## SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q44-Q49):

### NEW QUESTION # 44

What are the benefits of guided analysis? Note: There are 3 correct answers to this question.

- **A. Faster resolution of process challenges by knowing which actions to take**
- **B. Supports focusing on one area at a time and drilling down to root causes**
- **C. No expertise needed to analyze process performance**
- D. Provides communication with experts on the process
- E. Accessing potential value of a performance indicator

**Answer: A,B,C**

### NEW QUESTION # 45

What are some capabilities of the QuickModel feature? Note: There are 2 correct answers to this question.

- A. Grouping different tasks and transforming them into a subprocess
- **B. Adding task information, in a table-based format**
- **C. Creating the happy path of a process**
- D. Enriching process models with gateways

**Answer: B,C**

Explanation:

The QuickModel feature in SAP Signavio is designed to facilitate rapid and efficient process modeling, particularly for users who may not be familiar with detailed BPMN notation. One of its capabilities includes creating the "happy path" of a process, which represents the most straightforward and issue-free sequence of events in a process. Another key capability is adding task information in a table-based format, which simplifies the process of documenting and managing various tasks within a process model. While QuickModel supports fast and efficient modeling, enriching models with gateways or grouping tasks into a subprocess requires more detailed modeling capabilities beyond the QuickModel feature.
