

Free PDF 2026 ECCouncil 312-85: Accurate New Certified Threat Intelligence Analyst Test Cost

2026 Latest PremiumVCEDump 312-85 PDF Dumps and 312-85 Exam Engine Free Share: <https://drive.google.com/open?id=1gNorscplwe1e6RjLMoP25APliV2aFWsG>

We have been studying for many years since kindergarten. I believe that you must have your own opinions and requirements in terms of learning. Our 312-85 learning guide has been enriching the content and form of the product in order to meet the needs of users. No matter what kind of learning method you like, you can find the best one for you at 312-85 Exam Materials. And our 312-85 study braindumps contain three different versions: the PDF, Software and APP online.

To prepare for the ECCouncil 312-85 Exam, candidates are advised to take a comprehensive training course that covers all the topics that will be covered on the exam. Candidates should also have hands-on experience in threat intelligence, and be familiar with the latest tools and techniques used in the industry. 312-85 exam is a rigorous test of the candidate's knowledge and skills, and passing the exam is a significant achievement that demonstrates the candidate's expertise in threat intelligence.

The CTIA certification is an excellent choice for professionals who want to demonstrate their expertise in threat intelligence analysis. It is a highly respected certification that is recognized by employers worldwide, and it can help professionals advance their careers and increase their earning potential.

312-85 Dumps Questions - Test 312-85 Dumps Demo

Taking 312-85 practice exams is also important because it helps you overcome your mistakes before the final attempt. When we talk about the Certified Threat Intelligence Analyst (312-85) certification exam, the ECCouncil 312-85 practice test holds more scoring power because it is all about how you can improve your 312-85 Exam Preparation. PremiumVCEDump offers desktop practice exam software and web-based 312-85 practice tests. These 312-85 practice exams help you know and remove mistakes.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q66-Q71):

NEW QUESTION # 66

As the CEO of a multinational corporation, you focus on making decisions that align with the organization's long-term goals and overall business strategies. What type of threat intelligence would be most valuable in guiding your decisions to enhance a company's resilience against emerging cyber threats?

- A. Strategic threat intelligence
- B. Technical threat intelligence
- C. Tactical threat intelligence

- D. Operational threat intelligence

Answer: A

Explanation:

Strategic Threat Intelligence provides high-level insights into the overall threat landscape, long-term trends, and the potential impact of emerging cyber threats on business operations and strategy. It is primarily designed for executives, policymakers, and senior management to make informed decisions that align with organizational goals and risk tolerance.

This intelligence type translates complex technical data into business-relevant language, helping leadership understand:

- * The motives and objectives of threat actors.
- * The geopolitical or industry trends affecting cybersecurity risk.
- * The overall security posture and areas requiring investment.
- * How to allocate resources for long-term resilience and compliance.

Why the Other Options Are Incorrect:

- * A. Operational Threat Intelligence: Focuses on ongoing campaigns and immediate threats relevant to security operations and incident response teams.
- * B. Tactical Threat Intelligence: Deals with adversary Tactics, Techniques, and Procedures (TTPs) and is used by SOC and defense analysts for short-term defensive actions.
- * D. Technical Threat Intelligence: Focuses on technical indicators such as IP addresses, hashes, and URLs, used for detection and blocking within security tools.

Conclusion:

For a CEO focusing on long-term strategic decisions and organizational resilience, the most valuable form of threat intelligence is Strategic Threat Intelligence.

Final Answer: C. Strategic Threat Intelligence

Explanation Reference (Based on CTIA Study Concepts):

As outlined in CTIA's section on Types of Threat Intelligence, strategic threat intelligence provides executive-level insights for planning and governance, supporting risk management and long-term decision-making.

NEW QUESTION # 67

You are a Security Operations Center (SOC) analyst responsible for monitoring and safeguarding the organization's network. During routine activities, you identify a potential vulnerability that can expose critical systems to exploitation. In what specific aspect of cybersecurity would you actively engage in when addressing and mitigating this vulnerability?

- A. Security awareness training
- **B. Vulnerability management**
- C. Incident response
- D. Threat intelligence analysis

Answer: B

Explanation:

The process of identifying, assessing, and mitigating vulnerabilities in systems is part of Vulnerability Management.

Vulnerability Management involves:

- * Detecting potential weaknesses or misconfigurations.
- * Assessing their severity and prioritizing fixes.
- * Applying patches or other mitigation controls.
- * Verifying that remediation efforts are successful.

While threat intelligence provides contextual data, the actual handling and resolution of discovered vulnerabilities fall under vulnerability management.

Why the Other Options Are Incorrect:

- * A. Threat intelligence analysis: Focuses on gathering and analyzing threat data, not fixing vulnerabilities.
- * C. Security awareness training: Involves educating staff, not mitigating technical issues.
- * D. Incident response: Comes into play after an incident has occurred; this scenario focuses on prevention.

Conclusion:

The analyst is engaged in Vulnerability Management, aimed at reducing the risk of exploitation before an attack occurs.

Final Answer: B. Vulnerability management

Explanation Reference (Based on CTIA Study Concepts):

Vulnerability management is emphasized as a preventive cybersecurity function that identifies and mitigates exploitable weaknesses.

NEW QUESTION # 68

An organization suffered many major attacks and lost critical information, such as employee records, and financial information. Therefore, the management decides to hire a threat analyst to extract the strategic threat intelligence that provides high-level information regarding current cyber-security posture, threats, details on the financial impact of various cyber-activities, and so on. Which of the following sources will help the analyst to collect the required intelligence?

- A. Campaign reports, malware, incident reports, attack group reports, human intelligence
- B. Human, social media, chat rooms
- **C. OSINT, CTI vendors, ISAO/ISACs**
- D. Active campaigns, attacks on other organizations, data feeds from external third parties

Answer: C

NEW QUESTION # 69

Andrews and Sons Corp. has decided to share threat information among sharing partners. Garry, a threat analyst, working in Andrews and Sons Corp., has asked to follow a trust model necessary to establish trust between sharing partners. In the trust model used by him, the first organization makes use of a body of evidence in a second organization, and the level of trust between two organizations depends on the degree and quality of evidence provided by the first organization. Which of the following types of trust model is used by Garry to establish the trust?

- A. Direct historical trust
- B. Mediated trust
- **C. Validated trust**
- D. Mandated trust

Answer: C

Explanation:

In the trust model described, where trust between two organizations depends on the degree and quality of evidence provided by the first organization, the model in use is 'Validated Trust.' This model relies on the validation of evidence or credentials presented by one party to another to establish trust. The validation process assesses the credibility, reliability, and relevance of the information shared, forming the basis of the trust relationship between the sharing partners. This approach is common in threat intelligence sharing where the accuracy and reliability of shared information are critical.

NEW QUESTION # 70

Michael, a threat analyst, works in an organization named TechTop, was asked to conduct a cyber-threat intelligence analysis. After obtaining information regarding threats, he has started analyzing the information and understanding the nature of the threats. What stage of the cyber-threat intelligence is Michael currently in?

- A. Unknown unknowns
- B. Known knowns
- C. Unknowns unknown
- **D. Known unknowns**

Answer: D

Explanation:

The "known unknowns" stage in cyber-threat intelligence refers to the phase where an analyst has identified threats but the specific details, implications, or full nature of these threats are not yet fully understood.

Michael, in this scenario, has obtained information on threats and is in the process of analyzing this information to understand the nature of the threats better. This stage involves analyzing the known data to uncover additional insights and fill in the gaps in understanding, thereby transitioning the "unknowns" into

"knowns." This phase is critical in threat intelligence as it helps in developing actionable intelligence by deepening the understanding of the threats faced.
