If you buy online classes, you will need to sit in front of your computer on time at the required time; if you participate in offline counseling, you may need to take an hour or two of a bus to attend class. But if you buy AZ-800 test guide, things will become completely different. Unlike other learning materials on the market, AZ-800 torrent prep has an APP version. You can download our app on your mobile phone. And then, you can learn anytime, anywhere. Whatever where you are, whatever what time it is, just an electronic device, you can do exercises. With AZ-800 Torrent prep, you no longer have to put down the important tasks at hand in order to get to class; with AZ-800 exam questions, you don't have to give up an appointment for study.

To be eligible for the AZ-800 Exam, candidates should have a solid understanding of Windows Server technologies, as well as experience managing hybrid cloud environments. They should also have experience with Azure services, including Azure Active Directory, Azure Virtual Machines, and Azure Storage. Microsoft recommends that candidates have at least one year of experience managing Windows Server environments, including experience with Windows Server 2016 or later.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q209-Q214):

NEW QUESTION # 209

You have an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure Active Directory (Azure AD) tenant. You have an on-premises web app named WebApp1 that only supports Kerberos authentication.

You need to ensure that users can access WebApp1 by using their Azure AD account. The solution must minimize administrative effort.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

In Azure AD:

- The Azure AD Application Proxy connector
- The Azure AD Application Proxy service
- Web Application Proxy

On-premises:

- The Azure AD Application Proxy connector
- The Azure AD Application Proxy service
- Web Application Proxy

Answer:

Explanation:

Answer Area

In Azure AD:

- The Azure AD Application Proxy connector
- The Azure AD Application Proxy service
- Web Application Proxy

On-premises:

- The Azure AD Application Proxy connector
- The Azure AD Application Proxy service
- Web Application Proxy

NEW QUESTION # 210

Your network contains an Active Directory domain, a web app named App1, and a perimeter network. The perimeter network contains a server named Server1 that runs Windows Server.

You plan to provide external access to App1.

You need to implement the Web Application Proxy role service on Server1.

Which role should you add to Server1, and which role should you add to the network? To answer, drag the appropriate roles to the correct targets. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Roles

- Active Directory Certificate Services
- Active Directory Federation Services
- Active Directory Federation Services
- Network Policy and Access Services
- Remote Access

Role on Server1:

Role on the network:

Answer:

Explanation:

NEW QUESTION # 211

Your network contains a multi-site Active Directory Domain Services (AD DS) forest. Each Active Directory site is connected by using manually configured site links and automatically generated connections.

You need to minimize the latency for changes to Active Directory.

What should you do?

- A. For each site link, modify the options attribute.
- B. For each site link, modify the site link costs.
- C. For each site link, modify the replication schedule.
- D. Create a site link bridge that contains all the site links.

Answer: A

Explanation:

When you configure manual site link replication schedule is already setup to 15 minute replication cycle you can not lower more down. So only option left is to change link site option attribute for use notify setting.

NEW QUESTION # 212

You have a server named Server1 that runs Windows Server and has the Active Directory Federation Services role installed.

You plan to deploy Web Application Proxy to a server named Server2.

You export the Active Directory Federation Services (AD FS) certificate from Server1.

Which actions should you perform on Server2 in sequence? To answer, drag the appropriate actions to the correct order. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. **NOTE:** Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 213

You have a server that runs Windows Server and has the DHCP Server role installed. The server has a scope named Scope1 that has the following configurations:

Address range: 192.168.0.2 to 192.168.1.254

Mask: 255.255.254.0

Router: 192.168.0.1

Lease duration: 3 days

DNS server: 172.16.0.254

You have 50 Microsoft Teams Phone devices from the same vendor. All the devices have MAC addresses within the same range.

You need to ensure that all the Teams Phone devices that receive a lease from Scope1 have IP addresses in the range of 192.168.1.100 to 192.168.1.200. The solution must NOT affect other DHCP clients that receive IP configurations from Scope1.

What should you create?

- A. a scope
- B. scope options
- C. a policy
- D. a filter

Answer: C
