

AZ-801 Exam Questions Vce, AZ-801 Reliable Test Labs

P.S. Free & New AZ-801 dumps are available on Google Drive shared by Prep4sureGuide: https://drive.google.com/open?id=1jwZl2VKje1W6hUA-K81pak_8acG9rewP

We provide 24-hour online service for all customers who have purchased AZ-801 test guide. You can send us an email to ask questions at anytime, anywhere. For any questions you may have during the use of AZ-801 exam questions, our customer service staff will be patient to help you to solve them. At the same time, if you have problems with downloading and installing, Configuring Windows Server Hybrid Advanced Services torrent prep also has dedicated staff that can provide you with remote online guidance. In order to allow you to use our products with confidence, AZ-801 Test Guide provide you with a 100% pass rate guarantee. Once you unfortunately fail the exam, we will give you a full refund, and our refund process is very simple.

Microsoft AZ-801 Exam is designed for IT professionals who have experience in configuring advanced Windows Server Hybrid services. AZ-801 exam is a part of the Microsoft Certified: Azure Solutions Architect Expert certification path. It is an advanced-level exam that validates the candidates' skills in designing, implementing, and managing Windows Server Hybrid solutions. AZ-801 exam measures the candidates' knowledge in various areas such as Azure Active Directory, hybrid networking, hybrid storage, and hybrid virtualization.

Microsoft AZ-801 exam is part of the Microsoft Certified: Azure Solutions Architect Expert certification path. Configuring Windows Server Hybrid Advanced Services certification is intended for professionals who have advanced experience and knowledge of IT operations, including networking, virtualization, identity management, security, business continuity, disaster recovery, data platform, budgeting, and governance. Configuring Windows Server Hybrid Advanced Services certification validates the ability to design, implement, and manage solutions that leverage Microsoft Azure services and technologies.

AZ-801 Reliable Test Labs - Test AZ-801 Result

One of the great features of our AZ-801 training material is our AZ-801 pdf questions. AZ-801 exam questions allow you to prepare for the real AZ-801 exam and will help you with the self-assessment. You can easily pass the Microsoft AZ-801 exam by using AZ-801 dumps pdf. Moreover, you will get all the updated AZ-801 Questions with verified answers. If you want to prepare yourself for the real Configuring Windows Server Hybrid Advanced Services exam, then it is one of the most important ways to improve your AZ-801 preparation level. We provide 100% money back guarantee on all AZ-801 braindumps products.

Microsoft Configuring Windows Server Hybrid Advanced Services Sample Questions (Q239-Q244):

NEW QUESTION # 239

Your network contains an Active Directory domain. The domain contains a domain controller named DC1 and a server named Server1 that runs Windows Server.

You need to enable event log subscriptions to forward events from DC1 to Server1.

Which command should you run to enable the Windows Event Collector service, and on which servers should you run the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Command:

Servers:

Microsoft

Answer:

Explanation:

Answer Area

Command:

Servers:

Microsoft

Explanation:

Answer Area

Command:

Servers:

Microsoft

NEW QUESTION # 240

You need to configure BitLocker on Server4.

On which volumes can you turn on BitLocker, and on which volumes can you turn on auto-unlock? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

BitLocker:

Auto-unlock:

Answer:

Explanation:

BitLocker:

D only
C and D only
D, E, and F only
C, D, E, and F

Auto-unlock:

D only
C and D only
D, E, and F only
C, D, E, and F

Topic 2, Fabrikam inc

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Fabrikam, Inc. is a manufacturing company that has a main office in Chicago and a branch office in Paris.

Existing Environment

Identity Infrastructure

Fabrikam has an Active Directory Domain Services (AD DS) forest that syncs with an Azure Active Directory (Azure AD) tenant.

The AD DS forest contains two domains named corp.fabrikam.com and europe.fabrikam.com.

Chicago Office On-Premises Servers

The office in Chicago contains on-premises servers that run Windows Server 2016 as shown in the following table.

Name	Type	Configuration
HV1	Physical	Hyper-V host
HV2	Physical	Hyper-V host
APP1	Virtual machine	Application server
APP2	Virtual machine	Application server
APP3	Virtual machine	Application server
APP4	Virtual machine	Application server
DC1	Virtual machine	Domain controller
Archive1	Physical	File server
DHCP1	Virtual machine	DHCP server
Fileserver1	Virtual machine	File server
WEB1	Virtual machine	Web server
WEB2	Virtual machine	Web server
AADCT1	Virtual machine	Azure AD Connect

All the servers in the Chicago office are in the corp.fabrikam.com domain.

All the virtual machines in the Chicago office are hosted on HV1 and HV2. HV1 and HV2 are nodes in a failover cluster named Cluster1.

WEB1 and WEB2 run an Internet Information Services (IIS) website. Internet users connect to the website by using a URL of <https://www.fabrikam.com>.

All the users in the Chicago office run an application that connects to a UNC path of \\Fileserver1\Data.

Paris On-Premises Servers

The office in Paris contains a physical server named dc2.europe.fabrikam.com that runs Windows Server 2016 and is a domain controller for the europe.fabrikam.com domain.

Network Infrastructure

The networks in both the Chicago and Paris offices have local internet connections. The Chicago and Paris offices are connected by using VPN connections.

The client computers in the Chicago office get IP addresses from DHCP1.

Security Risks

Fabrikam identifies the following security risks:

Some accounts connect to AD DS resources by using insecure protocols such as NTLMv1, SMB1, and unsigned LDAP.

Servers have Windows Defender Firewall enabled. Server administrators sometimes modify firewall rules and allow risky connections.

Requirements

Security Requirements

Fabrikam identifies the following security requirements:

Prevent server administrators from configuring Windows Defender Firewalls rules.

Encrypt all the data disks on the servers by using BitLocker Drive Encryption (BitLocker).

Ensure that only authorized applications can be installed or run on the servers in the forest.

Implement Microsoft Sentinel as a reporting solution to identify all connections to the domain controllers that use insecure protocols.

On-Premises Migration Plan

Fabrikam plans to migrate all the existing servers and identifies the following migration requirements:

Move the APP1 and APP2 virtual machines in the Chicago office to a new Hyper-V failover cluster named Cluster2 that will run Windows Server 2022.

Cluster2 will contain two new nodes named HV3 and HV4.

All virtual machine files will be stored on a Cluster Shared Volume (CSV).

Migrate Archive1 to a new failover cluster named Cluster3 that will run Windows Server 2022.

Cluster3 will contain two physical nodes named Node1 and Node2.

The file shares on Cluster3 will be a failover cluster role in active-passive mode.

Migrate all users, groups, and client computers from europe.fabrikam.com to corp.fabrikam.com.

The migration will be performed by using the Active Directory Migration Tool (ADMT).

A computer named ADMTcomputer will be deployed to the corp.fabrikam.com domain to run ADMT migration procedures.

User accounts will retain their existing password.

Migrate the data share from Fileserver1 to a new server named Fileserver2 that will run Windows Server 2022. After the migration, the data share must be accessible by using the existing UNC path.

Azure Migration Plan

Fabrikam plans to migrate some resources to Azure and identifies the following migration requirements:

Create an Azure subscription named Sub1.

Create an Azure virtual network named Vnet1.

Use ExpressRoute to connect the Paris and Chicago offices to Vnet1.

License all servers for Microsoft Defender for servers.

Migrate APP3 and APP4 to Azure.

Migrate the www.fabrikam.com website to an Azure App Service web app named WebApp1.

Decommission WEB1 and WEB2.

DHCP Migration Plan

Fabrikam plans to replace DHCP1 with a new server named DHCP2 and identifies the following migration requirements:

Ensure that DHCP2 provides the same IP addresses that are currently available from DHCP1.

Prevent DHCP1 from servicing clients once services are enabled on DHCP2.

Ensure that the existing leases and reservations are migrated.

NEW QUESTION # 241

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the

review screen.

You have a failover cluster named Cluster1 that hosts an application named App1.

The General tab in App1 Properties is shown in the General exhibit. (Click the General tab.)

The Failover tab in App1 Properties is shown in the Failover exhibit. (Click the Failover tab.)

Server1 shuts down unexpectedly.

You need to ensure that when you start Server1, App1 continues to run on Server2.

Solution: From the Failover settings, you select Prevent fallback.

Does this meet the goal?

- A. No
- B. Yes

Answer: B

Explanation:

Explanation

The Prevent fallback setting will prevent the cluster failing back to Server1.

NEW QUESTION # 242

You have an Azure subscription that contains an Azure key vault named Vault1.
 You plan to deploy a virtual machine named VM1 that will run Windows Server.
 You need to enable encryption at host for VM1. The solution must use customer-managed keys.
 Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows the 'Actions' list on the left and the 'Answer Area' on the right. The 'Actions' list contains five items: 'Create VM1 and associate the disks of the virtual machine with the disk encryption set.', 'Assign the Virtual Machine Contributor role to the system-assigned managed identity of VM1.', 'Enable a system-assigned managed identity on VM1.', 'Create a disk encryption set and generate RSA keys.', and 'Grant Vault1 the managed identity permission for the disk encryption set.'. The 'Answer Area' is currently empty with up and down arrow buttons.

Answer:

Explanation:

This screenshot shows the 'Answer Area' populated with three actions in a specific sequence, indicated by a dashed red box and numbered arrows. The actions are: 1. 'Enable a system-assigned managed identity on VM1.', 2. 'Create a disk encryption set and generate RSA keys.', and 3. 'Grant Vault1 the managed identity permission for the disk encryption set.'. The 'Actions' list on the left remains the same.

Explanation

This screenshot shows the final state of the 'Answer Area' with the three actions correctly ordered and numbered 1, 2, and 3. The actions are: 1. 'Enable a system-assigned managed identity on VM1.', 2. 'Create a disk encryption set and generate RSA keys.', and 3. 'Grant Vault1 the managed identity permission for the disk encryption set.'. The 'Actions' list on the left is also visible.

NEW QUESTION # 243

You have an Azure subscription. The subscription contains a virtual machine named Server1 that run Windows Server.
 You create a new Log Analytics workspace named Workspace1. You need to collect performance metrics for Server1 by using Azure Monitor. What should you do next?

- A. Server1 that runs Windows Server.
- **B. Create a data collection rule (DCR).**
- C. Deploy and configure Windows Event Forwarding.
- D. Install the Azure Connected Machine agent.
- E. Regenerate the secondary key.

Answer: B

NEW QUESTION # 244

.....

Microsoft AZ-801 pdf dumps format contains actual AZ-801 exam questions. With Microsoft AZ-801 pdf questions you don't have to spend a lot of time on Configuring Windows Server Hybrid Advanced Services Networking Solutions AZ-801 exam preparation. You just go through and memorize these real AZ-801 exam questions. Prep4sureGuide has designed this set of valid Microsoft Exam Questions with the assistance of highly qualified professionals. Preparing with these AZ-801 Exam Questions is enough to get success on the first try. However, this format of Prep4sureGuide AZ-801 exam preparation material is best for those who are too much busy in their life and don't have enough time to prepare for Microsoft AZ-801 exam.
