NEW QUESTION # 60

A company has been modernizing on cloud-native platforms for the past few years and has been running some small consumer support utilities on their production NKP cluster. After a thorough testing and QA cycle with simulated workloads on a development cluster, the company is ready to bring their online retail application into the fold. While they have sufficient system resources to scale the NKP cluster properly from a performance standpoint, they also want to ensure they properly scale their monitoring stack's resource settings to retain a sufficient amount of data to see how overall system resource utilization trends for the NKP cluster over several months' time with the added workloads. Which NKP Platform Application component should the company be most concerned with adjusting, and how should their Platform Engineer adjust it?

- A. Adjust the number of replicas for the Prometheus deployment, as well as increase the amount of storage available for use by the NKP cluster.
- B. **Adjust the resource settings for Prometheus by increasing its container resource limits and memory settings, as well as its storage.**
- C. Adjust the number of replicas for the Fluent Bit deployment, as well as increase the amount of storage available for use by the NKP cluster.
- D. Adjust the resource settings for Fluent Bit by increasing its container resource limits and memory settings, as well as its storage.

Answer: B

NEW QUESTION # 61

A Platform Engineer has been tasked with building a custom image for the deployment of NKP management and worker nodes. The engineer needs to ensure that the proper package versions are used when creating these images. The security team has only authorized version 1.30.5 of Kubernetes and version 1.7.22 of containerd. Where should the engineer go to verify that this is the version being used when building the custom image?

- A. `ansible/group_vars/all/defaults.yaml`
- B. `terraform/vars/default/terraform.tfvars`
- C. `config/pulumi/vars/pulumi.kib.config`

- D. The custom image's .env file
