

# Desktop and Web-Based Practice Exams to Evaluate Cisco 300-640 Exam Preparation

One of the most effective strategies to prepare for the Implementing Cisco Data Center AI Infrastructure (300-640) exam successfully is to prepare with actual Cisco 300-640 exam questions. It would be difficult for the candidates to pass the Cisco exam on the first try if the 300-640 study materials they use are not updated. Studying with invalid 300-640 practice material results in a waste of time and money. Therefore, updated Cisco 300-640 practice questions are essential for the preparation of the 300-640 exam.

The series of 300-640 measures we have taken is also to allow you to have the most professional products and the most professional services. I believe that in addition to our 300-640 study materials, you have also used a variety of products. What kind of services on the 300-640 training engine can be considered professional, you will have your own judgment. But I would like to say that our products study materials must be the most professional of the 300-640 Exam simulation you have used. And you will find that our 300-640 exam questions is worthy for your time and money.

## New 300-640 Real Exam - 300-640 Pdf Torrent

This format enables you to assess your 300-640 test preparation with a 300-640 practice exam. You can also customize your time and the kinds of questions of the Cisco 300-640 Practice Test. This Implementing Cisco Data Center AI Infrastructure 300-640 practice test imitates the Cisco 300-640 real exam pattern. Thus, it helps you kill Implementing Cisco Data Center AI Infrastructure exam anxiety.

## Cisco Implementing Cisco Data Center AI Infrastructure Sample Questions (Q44-Q49):

### NEW QUESTION # 44

Which function is provided through natural language processing?

- A. annotation of data transmission protocols for device authorization
- **B. automated conversion of spoken or written content into structured data**
- C. filtration of duplicate entries from transaction records
- D. compression of large configuration files for storage efficiency

**Answer: B**

Explanation:

Natural language processing enables systems to interpret, process, and transform human language from spoken or written inputs into structured data that applications can analyze, search, classify, or use for automation.

#### NEW QUESTION # 45

A server administrator must monitor the performance and utilization of GPUs in Cisco UCS servers running AI workloads. Which two metrics must be used in Cisco Intersight to accomplish these goals? (Choose two.)

- A. Monitor
- B. Insights
- C. GPU Memory Utilization
- D. Active CPU Utilization
- E. Explorer

**Answer: C,D**

Explanation:

Cisco Intersight performance monitoring uses resource utilization metrics to identify bottlenecks in AI workloads. Active CPU utilization shows whether host processing is limiting workload execution, while GPU memory utilization shows how effectively GPU memory is being consumed during model processing and training or inference tasks.

#### NEW QUESTION # 46

A customer deploys a UCS 885a server in a data center with two power grids. Three of the 3000W power supplies in the server connect to each grid. Due to an external event, one of the grids will be shut down for maintenance. How does the server respond to this event?

- A. The server continues to operate at full performance using redundant power supplies, but the PSU status LED glows solid amber.
- B. The server operates with reduced performance and caps power to GPUs at 60%.
- C. The server immediately shuts down and stops all operations.
- D. The server initiates a graceful shut down of the operating system.

**Answer: B**

Explanation:

With three 3000W power supplies lost from one power grid, the UCS C885A continues operating on the remaining grid but no longer has the full power budget available for maximum GPU operation. The server reduces performance by enforcing power limits, including capping GPU power, so workloads can continue running within the available power capacity.

#### NEW QUESTION # 47

A Cisco Nexus switch is configured with QoS policies for AI traffic. Which scheduling mechanism guarantees bandwidth for critical traffic classes during congestion?

- A. FIFO
- B. MAC filtering
- C. Weighted scheduling
- D. Port mirroring

**Answer: C**

Explanation:

Weighted scheduling allocates bandwidth according to configured priorities, ensuring critical AI traffic receives adequate forwarding resources during congestion. FIFO provides no prioritization, while MAC filtering and port mirroring are unrelated to congestion management or QoS scheduling.

#### NEW QUESTION # 48

A company is building a network fabric for an AI training cluster that will train large language models. The cluster includes 256 GPUs distributed across 32 servers. Security requirements mandate isolation between different training projects and allowing shared access to a central storage system. Which approach provides the required security isolation and maintains optimal performance for GPU-to-GPU communication?

- A. Implement port-based VLANs for each project with router ACLs controlling storage access at the distribution layer.

- B. Use VXLAN with separate VNIs per project and Group Policy Option to control granular access to shared storage.
- C. Deploy separate physical networks for each project with dedicated switches and cross-connects to shared storage.
- D. Configure QoS-based traffic steering with separate DSCP markings per project and policy-based routing to shared storage.

**Answer: B**

Explanation:

VXLAN provides scalable network segmentation by assigning separate VNIs to different training projects, preserving isolation without building separate physical fabrics. Group Policy Option adds policy-based control within the VXLAN overlay, allowing controlled shared access to central storage while maintaining high-performance GPU-to-GPU communication across the AI training fabric.

## NEW QUESTION # 49

.....

According to our investigation, the test syllabus of the 300-640 exam is changing every year. Some new knowledge will be added into the annual real exam. Some old knowledge will be deleted. So you must have a clear understanding of the test syllabus of the 300-640 study engine. Now, you can directly refer to our 300-640 study materials. Because we have been in the field for over ten years and we are professional in this career. We can always offer the most updated information to our loyal customers.

Besides, those possessing the 300-640 certification are more likely to receive higher salaries, They can easily cover the exam topics with more practice due to the unique set of 300-640 exam dumps, Questions in this product will appear in the Cisco 300-640 final test, Cisco 300-640 Valid Exam Bootcamp Trust me, give you and me a change, you will not regret, This Cisco 300-640 exam questions is designed to validate the candidate's skills and knowledge.

Then, optimal QoS mapping guidance is presented 300-640 Latest Test Discount for a certain packet loss rate and given cost curve according to the DS level, Most servers also provide information and logs that give an estimate 300-640 of the transactions processed per second and the percentage utilization of the processor.

## Newest 300-640 Valid Exam Bootcamp to Obtain Cisco Certification

Besides, those possessing the 300-640 certification are more likely to receive higher salaries, They can easily cover the exam topics with more practice due to the unique set of 300-640 exam dumps.

Questions in this product will appear in the Cisco 300-640 final test, Trust me, give you and me a change, you will not regret, This Cisco 300-640 exam questions is designed to validate the candidate's skills and knowledge.
