neuesten ZertPruefung AZ-140 PDF-Versionen Prüfungsfragen und AZ-140 Fragen und Antworten sind kostenlos verfügbar: <https://drive.google.com/open?id=1TS8S4wnpjPA0ai-Gq5T08H6qF3fLeXD0>

Wollen Sie gute Leistung in IT-Industrie haben und mehr professioneller anerkannt werden? Melden Sie sich bitte Microsoft AZ-140 IT-Industrie an, um Ihre Fähigkeit zu entwickeln. Wir ZertPruefung helfen Ihnen, den Wunsch zu erfüllen. Hier sind sehr professionelle Kenntnisse und starke Dumps über Microsoft AZ-140 Zertifizierungsprüfung, guten Service, die Ihr besseres Beherrschen der Kenntnisse realisieren und die Microsoft AZ-140 Prüfung leichter bestehen und leichter Ihren Erfolg zu erreichen.

Die Microsoft AZ-140-Prüfung ist eine wertvolle Zertifizierung für IT-Fachkräfte, die ihre Fähigkeiten zur Konfiguration und Betrieben von Microsoft Azure Virtual Desktop nachweisen möchten. Das Bestehen dieser Prüfung erfordert ein gutes Verständnis der Azure -Technologien und -Dienste im Zusammenhang mit AVD -Architektur, Planung, Bereitstellung, Migration, Sicherheit und Management. Mit dieser Zertifizierung können IT -Fachkräfte ihre Karriereaussichten verbessern und Organisationen helfen, ihre azure virtuelle Desktop -Umgebung effektiv zu verwalten.

Durch den Erwerb der Microsoft AZ-140-Zertifizierung zeigt die Kandidaten über die Fähigkeiten und Kenntnisse, die für die Konfiguration und den Betrieb von Azure Virtual Desktop-Umgebungen erforderlich sind. Es bestätigt auch ihr Know-how bei der Verwaltung und Überwachung von virtuellen Desktop -Infrastrukturen in der Cloud. Diese Zertifizierung kann verschiedene Karrieremöglichkeiten für IT -Fachkräfte eröffnen, darunter Cloud -Architekten, virtuelle Desktop -Ingenieure und Cloud -Infrastrukturmanager.

Microsoft AZ-140 Online Tests & AZ-140 Fragen&Antworten

Wenn Sie ZertPruefung wählen, versprechen wir Ihnen eine 100%-Pass-Garantie zur Microsoft AZ-140 Zertifizierungsprüfung. Sonst erstatteten wir Ihnen Ihre an uns geleisteten Zahlung.

Die AZ-140-Zertifizierungsprüfung deckt eine breite Palette von Themen ab, einschließlich der Konfiguration und Verwaltung von virtuellen Desktops, Bereitstellung von Anwendungen, Verwaltung des Benutzerzugriffs, der Überwachung und Fehlerbehebung virtueller Desktop-Infrastrukturen sowie das Sicherungsschützen von Daten und Anwendungen. Die Kandidaten müssen ein starkes Verständnis für Azure -Dienste und -infrastruktur sowie Erfahrung in der Verwaltung von Windows 10- und Windows Server -Betriebssystemen haben. Das Bestehen dieser Prüfung zeigt, dass der Kandidat über die Fähigkeiten und das Wissen verfügt, die für die Bereitstellung und Verwaltung der virtuellen Desktop -Infrastruktur auf Azure erforderlich sind. Dies ist ein wertvolles Gut für Unternehmen, die ihre Desktops und Anwendungen auf die Cloud migrieren möchten.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop AZ-140 Prüfungsfragen mit Lösungen (Q24-Q29):

24. Frage

You have an Azure subscription that contains a virtual machine named VM1. VM1 runs a customized version of Windows 10 Enterprise.

You generalize the operating system on VM1 and shut down the virtual machine.

You need to deploy additional virtual machines based on an image of VM1 by using the Azure portal.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Create an image version.

Create an Azure compute gallery.

Generate a snapshot of VM1.

Create an image definition.

Back up VM1.

>

<

Answer Area

^

v

Antwort:

Begründung:

Actions

Create an image version.

Create an Azure compute gallery.

Generate a snapshot of VM1.

Create an image definition.

Back up VM1.

>

<

Answer Area

Create an Azure compute gallery.

Create an image definition.

Create an image version.

^

v

Explanation:

Actions

Generate a snapshot of VM1.

Back up VM1.

Answer Area

Create an Azure compute gallery.

Create an image definition.

Create an image version.

^

v

25. Frage

You have a Azure Virtual Desktop deployment that contains multiple host pools.

You need to create a PowerShell script to sign users out of a specific session host before you perform a maintenance task.

Which PowerShell module should you load in the script?

- A. Az.DesktopVirtualization
- B. Az.Maintenance
- C. Az.Automation
- D. Az.COMputC

Antwort: A

Begründung:

Topic 1, Litware, Inc

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Litware, Inc. is a pharmaceutical company that has a main office in Boston, United States, and a remote office in Chennai, India.

Existing Environment. Identity Environment

The network contains an on-premises Active Directory domain named litware.com that syncs to an Azure Active Directory (Azure AD) tenant named litware.com.

The Azure AD tenant contains the users shown in the following table.

Name	Description
Admin1	A directory-synced user that is a local administrator on all the computers joined to the on-premises Active Directory domain.
CloudAdmin1	A cloud-only user that is assigned the Global administrator role.

All users are registered for Azure Multi-Factor Authentication (MFA).

Existing Environment. Cloud Services

Litware has a Microsoft 365 E5 subscription associated to the Azure AD tenant. All users are assigned Microsoft 365 Enterprise E5 licenses.

Litware has an Azure subscription associated to the Azure AD tenant. The subscription contains the resources shown in the following table.

Name	Type	Location	Configuration
storage1	Storage account	East US	Storage (general purpose v1), Locally-redundant storage (LRS).
VM1	Virtual machine	East US	Joined to the on-premises Active Directory domain.

Litware uses custom virtual machine images and custom scripts to automatically provision Azure virtual machines and join the virtual machines to the on-premises Active Directory domain.

Network and DNS

The offices connect to each other by using a WAN link. Each office connects directly to the internet.

All DNS queries for internet hosts are resolved by using DNS servers in the Boston office, which point to root servers on the internet. The Chennai office has caching-only DNS servers that forward queries to the DNS servers in the Boston office.

Requirements. Planned Changes

Litware plans to implement the following changes:

Deploy Windows Virtual Desktop environments to the East US Azure region for the users in the Boston office and to the South India Azure region for the users in the Chennai office.

Implement FSLogix profile containers.

Optimize the custom virtual machine images for the Windows Virtual Desktop session hosts.

Use PowerShell to automate the addition of virtual machines to the Windows Virtual Desktop host pools.

Requirements. Performance Requirements

Litware identifies the following performance requirements:

Minimize network latency of the Windows Virtual Desktop connections from the Boston and Chennai offices.

Minimize latency of the Windows Virtual Desktop host authentication in each Azure region.

Minimize how long it takes to sign in to the Windows Virtual Desktop session hosts.

Requirements. Authentication Requirements

Litware identifies the following authentication requirements:

Enforce Azure MFA when accessing Windows Virtual Desktop apps.

Force users to reauthenticate if their Windows Virtual Desktop session lasts more than eight hours.

Requirements. Security Requirements

Litware identifies the following security requirements:

Explicitly allow traffic between the Windows Virtual Desktop session hosts and Microsoft 365.

Explicitly allow traffic between the Windows Virtual Desktop session hosts and the Windows Virtual Desktop infrastructure.

Use built-in groups for delegation.

Delegate the management of app groups to CloudAdmin1, including the ability to publish app groups to users and user groups.

Grant Admin1 permissions to manage workspaces, including listing which apps are assigned to the app groups.
 Minimize administrative effort to manage network security.
 Use the principle of least privilege.
 Requirements. Deployment Requirements
 Litware identifies the following deployment requirements:
 Use PowerShell to generate the token used to add the virtual machines as session hosts to a Windows Virtual Desktop host pool.
 Minimize how long it takes to provision the Windows Virtual Desktop session hosts based on the custom virtual machine images.
 Whenever possible, preinstall agents and apps in the custom virtual machine images.

26. Frage

You need to deploy the session hosts to meet the deployment requirements. Which PowerShell cmdlet should you run first?

- A. Update-AZwvdSessionHost
- B. Set-AzWMADDomainExtension
- C. Get-AzApiManagementSsoToken
- D. New-AzwvdRegistrationInfo

Antwort: D

Begründung:

27. Frage

You have an Azure Virtual Desktop deployment that contains two Azure regions.
 You plan to implement a disaster recovery solution for user profiles. The solution must meet the following requirements:
 * Users must retain their user profiles if a single region fails.
 * Administrative effort must be minimized.
 What should you include in the recommendation?

- A. Azure Site Recovery
- B. Azure Backup
- C. Azure Storage accounts that use zone-redundant storage (ZRS)
- D. FSLogix Cloud Cache
- E. FSLogix with VHDLocations

Antwort: A

28. Frage

You have an Azure subscription that contains the virtual machines shown in the following table.

Name	Resource group	Location
VM1	RG1	West Europe
VM2	RG1	East US
VM3	RG2	West US

You create a shared image gallery as shown in the SharedGallery1 exhibit. (Click the SharedGallery1 tab.)

Microsoft zertpruefung.ch

Create shared image gallery

Validation passed

Basics Tags Review + create

Basics

Subscription	Azure Pass - Sponsorship
Resource group	RG1
Region	West Europe
Name	SharedGallery1
Description	None

You create an image definition as shown in the Image1 exhibit. (Click the Image1 tab.)

Add new image definition to shared image gallery

✓ Validation passed

Basics Version Publishing options Tags Review + create

Basics

Subscription	Azure Pass - Sponsorship
Resource group	RG1
Region	East US
Target shared image gallery	SharedGallery1
Image definition name	Image1
Operating system	Windows
Operating system state	Specialized
Publisher	Contoso
Offer	WindowsServer2019
SKU	Datacenter

Publishing options
