The CCFA-200b Exam Questions is of the highest quality, and it enables participants to pass the CCFA-200b exam on their first try. For successful preparation, it is essential to have good CCFA-200b exam dumps and to prepare questions that may come up in the exam. DumpsFree helps candidates overcome all the difficulties they may encounter in their exam preparation. To ensure the candidates' satisfaction, DumpsFree has a support team that is available 24/7 to assist with a wide range of issues.

CrowdStrike CCFA-200b Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Workflows: This domain focuses on configuring automated workflows that execute predefined actions when specific triggers or conditions are met.
Topic 2	<ul style="list-style-type: none">• Sensor Deployment: This domain focuses on verifying installation prerequisites, applying default policies and best practices, uninstalling sensors, and troubleshooting sensor issues across supported operating systems.

Topic 3	<ul style="list-style-type: none"> • Rules Configuration: This domain involves creating custom IOA rules, configuring exclusions to resolve false positives, managing IOC settings for threat detection, and configuring CID-wide General Settings.
Topic 4	<ul style="list-style-type: none"> • Policy Application: This domain encompasses configuring prevention policies for security posture, sensor update policies, RTR audit policies, containment policies with IP exclusions, and managing quarantined files.
Topic 5	<ul style="list-style-type: none"> • Host Management and Setup: This domain addresses filtering and organizing hosts, disabling detections and understanding their effects, managing Reduced Functionality Mode situations, locating inactive sensors and their retention, and utilizing relevant management reports.

CrowdStrike Falcon Administrator Sample Questions (Q112-Q117):

NEW QUESTION # 112

A member of your SECOPS team currently has the role of Falcon Security Lead to be able to Manage detections, quarantine files and reset user credentials. Which additional role is required to also allow them to view and modify remediation actions?

- A. Detections Exception Manager
- B. Quarantine Manager
- C. Endpoint Manager
- D. Remediation Manager

Answer: D

NEW QUESTION # 113

You want the Falcon Cloud to push out sensor version changes but you also want to manually control when the sensor version is upgraded or downgraded. In the Sensor Update policy, which is the best Sensor version option to achieve these requirements?

- A. Sensor version updates off
- B. Auto - TEST-QA
- C. Specific sensor version number
- D. Auto - N-1

Answer: C

Explanation:

The administrator can choose a specific sensor version number in the Sensor Update policy to manually control when the sensor version is upgraded or downgraded. This will allow the Falcon Cloud to push out sensor version changes, but only when the administrator changes the version number in the policy. The other options will either automate the sensor version updates or turn them off completely.

NEW QUESTION # 114

Which role is required to manage groups and policies in Falcon?

- A. Prevention Hashes Manager
- B. Falcon Host Analyst
- C. Falcon Host Administrator
- D. Falcon Host Security Lead

Answer: C

Explanation:

The Falcon Host Administrator role is required to manage groups and policies in Falcon. This role allows users to create, edit and delete groups and policies, as well as assign them to hosts. The other roles do not have this capability. Reference: [CrowdStrike Falcon User Guide], page 17.

NEW QUESTION # 115

What is likely the reason your Windows host would be in Reduced Functionality Mode (RFM)?

- A. Microsoft updates altering the kernel
- **B. The host lost internet connectivity**
- C. A Sensor Update Policy was misconfigured
- D. A misconfiguration in your prevention policy for the host

Answer: B

Explanation:

The likely reason your Windows host would be in Reduced Functionality Mode (RFM) is that the host lost internet connectivity. RFM is a mode that limits the sensor's functionality due to license expiration, network connectivity loss, or certificate validation failure. When a Windows sensor is in RFM, it will only provide basic prevention capabilities, such as blocking known malware hashes and preventing script execution from the %TEMP% directory. The sensor will not send any telemetry or detection events to the Falcon platform, and will not receive any policy or update changes from the Falcon cloud. Losing internet connectivity is a common cause of RFM, as it prevents the sensor from communicating with the Falcon cloud. A misconfiguration in your prevention policy or sensor update policy will not cause RFM, as these policies are applied by the Falcon cloud and do not affect the sensor's license, network, or certificate status. Microsoft updates altering the kernel may cause compatibility issues with the sensor, but not RFM.

NEW QUESTION # 116

With Custom Alerts, it is possible to _____.

- A. schedule the alert to run at any interval
- B. be alerted to activity in real-time
- **C. receive an alert in an email**
- D. configure prevention actions for alerting

Answer: C

Explanation:

The reporting interval is predefined and cannot be changed. You can only enable/disable the custom alert feature and add/remove recipient email client for the alert/detection.

NEW QUESTION # 117

.....

It is browser-based; therefore no need to install it, and you can start practicing for the CrowdStrike Falcon Administrator (CCFA-200b) exam by creating the CrowdStrike CCFA-200b practice test. You don't need to install any separate software or plugin to use it on your system to practice for your actual CrowdStrike Falcon Administrator (CCFA-200b) exam. DumpsFree CrowdStrike Falcon Administrator (CCFA-200b) web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.
