

Test NCP-EUC Discount Voucher | NCP-EUC Study Materials Review

P.S. Free & New NCP-EUC dumps are available on Google Drive shared by FreePdfDump: <https://drive.google.com/open?id=1KIPIEx-dcXK9Hnod01sN5OzUZXmpInZy>

The Nutanix NCP-EUC exam questions in the web-based practice test are real and accurate. This Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) practice exam is compatible with Mac, Linux, iOS, Android, and Windows. Likewise, no particular software installation or plugin is required because it is a browser-based Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) practice exam. Chrome, Internet Explorer, Firefox, Safari, Opera, and all the major browsers support the web-based Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) practice exam.

The NCP-EUC certification exam is a rigorous test of a candidate's knowledge and skills in deploying and managing end-user computing solutions. It requires a thorough understanding of Nutanix technology, as well as a deep knowledge of industry best practices for end-user computing solutions.

Nutanix Certified Professional - End-User Computing (NCP-EUC) exam is a comprehensive certification exam designed to test the knowledge and skills of IT professionals in the area of end-user computing. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification is offered by Nutanix, a leading provider of hyperconverged infrastructure solutions. The NCP-EUC Exam is intended for IT professionals who specialize in the deployment, management, and maintenance of Nutanix end-user computing solutions.

Nutanix - NCP-EUC - Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam –Valid Test Discount Voucher

The web-based Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) practice exam can be accessed through online browsing anywhere just with a stable internet connection. So the applicants can take the NCP-EUC practice exam with ease for the preparation for the NCP-EUC Exam. All browsers and operating systems support the web-based NCP-EUC practice exam. Users can access it without installing or downloading any excessive plugins or software.

To prepare for the NCP-EUC Certification Exam, Nutanix offers a range of training and certification programs. These programs include online courses, self-paced learning modules, and instructor-led training. Nutanix also offers practice exams and study guides to help you prepare for the actual exam. The training and certification programs are designed to help you gain the knowledge and skills you need to pass the exam and become a certified professional in EUC.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q120-Q125):

NEW QUESTION # 120

Which scenario represents the best case for how an organization would deploy non-persistent desktops to their employee and customer base?

- A. Application Quality Assurance Testing
- **B. Registration kiosks at a conference**
- C. Private equity traders
- D. High end developers

Answer: B

Explanation:

This is because registration kiosks are used by multiple customers who do not need to personalize their desktops or applications, and who only need to perform a specific task such as registering or checking in.

Non-persistent desktops can provide a secure and consistent user experience for these customers, and also reduce management overhead for the organization.

NEW QUESTION # 121

Recently, the vice president Of IT infrastructure was migrated from a physical computer to a virtual desktop.

The administrator wants to ensure that this user has the best possible experience and wants to be notified if any CPU resource constraints.

The cluster's average CPU utilization is 20%.

What step would help the administrator to know when there are resource problems on the virtual desktop?

- A. Create a new alert policy to alert if the CPU on the virtual desktop's cluster is over 90%.
- B. Create a new alert policy to alert if the CPU on the virtual desktop's host is over 90%.
- **C. Create a new alert policy to alert if the CPU on the virtual desktop is over and configure a Playbook to Slack the information to the administrator,**
- D. Create a new alert policy to alert if the CPU on the virtual desktop is over and configure a Playbook to power off the virtual desktop.

Answer: C

Explanation:

alert policies are rules that define the conditions for generating alerts on Nutanix clusters¹. You can create custom alert policies based on your specific needs and preferences² Playbooks are automated workflows that perform actions based on triggers such as alerts³. You can create playbooks using predefined alerts or alerts matching criteria³.

To ensure that the vice president of IT infrastructure has the best possible experience and to be notified if any CPU resource constraints on the virtual desktop, one possible solution is to create a new alert policy to alert if the CPU on the virtual desktop is over a certain threshold (for example, 80%) and configure a playbook to send a notification (for example, via email or Slack) to the administrator²³. This way, the administrator can monitor the performance of the virtual desktop and take appropriate actions if needed.

https://portal.nutanix.com/page/documents/details?targetId=Prism-Central-Guide-vpc_2022_6:mul-alert-policies-customize-system-pc-t.html

NEW QUESTION # 122

A company is using Citrix for virtual desktops on Nutanix with AHV. The studio has 10,000 users who will be connecting to this infrastructure and have deployed a dedicated Files cluster for holding the user home shares.

Since this is a dedicated cluster with dual Intel 6242 28 GHz 16 Core processors and 192GB of RAM, what should be done for the FSVM and CVM configuration to allow for optimal performance?

- A. Increase the CVM vCPUs to 16 and the FSW vCPUs to 12.
- B. Increase the CVM RAM to 64GB and the FSVM RAM to 96GB.
- **C. Leave the CVM RAM at 32GB and increase the FSVM RAM to 96GB.**
- D. Leave the CVM vCPUs et 12 and increase the FSVM vCPUs to 8,

Answer: C

Explanation:

<https://portal.nutanix.com/page/documents/solutions/details?targetId=TN-2041-Nutanix-Files:file-server-virtual-machines.html>
<https://next.nutanix.com/files-storage-71/command-line-access-to-nutanix-file-server-vm-fsvm-via-ssh-nutanix-files-33420> The file server VM (FSVM) is a virtual machine that runs on Nutanix Files and provides file services such as SMB shares and NFS exports. The FSVM is based on CentOS and incorporates all the security and hardening that goes into the Nutanix Controller VM (CVM)². The CVM is a virtual machine that runs on each node of a Nutanix cluster and provides storage management, data protection, cluster coordination, and other services³.

The FSVMs have some default configuration settings that can be changed depending on your workload requirements. For example, you can change the number of vCPUs, RAM, network interfaces, or disk size of an FSVM². However, you should not change these settings without consulting Nutanix Support first.

One of the factors that affects the performance of an FSVM is its memory allocation. The more memory an FSVM has, the more cache it can use for file operations. This can improve the throughput and latency of file serving workloads⁴. Therefore, increasing the FSVM RAM to 96GB can help optimize its performance for a large number of users.

NEW QUESTION # 123

An administrator is using a mix of full clones and non-persistent desktops deployed via Citrix MCS on a three-node cluster. The full clone and non-persistent desktops are managed using separate storage containers.

Which two Storage Efficiency features will provide better storage efficiency and performance improvement?

(Choose two.)

- A. RDMA
- B. Compression
- C. Erasure Coding
- D. Deduplication

Answer: B,D

Explanation:

Storage Efficiency features that will provide better storage efficiency and performance improvement for a mix of full clones and non-persistent desktops deployed via Citrix MCS on a three-node cluster are Compression and Deduplication. Compression is a technology that reduces the size of data blocks by removing redundant information. Deduplication is a technology that eliminates duplicate blocks of data and reduces storage consumption. Both Compression and Deduplication can be enabled on a per-container basis and can provide significant savings for Citrix virtual desktop deployments that use cloning technologies such as MCS².

NEW QUESTION # 124

Refer to the exhibit.

□ An administrator is deploying an Instant Clone desktop pool on an 8-node Nutanix cluster. The system displays a warning message, as shown in the exhibit.

What should the administrator do to resolve the issue?

- A. Disable Shadow Clones
- B. Safely ignore this warning
- C. use both VSA and Shadow Clones
- D. Enable View Storage Accelerator

Answer: A

Explanation:

Shadow Clones are a unique feature of the AOS storage that enables distributed caching of virtual disks (vDisks) used by virtual machines¹. Shadow Clones provide effective caching optimization in distributed multireader scenarios, such as large VDI and cloud deployments².

The warning message you see indicates that Shadow Clones are disabled on your Nutanix cluster. This may affect the performance of your Instant Clone desktop pool, as it will not benefit from the caching optimization provided by Shadow Clones.
