Don't need a lot of time and money, only 30 hours of special training, and you can easily pass your first time to attend IAPP [Certification CIPT Exam](#). DumpsTests are able to provide you with test exercises which are closely similar with real exam questions.

Who should take the CIPT exam

The **CIPT Exam** is ideal for those tech pros that want to accelerate their data privacy career. When looking at the role that a CIPT certified professional would play, it's most relevant to those that develop, engineer, and audit IT services, applications, and devices. Those taking the course will develop an understanding of privacy-related issues and practices in the context of the design and implementation of information and communication technologies and systems.

IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q32-Q37):

NEW QUESTION # 32

Why is first-party web tracking very difficult to prevent?

- A. Consumers enjoy the many benefits they receive from targeted advertising.
- **B. Most browsers do not support automatic blocking.**
- C. The available tools to block tracking would break most sites' functionality.
- D. Regulatory frameworks are not concerned with web tracking.

Answer: B

NEW QUESTION # 33

Combining multiple pieces of information about an individual to produce a whole that is greater than the sum of its parts is called?

- **A. Aggregation.**
- B. Identification.
- C. Insecurity.
- D. Exclusion.

Answer: A

Explanation:

Aggregation involves the combination of various data points to create a more comprehensive profile or dataset that provides greater insight than the individual pieces alone. This technique can pose privacy risks because it may reveal patterns and personal information that were not apparent when the data points were viewed separately. This practice is often discussed in privacy and data protection contexts where it can lead to inadvertent breaches of privacy if not managed properly.

Reference:

NIST Special Publication 800-122, Guide to Protecting the Confidentiality of Personally Identifiable Information (PII).

NEW QUESTION # 34

Which of the following suggests the greatest degree of transparency?

- A. The data subject has multiple opportunities to opt-out after collection has occurred.
- B. A privacy disclosure statement clearly articulates general purposes for collection
- **C. After reading the privacy notice, a data subject confidently infers how her information will be used.**
- D. A privacy notice accommodates broadly defined future collections for new products.

Answer: C

Explanation:

The option that suggests the greatest degree of transparency is After reading the privacy notice, a data subject confidently infers how her information will be used. Transparency in data protection means that data subjects should have clear, concise, and understandable information about how their data is collected, used, and shared. The ability of the data subject to confidently infer the use of their information after reading the privacy notice indicates that the notice is clear and transparent, effectively communicating the data processing practices.

GDPR, Article 12: Transparent information, communication, and modalities for the exercise of the rights of the data subject
"Privacy on the Ground: Driving Corporate Behavior" by Kenneth A. Bamberger and Deirdre K. Mulligan

NEW QUESTION # 35

SCENARIO

Please use the following to answer the next question:

Light Blue Health (LBH) is a healthcare technology company developing a new web and mobile application that collects personal health information from electronic patient health records. The application will use machine learning to recommend potential medical treatments and medications based on information collected from anonymized electronic health records. Patient users may also share health data collected from other mobile apps with the LBH app.

The application requires consent from the patient before importing electronic health records into the application and sharing it with their authorized physicians or healthcare provider. The patient can then review and share the recommended treatments with their physicians securely through the app. The patient user may also share location data and upload photos in the app. The patient user may also share location data and upload photos in the app for a healthcare provider to review along with the health record. The patient may also delegate access to the app.

LBH's privacy team meets with the Application development and Security teams, as well as key business stakeholders on a periodic basis. LBH also implements Privacy by Design (PbD) into the application development process.

The Privacy Team is conducting a Privacy Impact Assessment (PIA) to evaluate privacy risks during development of the application. The team must assess whether the application is collecting descriptive, demographic or any other user related data from the electronic health records that are not needed for the purposes of the application. The team is also reviewing whether the application may collect additional personal data for purposes for which the user did not provide consent.

What is the best way to minimize the risk of an exposure violation through the use of the app?

- A. Prevent the downloading of photos stored in the app.
- **B. Create a policy to prevent combining data with external data sources.**
- C. Dissociate the patient health data from the personal data.
- D. Exclude the collection of personal information from the health record.

Answer: B

NEW QUESTION # 36

SCENARIO

Carol was a U.S.-based glassmaker who sold her work at art festivals. She kept things simple by only accepting cash and personal checks.

As business grew, Carol couldn't keep up with demand, and traveling to festivals became burdensome. Carol opened a small boutique and hired Sam to run it while she worked in the studio. Sam was a natural salesperson, and business doubled. Carol told Sam, "I don't know what you are doing, but keep doing it!" But months later, the gift shop was in chaos. Carol realized that Sam needed help so she hired Jane, who had business expertise and could handle the back-office tasks. Sam would continue to focus on sales. Carol gave Jane a few weeks to get acquainted with the artisan craft business, and then scheduled a meeting for the three of them to discuss Jane's first impressions.

At the meeting, Carol could not wait to hear Jane's thoughts, but she was unprepared for what Jane had to say. "Carol, I know that he doesn't realize it, but some of Sam's efforts to increase sales have put you in a vulnerable position. You are not protecting customers' personal information like you should." Sam said, "I am protecting our information. I keep it in the safe with our bank deposit. It's only a list of customers' names, addresses and phone numbers that I get from their checks before I deposit them. I contact them when you finish a piece that I think they would like. That's the only information I have! The only other thing I do is post photos and information about your work on the photo sharing site that I use with family and friends. I provide my email address and people send me their information if they want to see more of your work. Posting online really helps sales, Carol. In fact, the only complaint I hear is about having to come into the shop to make a purchase." Carol replied, "Jane, that doesn't sound so bad. Could you just fix things and help us to post even more online?"

"I can," said Jane. "But it's not quite that simple. I need to set up a new program to make sure that we follow the best practices in data management. And I am concerned for our customers. They should be able to manage how we use their personal information. We also should develop a social media strategy." Sam and Jane worked hard during the following year. One of the decisions they made was to contract with an outside vendor to manage online sales. At the end of the year, Carol shared some exciting news. "Sam and Jane, you have done such a great job that one of the biggest names in the glass business wants to buy us out! And Jane, they want to talk to you about merging all of our customer and vendor information with theirs beforehand." Which regulator has jurisdiction over the shop's data management practices?

- **A. The Data Protection Authority.**
- B. The Federal Communications Commission.
- C. The Federal Trade Commission.
- D. The Department of Commerce.

Answer: A

Explanation:

The Data Protection Authority is a regulatory body responsible for enforcing data protection laws and ensuring that organizations comply with their obligations to protect personal data. The Federal Trade Commission (FTC) is an independent agency of the United States government whose primary mission is to promote consumer protection and prevent anti-competitive business practices.

NEW QUESTION # 37

.....

It's known that there are numerous materials for the CIPT Exam, choose a good materials can help you pass the exam quickly.
