As the saying goes, to develop study interest requires to giving learner a good key for study, this is promoting learner active development of internal factors. The most function of our C_S4PM2_2507 question torrent is to help our customers develop a good study habits, cultivate interest in learning and make them pass their exam easily and get their C_S4PM2_2507 Certification. All workers of our company are working together, in order to produce a high-quality product for candidates.

SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q26-Q31):

NEW QUESTION # 26

Which of the following tasks are included in the SAP S/4HANA Cloud Private Edition standard services delivered by SAP for a new implementation? Note: There are 3 correct answers to this question.

- A. Provisioning a client with the desired client setup alternative
- B. Implementing customizations to the SAP Best Practices business processes
- C. Activating SAP Best Practices content in the system
- D. Activating required business functions in client 000
- E. Configuring the SAP Best Practices business processes

Answer: A,C,E

Explanation:

For a new implementation of SAP S/4HANA Cloud, Private Edition, SAP delivers a set of standard services that focus on preparing and enabling the system for use based on SAP Best Practices. The standard scope provided by SAP includes the provisioning of the system, client setup, and activation of the predefined Best Practices content.

A). Activating SAP Best Practices content in the system

SAP's standard service package includes the activation of SAP Best Practices content in the system. This ensures that the predefined configuration, process templates, and reference data are available for immediate use. It provides the baseline processes that will be used during fit-to-standard workshops and serves as the foundation for the customer's implementation project.

B). Implementing customizations to the SAP Best Practices business processes Implementing customizations or enhancements to SAP Best Practices business processes is outside the scope of SAP's standard delivery services. Customizations, such as adjusting process flows, adding custom fields, or changing configurations beyond the standard, are performed by the implementation project team or partners, not by SAP as part of the standard setup.

C). Configuring the SAP Best Practices business processes

The configuration of SAP Best Practices content is included as part of the standard services. SAP performs initial configuration activities to make the delivered scope items operational. This configuration covers the essential parameters required to run the standard processes and ensures that the solution operates according to the standard reference setup before any customer-specific adjustments are made.

D). Provisioning a client with the desired client setup alternative

Client provisioning is a core task performed by SAP as part of the standard new implementation service. SAP creates and configures the required system clients (such as development, quality, and production) based on the agreed client setup option. This ensures that the project team has a properly provisioned system landscape to start the configuration and testing phases.

E). Activating required business functions in client 000

Activating business functions in client 000 is not part of the standard services delivered for SAP S/4HANA Cloud, Private Edition. In the S/4HANA environment, many business functions are already active or controlled differently, and manual activation in client 000 is not required as part of the standard SAP- delivered activities.

NEW QUESTION # 27

How do you move extensions between SAP S/4HANA Cloud Private Edition systems? Note: There are 2 correct answers to this question.

- A. Mark items relevant for transport
- B. Assign items to a software package
