As candidates, the quality must be your first consideration when buying AZ-140 learning materials. We have a professional team to collect the first-hand information for the exam. Our company have reliable channel for collecting AZ-140 learning materials. We can ensure you that AZ-140 exam materials you receive are the latest version. We have strict requirements for the AZ-140 Questions and answers, and the correctness of the answers can be guaranteed. In order to serve our customers better, we offer free update for you, so that you can get the latest version timely.

One of the key benefits of earning the Microsoft AZ-140 certification is that it demonstrates your proficiency in deploying and managing virtual desktop environments using Azure services. This is particularly valuable in today's rapidly evolving business landscape, where remote work and collaboration have become increasingly important. With this certification, you can demonstrate to employers that you have the skills and knowledge needed to successfully deploy and manage virtual desktops in a secure, efficient, and scalable manner.

Preparing for the Microsoft AZ-140 certification exam requires a deep understanding of the Azure Virtual Desktop environment and the ability to apply that knowledge in real-world scenarios. Microsoft offers a range of training courses, study materials, and practice tests to help candidates prepare for the exam. Additionally, candidates can gain hands-on experience by working on real-world projects and practicing with Azure Virtual Desktop in a test environment. With the right preparation and dedication, passing the Microsoft AZ-140 Certification Exam can be a significant achievement in your career.

The AZ-140 exam is ideal for IT professionals who are looking to enhance their skills and knowledge in the field of virtual desktop infrastructure. It is also suitable for individuals who are new to Azure Virtual Desktop and are looking to gain a solid understanding

of the technology and its capabilities.

Free PDF AZ-140 - Configuring and Operating Microsoft Azure Virtual Desktop –Reliable Practice Tests

With AZ-140 study materials, you will have more flexible learning time. With AZ-140 study materials, you can flexibly arrange your study time according to your own life. You don't need to be in a hurry to go to classes after work as the students who take part in a face-to-face class, and you also never have to disrupt your schedule for learning. AZ-140 Study Materials help you not only to avoid all the troubles of learning but also to provide you with higher learning quality than other students'.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q111-Q116):

NEW QUESTION # 111

You have an Azure Virtual Desktop deployment.

You need to recommend a solution to run containerized applications without installing the applications on the session hosts. What should you include in the recommendation?

- A. MSIX app packages
- B. MSI packages
- C. APPX app packages
- D. EXE applications

Answer: A

Explanation:

MSIX is the only supported manner in Azure Virtual Desktop.

NEW QUESTION # 112

-

You have an Azure Virtual Desktop deployment and two Azure Active Directory groups named Group1 and Group2.

You create two Conditional Access policies named Policy1 and Policy2. Policy1 is assigned to Group1.

Policy2 is assigned to Group2. Both policies include Azure Virtual Desktop as a cloud app.

You need to meet the following requirements:

- * The users in Group1 must be prompted for multi-factor authentication (MFA) when they connect to Azure Virtual Desktop.
- * The users in Group2 must reauthenticate every eight hours while they are connected to Azure Virtual Desktop.

Which settings should you configure in Policy1 and Policy2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Policy1:

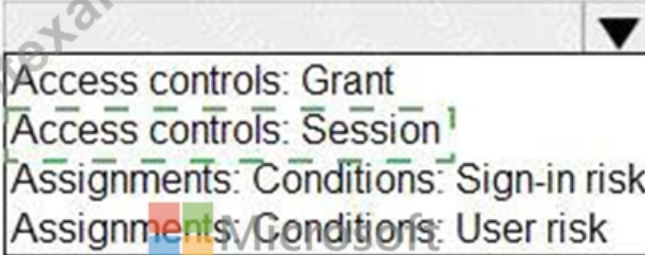

Policy2:

Answer:

Explanation:

Answer Area

Policy1: 
Access controls: Grant
Access controls: Session
Assignments: Conditions: Sign-in risk
Assignments: Conditions: User risk

Policy2: 
Access controls: Grant
Access controls: Session
Assignments: Conditions: Sign-in risk
Assignments: Conditions: User risk

Explanation:

Answer Area

Policy1: 
Access controls: Grant
Access controls: Session
Assignments: Conditions: Sign-in risk
Assignments: Conditions: User risk

Policy2: 
Access controls: Grant
Access controls: Session
Assignments: Conditions: Sign-in risk
Assignments: Conditions: User risk

NEW QUESTION # 113

You have the devices shown in the following table.

 Name	Operating system
Device1	Windows 10 Home
Device2	Windows 8.1 Professional
Device3	Windows 10 IoT Enterprise

You plan to deploy Windows Virtual Desktop for client access to remove virtualized apps. Which devices support the Remote Desktop client?

- A. Device1, Device2, and Device3
- **B. Device1 and Device3 only**
- C. Device1 only
- D. Device1 and Device2 only

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows-server/remote/remote-desktop-services/clients/windowsdesktop>

NEW QUESTION # 114

You have a Windows Virtual Desktop deployment.

You plan to create the host pools shown in the following table.

Name	Requirement
Pool1	• Will be directly assigned to users in the graphics department at your company • Will run heavy graphic rendering and compute-intensive applications • Must support premium storage
Pool2	• Pooled virtual machines for approximately 10 users • Will run Microsoft Office 365 apps • Will require calling and meeting features in Microsoft Teams • Must support premium storage

You need to recommend the virtual machine size for each host pool. The solution must minimize costs.

Which size should you recommend for each pool? To answer, select the appropriate options in the answer area.

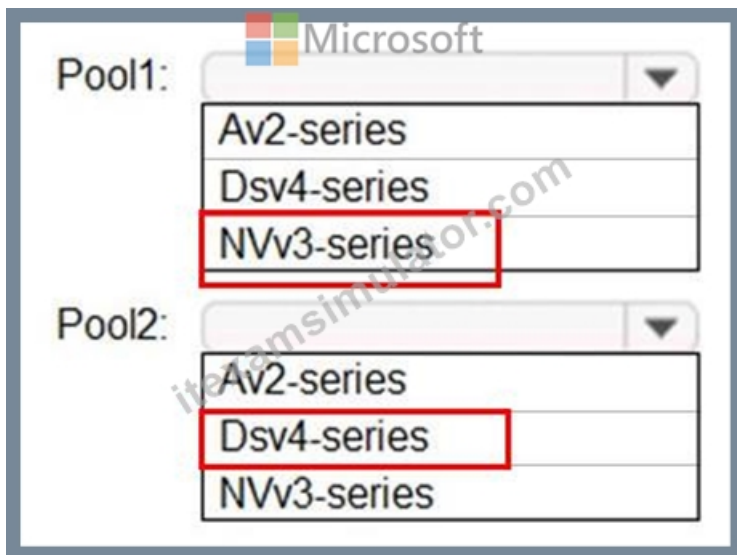

NOTE: Each correct selection is worth one point.

Pool1:

Pool2:

Answer:

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-machines/sizes>

<https://docs.microsoft.com/en-us/azure/virtual-machines/nv3-series>

<https://docs.microsoft.com/en-us/azure/virtual-machines/dv4-dsv4-series>

NEW QUESTION # 115

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have the following:

A Microsoft 365 E5 tenant

An on-premises Active Directory domain

A hybrid Azure Active Directory (Azure AD) tenant

An Azure Active Directory Domain Services (Azure AD DS) managed domain

An Azure Virtual Desktop deployment

The Azure Virtual Desktop deployment contains personal desktops that are hybrid joined to the on-premises domain and enrolled in Microsoft Intune.

You need to configure the security settings for the Microsoft Edge browsers on the personal desktops.

Solution: You configure a configuration profile in Intune.

Does this meet the goal?

- A. No
- B. Yes

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/fundamentals/azure-virtual-desktop>

NEW QUESTION # 116

.....
