## NEW QUESTION # 482

Hotspot Question

To complete the sentence, select the appropriate option in the answer area.

### Answer Area

Microsoft  
Data that is stored in the Archive access tier of an Azure Storage account

- can be accessed at any time by using azcopy.exe.
- can only be read by using Azure Backup.
- must be restored before the data can be accessed.
- must be rehydrated before the data can be accessed.

Answer:

Explanation:

### Answer Area

Microsoft  
Data that is stored in the Archive access tier of an Azure Storage account

- can be accessed at any time by using azcopy.exe.
- can only be read by using Azure Backup.
- must be restored before the data can be accessed.
- must be rehydrated before the data can be accessed.

Explanation:

Azure storage offers different access tiers: hot, cool and archive.

The archive access tier has the lowest storage cost. But it has higher data retrieval costs compared to the hot and cool tiers. Data in the archive tier can take several hours to retrieve.

While a blob is in archive storage, the blob data is offline and can't be read, overwritten, or modified. To read or download a blob in archive, you must first rehydrate it to an online tier.

Example usage scenarios for the archive access tier include:

- Long-term backup, secondary backup, and archival datasets
- Original (raw) data that must be preserved, even after it has been processed into final usable form
- Compliance and archival data that needs to be stored for a long time and is hardly ever accessed.

Reference:

[https://docs.microsoft.com/en-us/azure/storage/blobs/storage-blob-storage-tiers?tabs=azure- portal#archive-access-tier](https://docs.microsoft.com/en-us/azure/storage/blobs/storage-blob-storage-tiers?tabs=azure-portal#archive-access-tier)

## NEW QUESTION # 483

Select the answer that correctly completes the sentence.

Azure Blob Storage is a

- data store for queuing and reliably delivering messages between applications.
- file share that can be mapped as a network drive.
- key/attribute store for non-relational, structured data.
- storage service optimized for very large objects, such as video files and bitmaps.

Answer:

Explanation:

**Microsoft**  
Azure Blob Storage is a **data store for queuing and reliably delivering messages between applications.**  
file share that can be mapped as a network drive.  
key/attribute store for non-relational, structured data.  
storage service optimized for very large objects, such as video files and bitmaps.

#### Explanation

Azure Blob Storage is a **storage service optimized for very large objects, such as video files and bitmaps.**

#### NEW QUESTION # 484

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

##### Answer Area

Yes	No
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>

Azure Advisor can generate a list of Azure virtual machines that are protected by Azure Backup.

If you implement the security recommendations provided by Azure Advisor, your company's secure score will decrease.

To maintain Microsoft support, you must implement the security recommendations provided by Azure Advisor within a period of 30 days.

#### Answer:

Explanation:

**Answer Area**

**Microsoft**  
**Statements**

Yes	No
<input checked="" type="checkbox"/>	<input type="radio"/>
<input type="radio"/>	<input checked="" type="checkbox"/>
<input type="radio"/>	<input checked="" type="checkbox"/>

Azure Advisor can generate a list of Azure virtual machines that are protected by Azure Backup.
