

AZ-700 Reliable Test Forum - AZ-700 Latest Materials

What's more, part of that PDF4Test AZ-700 dumps now are free: <https://drive.google.com/open?id=1XBCgB1h-RwbSqisOwLpSrfp60HEY52Xe>

Almost every Designing and Implementing Microsoft Azure Networking Solutions (AZ-700) test candidate nowadays is confused about the Designing and Implementing Microsoft Azure Networking Solutions (AZ-700) study material. They don't know where to download updated AZ-700 questions that can help them prepare quickly for the Designing and Implementing Microsoft Azure Networking Solutions (AZ-700) test. Some rely on outdated Designing and Implementing Microsoft Azure Networking Solutions (AZ-700) questions and suffer from the loss of money and time.

Passing the Microsoft AZ-700 Exam is also beneficial for individuals who are seeking to advance their careers in the cloud computing industry. Designing and Implementing Microsoft Azure Networking Solutions certification demonstrates that the individuals have a deep understanding of Azure networking solutions, which is a valuable skill in the current job market. It also helps the individuals to stand out from other candidates and increase their chances of getting hired.

Free PDF Quiz Microsoft - AZ-700 Perfect Reliable Test Forum

Regarding the process of globalization, every fighter who seeks a better life needs to keep pace with its tendency to meet challenges. AZ-700 certification is a stepping stone for you to stand out from the crowd. The AZ-700 exam guide function as a time-counter, and you can set fixed time to fulfill your task, so that promote your efficiency in real test. The key strong-point of our AZ-700 Test Guide is that we impart more important knowledge with fewer questions and answers, with those easily understandable AZ-700 study braindumps, you will find more interests in them and experience an easy learning process.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q254-Q259):

NEW QUESTION # 254

You have an Azure subscription that contains the resources shown in the following table.

Name	Type	Description
App1	Azure App Service	A web app includes an SSL certificate that has a subject name of *.contoso.com
Gateway1	Azure Application Gateway	

Gateway1

provides access to App1 by using a URL of `http://app1.contoso.com`.

You create a new web app named App2.

You need to configure Gateway1 to enable minimize administrative effort.
What should you configure on Gateway1?

- A. a backend pool and a routing
- **B. a listener and a routing rule**
- C. a listener, a backend pool, and a rule
- D. a listener and a backend pool

Answer: B

NEW QUESTION # 255

You have an Azure subscription that contains the resources shown in the following table.

Name	Type	Description
VWAN1	Azure Virtual WAN	Standard Virtual WAN
Hub1	Azure Virtual WAN hub	Hub for VWAN1
VNet1	Virtual network	Connected to Hub1
VNet2	Virtual network	Connected to Hub1
VNet3	Virtual network	Peered with VNet2
NVA1	Virtual machine	Hosts a routing appliance deployed to VNet2

You establish BGP peering between NVA1 and Hub1.

You need to implement transit connectivity between VNet1 and VNet3 via Hub1 by using BGP peering. The solution must minimize costs.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

On Hub1, propagate routes from connections to VNet1 and VNet2 to:

- ☐ A custom route table and associate the routes with the same custom route table
- ☐ A custom route table and associate the routes with the defaultRouteTable
- ☒ A custom route table and associate the routes with the same custom route table
- ☐ The defaultRouteTable and associate the routes with the defaultRouteTable

On VNet3, implement:

- ☐ User-defined routes
- ☐ Azure Route Server on a dedicated subnet
- ☐ Azure VPN Gateway on a dedicated subnet
- ☒ User-defined routes

Answer:

Explanation:

Answer Area

On Hub1, propagate routes from connections to VNet1 and VNet2 to:

- ☐ A custom route table and associate the routes with the same custom route table
- ☐ A custom route table and associate the routes with the defaultRouteTable
- ☒ A custom route table and associate the routes with the same custom route table
- ☐ The defaultRouteTable and associate the routes with the defaultRouteTable

On VNet3, implement:

- ☐ User-defined routes
- ☐ Azure Route Server on a dedicated subnet
- ☐ Azure VPN Gateway on a dedicated subnet
- ☒ User-defined routes

Explanation:

Answer Area

On Hub1, propagate routes from connections to VNet1 and VNet2 to:

- ☒ A custom route table and associate the routes with the same custom route table

On VNet3, implement:

- ☒ User-defined routes

NEW QUESTION # 256

You have the Azure firewall shown in the following exhibit.

Firewall1

Firewall

» Delete Lock

Visit Azure Firewall Manager to configure and manage this firewall. →

Essentials

-

Management public IP
-

Private IP Ranges
Managed by Firewall Policy

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

On Firewall1, forced tunneling [answer choice].

On Firewall1, management by Azure Firewall Manager [answer choice].

Answer:

Explanation:
Answer Area

On Firewall1, forced tunneling [answer choice].

On Firewall1, management by Azure Firewall Manager [answer choice].

NEW QUESTION # 257

You have an Azure subscription that contains an app named App1. App1 is deployed to the Azure App Service apps show in the following table.

Name	Location	Worker instances
App1-East	East US 1	4
App1-West	West US 1	4

You need to publish App1 by using Azure Front Door. The solution must ensure that all the requests to App1 are load balanced between all the available worker instances.

What is the minimum number of origin groups and origins that you should configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Origin groups:

Origins:

Answer:

Explanation:

Answer Area

Origin groups:

Origins:

NEW QUESTION # 258

You are implementing the Virtual network requirements for Vnet6.

What is the minimum number of subnets and service endpoints you should create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Subnets:

Service endpoints:

- A. 2,4

Answer: A

NEW QUESTION # 259

.....

Only to find a way to success, not to make excuses for failure. PDF4Test's AZ-700 exam certification training materials include AZ-
