So you can trust SAFe Practice Consultant SPC (6.0) SAFe-SPC practice test questions and start SAFe-SPC exam preparation without wasting further time.

Scaled Agile SAFe-SPC Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Building Solutions with Agile Product Delivery: This section of the exam measures skills of the Product Owner and focuses on delivering customer centric value. It explains design thinking, backlog prioritization, and program increment planning in a clear manner. It also covers developing on cadence and releasing on demand, followed by an overview of the continuous delivery pipeline with DevOps. Lesson 4 guides learners on building solutions that align with user needs.
Topic 2	<ul style="list-style-type: none">Reaching the SAFe Tipping Point: This section of the exam measures skills of the Transformation Champion and addresses the earliest stages of change. It explains how to establish a clear vision for change and how to build a strong guiding coalition. Lesson 8 highlights the importance of commitment and sponsorship at the start of a transformation journey.

Topic 3	<ul style="list-style-type: none"> • Thriving in the Digital Age and Business Agility: This section of the exam measures skills of the Agile Team Member and covers the foundations of thriving in a digital environment. It introduces how SAFe functions as an operating system for Business Agility and highlights the essential core competencies needed for modern enterprises. Lesson 1 guides learners on how organizations adapt, innovate, and remain competitive in fast changing markets.
Topic 4	<ul style="list-style-type: none"> • Leading the Change: This section of the exam measures skills of the Change Leader and focuses on guiding transformation. It reviews how to lead by example, how to lead organizational change, and how to apply the SAFe implementation roadmap. Lesson 6 provides a simple view of the leadership behaviors needed to support enterprise level change.
Topic 5	<ul style="list-style-type: none"> • Becoming a Lean Agile Leader: This section of the exam measures skills of the Team Leader and focuses on the mindset required to lead with Lean Agile values. It explains the Lean Agile mindset, reviews SAFe core values, and presents SAFe principles in simple and practical terms. Lesson 2 helps leaders understand how their actions influence team culture and continuous improvement.
Topic 6	<ul style="list-style-type: none"> • Exploring Lean Portfolio Management: This section of the exam measures skills of the Portfolio Manager and covers the structure of the SAFe portfolio. It explains how to connect the portfolio to enterprise strategy, maintain the portfolio vision, and manage this vision through epics. It also presents Lean budgets and guardrails and introduces the concept of portfolio flow. Lesson 5 shows how strategic alignment supports value delivery.
Topic 7	<ul style="list-style-type: none"> • Coaching ART Execution: This section of the exam measures skills of the Agile Coach and covers coaching the train and the teams during execution. It explains the value of continuous improvement and presents the Inspect and Adapt process in a simplified manner. Lesson 11 reinforces how coaching improves team performance and overall ART outcomes.
Topic 8	<ul style="list-style-type: none"> • Establishing Team and Technical Agility: This section of the exam measures skills of the Agile Practitioner and introduces the characteristics of cross functional Agile teams. It explains the importance of built in quality and describes how Agile Release Trains are organized around the flow of value. Lesson 3 emphasizes the ability of teams to deliver reliable outcomes through technical discipline.
Topic 9	<ul style="list-style-type: none"> • Enhancing the Portfolio: This section of the exam measures skills of the Enterprise Architect and addresses the scaling of value delivery. It discusses launching additional ARTs and value streams, strengthening enterprise solution delivery, and improving portfolio operations. It also reviews Lean governance and the ongoing work of LPM implementation. Lesson 12 focuses on expanding organizational capability.

We want to specify all details of various versions. You can decide which one you prefer, when you made your decision and we believe your flaws will be amended and bring you favorable results even create chances with exact and accurate content.

Scaled Agile SAFe Practice Consultant SPC (6.0) Sample Questions (Q97-Q102):

NEW QUESTION # 97

SAFe uses Kanban to manage flow at the Portfolio Level for the following reasons EXCEPT _____.

- A. To ensure that there is visibility and transparency.
- **B. To ensure that portfolio items are delivered to the Program or Solution Backlogs every 2 weeks.**
- C. To capture all ideas in the funnel.
- D. To ensure that the analysis and discovery work needed for the items are not time bound.

- E. To limit the number of initiatives under consideration.

Answer: B

NEW QUESTION # 98

You are invited to help an Agile Release Train that has struggled through multiple PIs. They just finished the second Iteration in the current PI and have nothing to demonstrate at the System Demo. Program stakeholders are really concerned.

What would you do?

- A. Re-architect the system so that there are no dependencies between the teams and integration is not needed.
- **B. Stop working on any new functionality and fully integrate and test the system; adjust scope based on learnings.**
- C. Re-plan the current PI: De-scope to leave enough time to integrate what you've built during the IP Iteration.
- D. Have every team demonstrate their team increment to the stakeholders separately in the team branch.
- E. Find a vendor that specializes in integrating system increments from multiple teams.

Answer: B

Explanation:

When the ART cannot show integrated value at the System Demo, it indicates that teams are not continuously integrating and testing, leading to lack of transparency and feedback. SAFe emphasizes continuous integration and working, tested systems at every iteration. The best immediate action is to stop new work and focus on integrating and testing what has been built, learning from this to improve future practices. This will help restore trust with stakeholders and reveal root causes for future improvements.

"When the system is not integrated, the team should stop developing new functionality and invest in integration and testing. This enables learning, ensures stakeholder visibility, and helps restore the regular cadence of System Demos." (Source: SAFe 6.0 Framework: System Demo, Continuous Integration; SPC 6.0 Guide, "Coaching ART Execution")

NEW QUESTION # 99

Velocity is a good measure of team performance.

- **A. False**
- B. True

Answer: A

NEW QUESTION # 100

Which of the following is a dimension of the Organizational Agility competency?

- A. Customer Centricity and Design Thinking
- **B. Strategy Agility**
- C. Strategy and Investment Funding
- D. Innovation Culture

Answer: B

Explanation:

"Strategy Agility" is one of the three dimensions of the Organizational Agility competency in SAFe. It refers to the organization's ability to sense and respond quickly to changing strategic needs, which is essential for thriving in the digital age.

NEW QUESTION # 101

What activity occurs during the program Inspect and Adapt workshop?

- A. Roadmap update
- **B. Team Iteration Demo**

- C. Iteration Metrics update
- D. Biweekly System Demo
- E. PI Predictability Measure update.

Answer: E

Explanation:

The Inspect and Adapt (I&A) workshop is a regular, program-level event at the end of each Program Increment (PI). One of the key activities in this workshop is updating the PI Predictability Measure, which assesses how well teams and the ART delivered on their PI Objectives. This measure is reviewed and discussed to help the ART improve planning and delivery in future PIs.

While the I&A event also includes a PI System Demo and a Retrospective/Problem-Solving Workshop, the Team Iteration Demo (C) and Iteration Metrics update (E) are typically performed at the team level throughout the PI, not specifically during the I&A. Roadmap updates (B) and Biweekly System Demos (D) are other ongoing events outside the I&A workshop.
