Mit der Hilfe von Fast2test brauchen Sie nicht so viel Geld für die Kurse oder viel Zeit und Energie für die Prüfung auszugeben. Sie können ganz einfach die UiPath UiPath-ADPv1 (UiPath (ADPv1) Automation Developer Professional)Prüfung erfolgreich ablegen. Die Software zur UiPath UiPath-ADPv1 Zertifizierungsprüfung wird Fast2test nach den echten Prüfungen in den letzten Jahren erforscht. Die Fragen und Antworten zur UiPath UiPath-ADPv1 Zertifizierungsprüfung von Fast2test sind den realen Fragen und Antworten sehr ähnlich.

UiPath UiPath-ADPv1 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• UiPath Studio Fundamentals: In this section, the focus is given to the understanding of Robotic Process Automation (RPA) concepts; it covers UiPath Studio and its components, Working with the UiPath user interface, project creation, management, and version control.
Thema 2	• UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.
Thema 3	• Debugging and Testing: This section is about utilizing logging and debugging tools and adopting unit testing and test automation strategies.
Thema 4	• Design and Development: This section covers designing workflows using sequences, flowcharts, and state machines, building reusable components with libraries, exception handling and debugging techniques, etc.

UiPath-ADPv1 Übungsmaterialien & UiPath-ADPv1 realer Test & UiPath-ADPv1 Testvorbereitung

Niemand will ein ganz ein leichtes Leben führen und in einer niedrigen Position wenig Gehalt beziehen. Eines Tages wird man vielleicht gekündigt oder in die Rente treten. Dieses Leben ist wirklich langweilig. Wollen Sie nicht ein vielfältiges Leben führen? Das macht nichts. Heute sage ich Ihnen eine Abkürzung zum Erfolg, nämlich, die UiPath UiPath-ADPv1 Zertifizierungsprüfung zu bestehen. Mit dem Zertifikat können Sie ein besseres Leben führen und ein exzellenter IT-Expert werden und von anderen akzeptiert werden. Die Schulungsunterlagen zur UiPath UiPath-ADPv1 Zertifizierungsprüfung von Fast2test können ganz leicht Ihren Traum verwirklichen. Zögern Sie noch? Schicken Sie doch schnell Schulungsunterlagen zur UiPath UiPath-ADPv1 Zertifizierungsprüfung von Fast2test in den Warenkorb.

UiPath (ADPv1) Automation Developer Professional UiPath-ADPv1 Prüfungsfragen mit Lösungen (Q133-Q138):

133. Frage

When developing a process, you were provided with two data tables, "DT1" and "DT2", as shown below:

The process documentation specifies that the two data tables need to be manipulated in order to reflect the following "DT2":
How should the properties of the Merge Data Table activity be configured?

- A. ☐
- B. ☐
- C. ☐
- D. ☐

Antwort: A

Begründung:

Given the two data tables DT1 and DT2, to achieve the desired result where DT2 contains both the department and the names, the Merge Data Table activity should be configured to merge DT1 into DT2. This configuration requires specifying DT1 as the source table and DT2 as the destination table. The MissingSchemaAction should be set to AddWithKey which ensures that if the source table (DT1) contains columns that are not found in the destination table (DT2), they will be added to the destination table with the primary key information preserved.

Option A shows the correct configuration for the Merge Data Table activity to achieve this result:

* Destination: DT1

* Source: DT2

* MissingSchemaAction: AddWithKey

This setup correctly adds the "Name" column from DT1 to DT2 based on the shared "ID" column, which acts as the key. Since both tables have an "ID" column with matching values, the names will be added to the corresponding IDs in DT2, resulting in a merged table with ID, Department, and Name columns.

134. Frage

The provided exhibit displays the representation of the "Deadline" field using the yyyy-mm-dd format.

In what order should the Queue Items be processed by a single robot executing a Performer workflow?

Antwort:

Begründung:

Explanation:

135. Frage

A developer has created a string array variable as shown below:

UserNames = {"Jane", "Jack", "Jill", "John"}

Which expression should the developer use in a Log Message activity to print the elements of the array separated by the string ","?

- A. String.Concat(UserNames, ",")
- B. String.Join(UserNames, ", ")
- C. String.Concat(" ", UserNames)
- **D. String.Join(" ", UserNames)**

Antwort: D

Begründung:

To print the elements of a string array separated by a specific string, the String.Join method is used in C#.

This method takes two parameters: the first is the separator string and the second is the array to join into a single string.

Given the options and the requirement to separate array elements with a comma and a space (" , "), the correct expression to use in a Log Message activity would be:

C: String.Join(" ", UserNames)

This will produce a single string with each element of the UserNames array separated by " , " (a comma followed by a space).

136. Frage

A developer aims to employ the REFramework for automating a business process that Involves a TransactionData collection (DataTable) comprising vendor names and addresses.

Instructions: Choose the appropriate variable type for the TransactionItem from the provided drop-down list in the following exhibit.

□

Antwort:

Begründung:

□

Explanation:

The REFramework (Robotic Enterprise Framework) in UiPath is designed to work with transactional data. For a process that involves iterating over a DataTable where each row represents a transaction item, the appropriate variable type for the TransactionItem would be a DataRow.

In the context of REFramework, a DataRow is typically used to represent a single transaction item when the transaction data is contained within a DataTable. This allows the framework to process each row (or transaction) one by one.

Therefore, the correct variable type for the TransactionItem from the drop-down list should be DataRow.

137. Frage

Consider testing a workflow that computes the sum of two numbers having the data driven test data from the Excel file below:

□

Expanding the functionality of the workflow to compute the sum of three numbers, the data needs to be updated as well to accommodate the new scenario:

□

What are steps to do that?

- A. Click Right on the Test Case and select Update Test Data
- **B. Click Right on the Test Case and select Refresh Test Data**
- C. Click Right on the Test Case and select Add Test Data.
- D. Click Right on the Test Case and select Remove Test Data.

Antwort: B

138. Frage
