# 350-501 Exam Vce Free - Latest 350-501 Test Practice

**QUESTION 1**

```
<l3extOut name="l3out1">
    <l3extLNodeP name="cisconode1">
        <bgpPeerP addr="192.168.1.2">
            <bgpAsP asn="65514"/>
        </bgpPeerP>
    </l3extLNodeP>
    <bgpExtP/>
</l3extOut>
```

Refer to the exhibit. A global company plans to implement BGP at its newest location to provide connectivity to other offices. The global infrastructure of the company is a multivendor environment. An engineer must review the BGP core configurations at headquarters to determine if they can be repurposed at the new location. The engineer copied this JSON script for review. What is the effect of the script?

A. It configures BGP on the device and inserts 192.168.1.0/24 into the BGP table using the origin AS 65514.

B. It configures a VRF named cisconode1 and a BGP instance using the VPNv4 address family.

C. It configures BGP with neighbor 192.168.1.2 residing in AS 65514.

D. It sets the BGP router-ID to 192.168.1.2 and sets the AS of the router to 65514.

Correct Answer: C

**QUESTION 2**

Which type of multicast distribution trees can RSVP-TE-based multicast build?

A. only branches of point-to-point tunnels

B. multipoint-to-multipoint multicast from tail-end to head-end full mesh

C. point-to-multipoint multicast distribution trees

D. point-to-multipoint trees from tail-end to head-end

E. multipoint-to-multipoint multicast distribution trees

Correct Answer: D

## Latest 350-501 Test Practice & 350-501 Exam Demo

Our 350-501 exam questions are valuable and useful and if you buy our 350-501 study materials will provide first-rate service to

you to make you satisfied. We provide not only the free download and try out of the 350-501 Practice Guide but also the immediate download after your purchase successfully. To see whether our 350-501 training dumps are worthy to buy, you can have a try on our product right now.

# Cisco Implementing and Operating Cisco Service Provider Network Core Technologies Sample Questions (Q333-Q338):

## NEW QUESTION # 333
Drag and drop the descriptions from the left onto the corresponding OS types on the right.
IOS XE:
It uses linux-based kernel
It has a separate control plane
IOS:
It is monolithic
It shares memory space

**Answer:**

Explanation:

## NEW QUESTION # 334
Refer to the exhibit:
It the NetFlow configuration is updated to version 9, which additional piece of information can be reported"?

- A. IPv6 flow information
- B. BGP AS information
- C. IPv4 flow information
- D. flow sequence numbers

**Answer: A**

## NEW QUESTION # 335
Refer to the exhibit:
Export statistics received do not include the BGP next hop.
Which statement about the NetFlow export statistics is true?

- A. The origin AS and the peer-as will be included in the export statistics
- B. To include the BGP next hop in the export statistics, those keywords must be included with the version 9 entry.
- C. Only the origin AS of the source router will be included in the export statistics.
- D. Loopback 0 must be participating in BGP for it to be included in the export statistics

**Answer: A**

## NEW QUESTION # 336
Refer to the exhibit.
An engineer is updating this network to meet these conditions:
* Area 10 will receive inter-area routes and support mutual redistribution of external routes with the extranet.
* The ::/0 route is prohibited in Area 10.
* Area 11 will receive only the ::/0 route from the ABR.
* External route redistribution is not supported in Area 11.
* The ABR in Area 11 will advertise no interarea routes.
Which two configurations must be performed to meet the requirements? (Choose two.)

- A. Configure area 11 as stub no-summary on R7 and as stub on XR31.
- B. Configure area 10 as stub on R9 and XR32.

- C. Configure area 10 as nssa on R9 and XR32.
- D. Configure area 11 as nssa default-information-originate on R7 and as nssa on XR31.
- E. Configure area 11 as nssa no-summary on R7 and as nssa on XR31.

**Answer: D,E**

Explanation:
* Area 10 should receive inter-area routes and support mutual redistribution with the extranet but not receive the default route (::/0). This requirement does not align with any of the stub or NSSA configurations, as these would restrict the type of routes received.
* Area 11 should only receive the default route from the ABR and not support external route redistribution or advertise inter-area routes. Configuring Area 11 as an NSSA (Not So Stubby Area) with the no-summary option on R7 and as NSSA on XR31 would prevent inter-area routes from being advertised into Area 11. Additionally, the default-information-originate command on R7 would generate a default route into Area 11, fulfilling the requirement.
The explanation is based on the OSPFv3 configurations and area types as described in the Implementing and Operating Cisco Service Provider Network Core Technologies (SPCOR) course materials.

## NEW QUESTION # 337
Refer to the exhibit:

Which condition must be met by the OSPF peer of router R1 before the two devices can establish communication?

- A. The OSPF peer must use clear-text authentication
- B. The OSPF peer must be configured as an OSPF stub router
- C. The interface on the OSPF peer may have a different key ID, but it must use the same key value as the configured interface
- D. The interface on the OSPF peer must use the same key ID and key value as the configured interface

**Answer: D**

## NEW QUESTION # 338
......

Generally speaking, a satisfactory practice material should include the following traits. High quality and accuracy rate with reliable services from beginning to end. As the most professional group to compile the content according to the newest information, our 350-501 practice materials contain them all, and in order to generate a concrete transaction between us we take pleasure in making you a detailed introduction of our 350-501 practice materials. We would like to take this opportunity and offer you a best 350-501 practice material as our strongest items as follows. Here are detailed specifications of our product.
