100% Pass 2025 AZ-801: Configuring Windows Server Hybrid Advanced Services Accurate Valid Test Sample

People from all walks of life all work hard for the future. You must work hard to upgrade your IT skills. Then, do you have obtained Microsoft AZ-801 certificate which is very popular? How much do you know about AZ-801 test? If you want to pass AZ-801 exam without enough exam related knowledge, how should you do? But don't you worry: ValidDumps will give assistance to you.

A guide about the passing score of the Microsoft AZ-801 Exam, duration of the exam, how many questions and exam format

- Number of Questions: 40-60
- Time Duration: 50 minutes
- The passing score: 75%
- Languages: English

Microsoft AZ-801 (Configuring Windows Server Hybrid Advanced Services) Certification Exam is an advanced-level exam designed to evaluate the candidate's knowledge and skills in configuring and managing hybrid environments with Windows Server. AZ-801 Exam is intended for IT professionals who have experience in managing Windows Server and Azure services and want to advance their careers in cloud computing.

Microsoft Configuring Windows Server Hybrid Advanced Services Sample Questions (Q47-Q52):

NEW QUESTION # 47

You need to implement alerts for the domain controllers. The solution must meet the technical requirements.

What should you do on the domain controllers, and what should you create on Azure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

On the domain controllers:

Create a Data Collector Set in Performance Monitor.
Modify the Performance Monitor Users group.
Install the Azure Monitor agent.

In Azure:

Create an Azure SQL database.
Create a Storage Sync Service.
Create an Azure Log Analytics workspace.
Create an Azure Storage account.

Answer:

Explanation:

On the domain controllers:

Create a Data Collector Set in Performance Monitor.
Modify the Performance Monitor Users group.
Install the Azure Monitor agent.

In Azure:

Create an Azure SQL database.
Create a Storage Sync Service.
Create an Azure Log Analytics workspace.
Create an Azure Storage account.

NEW QUESTION # 48

Your network contains an Active Directory Domain Services (AD DS) domain that has the Active Directory Recycle Bin enabled.

All domain controllers are backed up daily.

You accidentally remove all the users from a domain group.

You need to get a list of the users that were previously in the group.

Which four actions should you perform in sequence from a domain controller? To answer, move the appropriate actions from the list

of actions to the answer area and arrange them in the correct order.

action

Mount Active Directory to port 51389.

View the membership of the group.

Restore the system state to an alternate location.

From the Deleted Objects container in Active Directory Administrative Center, run the Restore task.

From Active Directory Users and Computers, change the domain controller to localhost:51389.

Restore the group from the Active Directory Recycle Bin.

Answer Area

Answer:

Explanation:

Action	Answer Area
Mount Active Directory to port 51389.	Restore the system state to an alternate location.
View the membership of the group.	Mount Active Directory to port 51389.
Restore the system state to an alternate location.	From Active Directory Users and Computers, change the domain controller to localhost:51389.
From the Deleted Objects container in Active Directory Administrative Center, run the Restore task.	View the membership of the group.
From Active Directory Users and Computers, change the domain controller to localhost:51389.	
Restore the group from the Active Directory Recycle Bin.	

Explanation:

Restore the system state to an alternate location.
Mount Active Directory to port 51389.
From Active Directory Users and Computers, change the domain controller to localhost:51389.
View the membership of the group.

NEW QUESTION # 49

Your network contains an Active Directory Domain Services (AD DS) domain that has the Active Directory Recycle Bin enabled. The domain contains two domain controllers named DC1 and DC2. The system state of the domain controllers is backed up daily at 23:00 by using Windows Server Backup.

You have an organizational unit (OU) named ParisUsers that contains 1,000 users.

At 08:00, DC1 shuts down for hardware maintenance. The maintenance completes, but DC1 remains shut down.

At 09:00, an administrative error causes the manager attribute of each user in ParisUsers to be deleted.

You need to recover the user account details as quickly as possible. The solution must minimize data loss.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Start DC1 normally.	
Perform an authoritative restore on DC1.	
Recover all the user objects in the Active Directory Recycle Bin.	
Start DC1 by using the Last Known Good Configuration.	
Start DC1 in Directory Services Restore Mode.	
Perform a system state restore on DC1.	

Answer:

Explanation:

Explanation

Text, table Description automatically generated with medium confidence

Start DC1 in Directory Services Restore Mode.
Perform a system state restore on DC1.
Perform an authoritative restore on DC1.

NEW QUESTION # 50

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com. The domain contains domain controllers that run Windows Server 2016.

You build a new AD DS forest named nwtraders.com. The forest contains domain controllers that run Windows Server 2025.

You plan to perform a phased migration from contoso.com to nwtraders.com.

You perform the following actions:

- * Migrate the users in contoso.com to nwtraders.com and enable sIDHistory.
- * Establish a two-way forest trust between contoso.com and nwtraders.com.
- * Install the Active Directory Migration Tool (ADMT) in nwtraders.com.

Answer Area	Statements	Yes	No
	The permissions for the resources in contoso.com must be updated to allow migrated users access.	☐	☐
	Migrated users can sign in to nwtraders.com by using their password for contoso.com.	☐	☐
	Contoso.com must contain a server that runs Windows Server 2025 to migrate user profiles by using ADMT.	☐	☐

Answer:

Explanation:

Answer Area

Statements

The permissions for the resources in contoso.com must be updated to allow migrated users access.

Migrated users can sign in to nwtraders.com by using their password for contoso.com.

Contoso.com must contain a server that runs Windows Server 2025 to migrate user profiles by using ADMT.

Yes No

☐ ☒ ☐ ☒ ☐ ☒
