FreePdfDump Offer The AVIXA CTS Exam Questions In Three Versions

The top of the lists Certified Technology Specialist (CTS) exam practice questions features are free demo download facility, 1 year free updated AVIXA exam questions download facility, availability of Certified Technology Specialist (CTS) exam questions in three different formats, affordable price, discounted prices and AVIXA CTS exam passing money back guarantee.

AVIXA Certified Technology Specialist Sample Questions (Q33-Q38):

NEW QUESTION # 33

The architect states that the project is in the pre-design phase. This would indicate that

- A. the reflected ceiling plan has been approved.
- B. construction is about to commence.
- **C. a needs analysis should be requested.**
- D. the control system is ready for implementation.

Answer: C

Explanation:

In the pre-design phase of a project, the focus is on gathering information to define requirements, goals, and constraints. A needs analysis is appropriate at this stage to identify what the client needs from the AV system, which will inform the subsequent design and planning phases.

CTS Technology Specialist Reference According to CTS guidelines, conducting a needs analysis during the pre-design phase is essential to understand client requirements and project scope before moving into design and construction phases.

NEW QUESTION # 34

Which agreement typically includes installation materials and workmanship against failure for a stipulated period after the installation is complete?

- A. Service warranty
- **B. System warranty**
- C. Manufacturer's warranty
- D. Preventive warranty

Answer: B

Explanation:

A system warranty is provided by the AV integrator and covers the entire installed system, including materials and workmanship, for a specified period post-installation. This ensures that any issues arising from the installation process are addressed without additional cost to the client.

Reference: CTS Certified Technology Specialist Exam Guide, Third Edition

NEW QUESTION # 35

The architect states that the project is in the pre-design phase. This would indicate that

- A. the reflected ceiling plan has been approved.
- B. construction is about to commence.
- **C. a needs analysis should be requested.**
- D. the control system is ready for implementation.

Answer: C

Explanation:

In the pre-design phase of a project, the focus is on gathering information to define requirements, goals, and constraints. A needs analysis is appropriate at this stage to identify what the client needs from the AV system, which will inform the subsequent design and planning phases.

CTS Technology Specialist Reference

According to CTS guidelines, conducting a needs analysis during the pre-design phase is essential to understand client requirements and project scope before moving into design and construction phases.

NEW QUESTION # 36

One way to safeguard individual pieces of equipment in a rack from theft is the use of

- A. a password.
- B. a rack shelf.
- C. lacing bars.
- **D. security screws.**

Answer: D

Explanation:

Security screws are a common method to prevent unauthorized removal of individual equipment from a rack.

They require specialized tools for removal, thereby deterring theft.

CTS Technology Specialist ReferenceThe CTS curriculum includes recommendations for securing equipment in racks, with security screws listed as a practical solution to safeguard AV assets against theft.

NEW QUESTION # 37

A loudspeaker with sensitivity 90 dB SPL measured at 1 meter, 1 watt is placed 2 meters away from a listener. At 1 watt, what is the SPL at the listener?

□

- A. 87 dB SPL
- **B. 81 dB SPL**
- C. 90 dB SPL
- D. 84 dB SPL

Answer: B

Explanation:

To determine the Sound Pressure Level (SPL) at 2 meters from the loudspeaker, we use the inverse square law of sound. The inverse square law states that for each doubling of the distance from the sound source, the SPL decreases by 6 dB.

Given:

* Sensitivity: 90 dB SPL at 1 meter with 1 watt.

* Distance: 2 meters.

When the distance is doubled from 1 meter to 2 meters, the SPL will decrease by 6 dB. Therefore: 90 dB SPL

- 6 dB = 84 dB SPL at 2 meters. However, since the answer choices are given and no mistake has been indicated in the answer choices themselves, the correct answer based on typical question logic should be:

90 dB SPL - 6 dB = 84 dB SPL

90 dB SPL - 6 dB = 84 dB SPL

Therefore, the SPL at the listener 2 meters away is 84 dB SPL.

NEW QUESTION # 38

.....

We will try our best to solve your problems for you. I believe that you will be more inclined to choose a good service product, such as CTS learning question. After all, everyone wants to be treated warmly and kindly, and hope to learn in a more pleasant mood. The authoritative, efficient, and thoughtful service of CTS learning question will give you the best user experience, and you can also get what you want with our CTS study materials. I hope our study materials can accompany you to pursue your dreams. If you can choose CTS test guide, we will be very happy. We look forward to meeting you.
