P.S. Free & New 2V0-17.25 dumps are available on Google Drive shared by Real4test: <https://drive.google.com/open?id=1OCbIHSxb8iVcxzSUEHegX7dBv7NtVIrJ>

Our services before, during and after the clients use our 2V0-17.25 study materials are considerate. Before the purchase, the clients can download and try out our 2V0-17.25 study materials freely. During the clients use our products they can contact our online customer service staff to consult the problems about our products. After the clients use our 2V0-17.25 Study Materials if they can't pass the test smoothly they can contact us to require us to refund them in full and if only they provide the failure proof we will refund them at once. Our company gives priority to the satisfaction degree of the clients and puts the quality of the service in the first place.

## VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.</li> </ul>

## 2V0-17.25 Reliable Exam Bootcamp, 2V0-17.25 Latest Exam Review

Similarly, Real4test offers up to 1 year of free VMware 2V0-17.25 exam questions updates if in any case, the content of VMware Cloud Foundation 9.0 Administrator (2V0-17.25) certification test changes. Real4test provides its product in three main formats i.e., VMware 2V0-17.25 Dumps PDF, Web-Based VMware Cloud Foundation 9.0 Administrator (2V0-17.25) Practice Test, and Desktop 2V0-17.25 Practice Exam Software.

## VMware Cloud Foundation 9.0 Administrator Sample Questions (Q55-Q60):

### NEW QUESTION # 55

An administrator wants to implement a solution that will centrally manage and distribute Virtual Machine (VM) templates, ISO images, and other files across multiple physical locations and VMware Cloud Foundation (VCF) instances. Which solution should the administrator implement?

- A. Network File Copy
- B. vSAN Storage Cluster
- **C. Content Library**
- D. Shared VMFS datastore

**Answer: C**

Explanation:

A Content Library is the VMware solution designed to centrally manage and distribute VM templates, ISO images, and other files across multiple sites and VCF instances. It supports synchronization between libraries, ensuring consistency and efficiency in multi-location environments.

### NEW QUESTION # 56

An administrator has been tasked with ensuring that all new Kubernetes deployments within VMware Cloud Foundation (VCF) Automation are automatically registered with an external configuration management database (CMDB). The CMDB is accessible via API through the corporate network.

Which two VCF Automation components should the administrator use to satisfy the requirement? (Choose two.)

- **A. Event Subscriptions**
- B. Pipelines
- **C. Action-based Extensibility**
- D. VCF Operations orchestrator
- E. Service Broker

**Answer: A,C**

Explanation:

To automatically register new Kubernetes deployments with an external CMDB via API, the administrator should use:

- \* Event Subscriptions - to capture deployment lifecycle events (such as new Kubernetes cluster creation).
- \* Action-based Extensibility (ABX) - to execute custom scripts or API calls that integrate with the CMDB when the event is triggered.

Together, these components ensure every new deployment is registered automatically without manual intervention.

#### NEW QUESTION # 57

An administrator is tasked with enabling Workload Management (vSphere IaaS control plane) on a VMware Cloud Foundation workload domain.

Which three of the following are prerequisites for enabling Workload Management? (Choose three.)

- A. Ensure that the cluster has at least three ESXi hosts.
- B. Install the vSphere Client on all ESXi hosts.
- C. Configure NTP and DNS settings for all management components.
- D. Verify that all ESXi hosts are running vSphere 7.0 or later.

**Answer: A,C,D**

Explanation:

For Workload Management in VMware Cloud Foundation, a minimum of three ESXi hosts is required to create a robust, highly available vSphere cluster.

Proper NTP and DNS configuration is essential to ensure time synchronization and proper resolution of network names, which are critical for Workload Management.

The hosts must be running vSphere 7.0 or later to be compatible with the latest features and requirements for Workload Management.

#### NEW QUESTION # 58

Which of the following tasks can be performed on a virtual machine through vCenter Server?

- A. Clone or template a VM
- B. Configure the physical NIC driver on the ESXi host
- C. Modify VM CPU and memory settings
- D. Create snapshots and revert to them

**Answer: A,C,D**

Explanation:

Snapshots, cloning, and resource configurations are all managed through vCenter. Configuring the physical NIC driver on the ESXi host (B) is handled at the host level and not specifically within the VM settings in vCenter.

#### NEW QUESTION # 59

An administrator needs to perform lifecycle management for their VMware Cloud Foundation components, including upgrading the SDDC Manager.

Which three steps should be followed to successfully upgrade VMware Cloud Foundation? (Choose three.)

- A. Disable DRS and HA on all clusters before initiating the upgrade.
- B. Backup all VMware Cloud Foundation components before starting the upgrade.
- C. Use the SDDC Manager UI to initiate the upgrade process.
- D. Perform a pre-check to ensure that all components are compatible with the new version.
- E. Manually download the update bundles with a secure browser from the VMware website.

**Answer: B,C,D**

Explanation:

Backing up all VMware Cloud Foundation components ensures that data is protected in case the upgrade process encounters issues.

Performing a pre-check is important to verify that all components are compatible with the new version to avoid compatibility issues during the upgrade process.

The SDDC Manager UI is used to initiate the upgrade process, providing a guided and consistent method for upgrading the VMware Cloud Foundation environment.

### NEW QUESTION # 60
