Valid Braindumps NCP-DB-6.10 Questions & NCP-DB-6.10 Reliable Exam Registration

The actual Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) certification exam has quite high registration fees, so passing the NCP-DB-6.10 exam in one attempt becomes mandatory. Dumpcollection provides a free NCP-DB-6.10 exam dumps demo so customers can see the product's features before purchasing. This offers comprehensive NCP-DB-6.10 practice test questions that cover all the topics students need to cover to crack the Nutanix NCP-DB-6.10 test. Moreover, This also offers up to 1 year of free NCP-DB-6.10 questions updates. By using our real Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) dumps, it is guaranteed that the candidate passes in one attempt, so our product saves time and money.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q178-Q183):

NEW QUESTION # 178
Which Time Machine feature allows developers to automate the data refresh for their clones?

- A. update
- B. Manual Backup
- C. Schedule

- D. Log Catchup

Answer: C

Explanation:
According to the Nutanix Database Automation (NCP-DB) learning documents, the Schedule feature of the Time Machine allows developers to automate the data refresh for their clones. This feature eliminates the time-consuming, complex process of database clone/refresh, allowing admins to create database clones/refresh to any point in time in just a few minutes. Please refer to the official Nutanix documentation and training materials for more detailed information.

NEW QUESTION # 179
An administrator needs to assign a VLAN to provide IP address to a database VM. What is the procedure to create the Network Profile?

- A. Add VLAN, Define IP range, Create Network Profile.
- B. Create Network Profile, Define IP Range. Add the VLAN.
- C. Create Network Profile, Select the VLAN, Define IP Range.
- D. Add VLAN, Create Network Profile. Define IP range.

Answer: C

Explanation:
In Nutanix Database Service (NDB), a Network Profile is used to define networking configurations for database VMs, including VLAN assignments and IP address ranges. The correct procedure to create a Network Profile that assigns a VLAN and provides IP addresses to a database VM is as follows:
Create Network Profile: Start by initiating the creation of a new Network Profile within NDB. This is done from the NDB interface under the "Network" or "Profiles" section.
Select the VLAN: During the Network Profile creation process, you specify the VLAN that the database VM will use. This involves selecting an existing VLAN configured in the Nutanix cluster (e.g., via Prism Element) or defining a new VLAN ID if applicable.
Define IP Range: Finally, you define the IP address range (e.g., a subnet or specific IPs) that will be assigned to the database VM(s) within the selected VLAN. This ensures the VM receives a valid IP address for communication.

NEW QUESTION # 180
What is used to temporarily store the transaction logs of the source database before they are copied to the log?

- A. Time Machine
- B. NDB Profiles
- C. NDB Drive
- D. Database Agent

Answer: D

Explanation:
The Database Agent is used to temporarily store the transaction logs of the source database before they are copied to the log. This is a critical component for ensuring data consistency and recovery in database operations.

NEW QUESTION # 181
What is the purpose of Data Access Management policies in NDB Multi-Cluster?

- A. To remove data accessibility of a time machine across all registered Nutanix clusters in NDB
- B. To register multiple Nutanix clusters in NDB
- C. To manage time machine data availability across all registered Nutanix clusters in NDB
- D. To perform snapshot operations on a single Nutanix cluster

Answer: C

Explanation:
Data Access Management (DAM) policies are a feature of NDB Multi-Cluster that allows you to control the access and availability

of time machine data across different Nutanix clusters. You can use DAM policies to specify which clusters can access the time machine data of a source database, and which clusters can replicate the time machine data for backup or disaster recovery purposes. DAM policies help you to optimize the storage and network resources, as well as ensure the security and compliance of your database workloads. The purpose of DAM policies is not to register multiple Nutanix clusters in NDB, as this is done by using the Add Cluster option in the NDB settings page. The purpose of DAM policies is also not to perform snapshot operations on a single Nutanix cluster, as this is done by using the Time Machine feature in the NDB dashboard. The purpose of DAM policies is also not to remove data accessibility of a time machine across all registered Nutanix clusters in NDB, as this is done by using the Delete option in the Time Machine page.

NEW QUESTION # 182

An administrator is tasked with providing a Jr DBA with access to NBD with limited capabilities.
This user should only be able to:
- Provision Databases
- Provision Database Servers
- Create Ones
- Refresh Clones
- Patch Database Servers
How can the administrator complete this task?

- A. Create a role with only those privileges, assign the role to the Jr DBA user.
- B. Clone the Database Admin role, and remove all but the desired privileges.
- C. Create a user for the Jr DBA, and assign only those privileges.
- D. Clone the Database Admin role, and add the desired privileges.

Answer: A

Explanation:
The correct answer is B because it allows the administrator to create a custom role with the specific privileges that the Jr DBA user needs, and then assign that role to the user. This way, the administrator can control the access level of the Jr DBA user without affecting the existing roles or users in NDB.

NEW QUESTION # 183

......

The questions of our NCP-DB-6.10 guide questions are related to the latest and basic knowledge. What's more, our NCP-DB-6.10 learning materials are committed to grasp the most knowledgeable points with the fewest problems. So 20-30 hours of study is enough for you to deal with the exam. When you get a NCP-DB-6.10 certificate, you will be more competitive than others, so you can get a promotion and your wages will also rise your future will be controlled by yourselves.

We update our exam preparation materials aperiodically accord with real tests, which is to ensure our NCP-DB-6.10 exam cram coverage more than 96% normally.
