

AZ-305 Latest Training 100% Pass | High Pass-Rate Valid AZ-305 Practice Questions: Designing Microsoft Azure Infrastructure Solutions

P.S. Free & New AZ-305 dumps are available on Google Drive shared by Lead2Passed: https://drive.google.com/open?id=1gGqtaaqJYmnpSIYmjnFrz_yHSREs2MDD

Our AZ-305 practice tests have established impressive recognition throughout the industry, diversified modes of learning enables the AZ-305 exam candidates to capture at the real exam scenario. Tremendous quality of our AZ-305 products makes the admirable among the professionals. Our practice tests are on demand, attending the needs of AZ-305 Exams more comprehensively and dynamically as well. Lift up your learning tendency with Lead2Passed practice tests training. Conceptual understanding matters the most for your success, technical excellence is certain with Lead2Passed training as our experts keep it on high priority.

The Microsoft AZ-305 exam covers a wide range of topics related to Azure infrastructure solutions, including designing compute solutions, designing storage solutions, designing networking solutions, and designing security solutions. Candidates will also be tested on their ability to manage and monitor Azure resources, as well as their knowledge of Azure tools and services.

Microsoft AZ-305 exam is designed for IT professionals who are interested in designing solutions on Microsoft Azure. AZ-305 Exam measures the candidates' knowledge and skills in designing, implementing, and monitoring Microsoft Azure infrastructure solutions. AZ-305 exam tests the candidates on their ability to design solutions for compute, storage, networking, security, and monitoring on the Azure platform.

100% Pass Quiz Efficient AZ-305 - Designing Microsoft Azure Infrastructure Solutions Latest Training

Our Lead2Passed AZ-305 certification exam information is suitable for all IT certification AZ-305 exam. Its usability is fit for various fields of IT. Lead2Passed's AZ-305 exam certification training materials is worked out by senior IT specialist team through their own exploration and continuous practice. Its authority is undoubted. If there is any quality problem of AZ-305 Exam Dumps and answers you buy or you fail AZ-305 certification exam, we will give full refund unconditionally.

Microsoft AZ-305 Exam is a great way for IT professionals to validate their skills in designing and implementing solutions on Microsoft Azure. Designing Microsoft Azure Infrastructure Solutions certification can help individuals gain recognition in the industry and demonstrate their expertise in Azure infrastructure solutions. Moreover, this certification can help professionals advance their careers and open up new job opportunities.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q415-Q420):

NEW QUESTION # 415

You have an Azure subscription. The subscription contains an Azure SQL managed instance that stores employee details, including social security numbers and phone numbers.

You need to configure the managed instance to meet the following requirements:

- * The helpdesk team must see only the last four digits of an employee's phone number.
- * Cloud administrators must be prevented from seeing the employee's social security numbers.

What should you enable for each column in the managed instance? To answer select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Phone numbers: Social security numbers: **NEW QUESTION # 416**

You need to ensure that users managing the production environment are registered for Azure MFA and must authenticate by using Azure MFA when they sign in to the Azure portal. The solution must meet the authentication and authorization requirements.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To register the users for Azure MFA, use:

- ☐ Azure AD Identity Protection
- ☐ Security defaults in Azure AD
- ☐ Per-user MFA in the MFA management UI

To enforce Azure MFA authentication, configure:

- ☐ Grant control in capolicy1
- ☐ Session control in capolicy1
- ☐ Sign-in risk policy in Azure AD Identity Protection for the Litware.com tenant

Answer:

Explanation:

To register the users for Azure MFA, use:

- ☒ Azure AD Identity Protection
- ☐ Security defaults in Azure AD
- ☐ Per-user MFA in the MFA management UI

To enforce Azure MFA authentication, configure:

- ☒ Grant control in capolicy1
- ☒ Session control in capolicy1
- ☒ Sign-in risk policy in Azure AD Identity Protection for the Litware.com tenant

Explanation

Graphical user interface, text, application Description automatically generated

To register the users for Azure MFA, use:

- ☒ Azure AD Identity Protection
- ☐ Security defaults in Azure AD
- ☐ Per-user MFA in the MFA management UI

To enforce Azure MFA authentication, configure:

- ☒ Grant control in capolicy1
- ☒ Session control in capolicy1
- ☒ Sign-in risk policy in Azure AD Identity Protection for the Litware.com tenant

Box 1: Azure AD Identity Protection

Azure AD Identity Protection helps you manage the roll-out of Azure AD Multi-Factor Authentication (MFA) registration by configuring a Conditional Access policy to require MFA registration no matter what modern authentication app you are signing in to. Scenario: Users that manage the production environment by using the Azure portal must connect from a hybrid Azure AD-joined device and authenticate by using Azure Multi-Factor Authentication (MFA).

Box 2: Sign-in risk policy...

Scenario: The Litware.com tenant has a conditional access policy named capolicy1. Capolicy1 requires that when users manage the Azure subscription for a production environment by using the Azure portal, they must connect from a hybrid Azure AD-joined device.

Identity Protection policies we have two risk policies that we can enable in our directory.

- * Sign-in risk policy

- * User risk policy

<https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/howto-identity-protection-configure-r>

NEW QUESTION # 417

You have an Azure subscription that contains a virtual network named VNET1 and 10 virtual machines. The virtual machines are connected to VNET1.

You need to design a solution to manage the virtual machines from the internet. The solution must meet the following requirements:

- * Incoming connections to the virtual machines must be authenticated by using Azure Multi-Factor Authentication (MFA) before network connectivity is allowed.

- * Incoming connections must use TLS and connect to TCP port 443.

- * The solution must support RDP and SSH.

What should you Include In the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

To provide access to virtual machines on VNET1, use:

- Azure Bastion
- Just-in-time (JIT) VM access
- Azure Web Application Firewall (WAF) in Azure Front Door

To enforce Azure MFA, use:

- An Azure Identity Governance access package
- A Conditional Access policy that has the Cloud apps assignment set to Azure Windows VM Sign-In
- A Conditional Access policy that has the Cloud apps assignment set to Microsoft Azure Management

Answer:

Explanation:

Answer Area

To provide access to virtual machines on VNET1, use:

- Azure Bastion
- Just-in-time (JIT) VM access
- Azure Web Application Firewall (WAF) in Azure Front Door

To enforce Azure MFA, use:

- An Azure Identity Governance access package
- A Conditional Access policy that has the Cloud apps assignment set to Azure Windows VM Sign-In
- A Conditional Access policy that has the Cloud apps assignment set to Microsoft Azure Management

Explanation

To provide access to virtual machines on VNET1, use: Just-in-time (JIT) VM access

To enforce Azure MFA, use: An Azure Identity Governance access package

NEW QUESTION # 418

Your company has the divisions shown in the following table.

Division	Azure subscription	Azure Active Directory (Azure AD) tenant
East	Sub1, Sub2	East.contoso.com
West	Sub3, Sub4	West.contoso.com

You plan to deploy a custom application to each subscription. The application will contain the following:

- A resource group

- An Azure web app

Custom role assignments

An Azure Cosmos DB account

You need to use Azure Blueprints to deploy the application to each subscription.

What is the minimum number of objects required to deploy the application? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Management groups:

Blueprint definitions:

 Microsoft

Blueprint assignments:

Answer:

Explanation:

Management groups:

Blueprint definitions:

 Microsoft

Blueprint assignments:

NEW QUESTION # 419

You are evaluating the components of the migration to Azure that require you to provision an Azure Storage account.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You must provision an Azure Storage account for the SQL Server database migration.	☐	☐
You must provision an Azure Storage account for the Web site content storage.	☐	☐
You must provision an Azure Storage account for the Database metric monitoring.	☐	☐

Answer:

Explanation:

Statements	Yes	No
You must provision an Azure Storage account for the SQL Server database migration.	☒	☐
You must provision an Azure Storage account for the Web site content storage.	☐	☒
You must provision an Azure Storage account for the Database metric monitoring.	☒	☐
