

6V0-21.25 Reliable Braindumps - Successfully Pass The VMware vDefend Security for VCF 5.x Administrator

2026 Latest BootcampPDF 6V0-21.25 PDF Dumps and 6V0-21.25 Exam Engine Free Share: <https://drive.google.com/open?id=1Z6T-eP7V6OBHLHJRx75SIOMeqYmCZm5>

Our 6V0-21.25 test questions are available in three versions, including PDF versions, PC versions, and APP online versions. Each version has its own advantages and features, 6V0-21.25 test material users can choose according to their own preferences. The most popular version is the PDF version of 6V0-21.25 exam prep. The PDF version of 6V0-21.25 Test Questions can be printed out to facilitate your learning anytime, anywhere, as well as your own priorities. The PC version of 6V0-21.25 exam prep is for Windows users. If you use the APP online version, just download the application. Program, you can enjoy our 6V0-21.25 test material service.

VMware 6V0-21.25 Exam Syllabus Topics:

Topic	Details
Topic 1	Planning Application Segmentation with vDefend Security Intelligence: Covers using the distributed analytics engine to analyze workload and network context for developing micro-segmentation policies.
Topic 2	VMware vDefend Firewall Architecture: Covers the design and components of VMware's software-defined, distributed security architecture.
Topic 3	Security Automation: Covers integrating tools and scripting to automate firewall policy creation, security group management, and network configuration.
Topic 4	Malware Prevention Detection: Covers safeguarding private cloud workloads against ransomware and malicious activity targeting virtualized environments.
Topic 5	Security Operations: Covers the ongoing management and operational practices for maintaining security in a private cloud environment.
Topic 6	Lateral Protection with vDefend Distributed Firewall: Covers implementing policy-based rules to control east-west traffic and prevent lateral threat movement across the private cloud.
Topic 7	Troubleshooting: Covers verifying health status of service instances and security components, and resolving protection and performance issues.
Topic 8	Gateway Firewall: Covers edge security devices that control and filter north-south network traffic, blocking unauthorized access at the network perimeter.

Topic 9	Protecting Container Workloads with vDefend Firewall: Covers applying granular, context-based security enforcement to container workloads to enable zero-trust and prevent lateral threats.
Topic 10	Shared Services Platform (SSP): Covers the back-end security data and analytics platform that underpins vDefend security services.

6V0-21.25 Exam Dumps 100% Guarantee You Get 6V0-21.25 Exam - BootcampPDF

The BootcampPDF is a leading platform that is committed to making the 6V0-21.25 exam dumps preparation simple, quick, and successful. To achieve this objective BootcampPDF is offering real, valid, and updated VMware 6V0-21.25 practice questions in three different formats. These formats are BootcampPDF VMware 6V0-21.25 PDF Dumps Files, desktop practice test software, and web-based practice test software. All these BootcampPDF VMware vDefend Security for VCF 5.x Administrator exam questions formats are easy to use and compatible with all web browsers, operating systems, and devices.

VMware vDefend Security for VCF 5.x Administrator Sample Questions (Q17-Q22):

NEW QUESTION # 17

Which of the following represent operational inefficiencies for application owners when it comes to security implementation? (Select all that apply)

- A. Lack of visibility in hybrid cloud environments
- B. Lack of communication between infrastructure and application teams
- C. Lack of application awareness for network-based security policies
- D. Lack of automation across tools and platforms

Answer: B,C,D

Explanation:

In modern data centers, implementing micro-segmentation often fails due to operational silos and inefficiencies rather than technology limitations. Application owners typically struggle with a lack of automation across disjointed security tools (Option B), a historical lack of communication between the infrastructure/network teams and the application developers (Option C), and traditional network-based security policies (like IP addresses and VLANs) that lack contextual awareness of the actual applications they are protecting (Option D). vDefend Security Intelligence is designed specifically to solve these exact inefficiencies by providing deep application visibility and automated rule recommendations.

NEW QUESTION # 18

Which two mechanisms are available to automate the creation of firewall policies in VMware vDefend?

(Choose two)

Response:

- A. Manual CSV uploads to NSX Edge
- B. vRealize Automation integration
- C. ESXi command-line firewall editor
- D. RESTful API for policy configuration
- E. NSX Identity Store

Answer: B,D

NEW QUESTION # 19

A security administrator suspects that a service insertion policy is not working as expected. Which NSX Manager feature can be

used to validate the health status of the associated service instance?

Response:

- A. Service Deployment Status under the NSX Inventory
- B. Policy Traceflow
- C. ESXi Hardware Status tab
- D. Host Profiles Dashboard

Answer: A

NEW QUESTION # 20

What is the primary function of VMware's Advanced Threat Prevention (ATP) capabilities in a private cloud environment?

Response:

- A. To replicate VMs across availability zones for backup
- B. To enforce compliance for vSphere hardware compatibility
- C. To detect and prevent both known and unknown cyber threats using behavioral analysis and sandboxing
- D. To reduce storage IO latency during high-load operations

Answer: C

NEW QUESTION # 21

Which of the following statements are true about Distributed Malware? (Select all that apply)

- A. Offers Detection
- B. Supports Windows and Linux
- C. All of the above
- D. Sends events to NDR
- E. Offers Detection and Prevention

Answer: C

Explanation:

VMware vDefend Distributed Malware Prevention is a highly comprehensive feature set that operates at the hypervisor level (via Guest Introspection).

Detection and Prevention: It can be configured in "Detect Only" mode for visibility, but it fully supports "Prevention" mode to actively block malicious file writes/transfers.

OS Support: Because it leverages a thin agent/introspection architecture, it provides native support for protecting both Windows and Linux virtual machines.

NDR Integration: Every time the Malware Prevention engine detects a suspicious file, extracts a hash, or performs local static analysis, it automatically forwards this threat event telemetry up to the Network Detection and Response (NDR) engine for cross-correlation.

Therefore, "All of the above" accurately describes its capabilities.

NEW QUESTION # 22

.....

There is no doubt that obtaining this 6V0-21.25 certification is recognition of their ability so that they can find a better job and gain the social status that they want. Most people are worried that it is not easy to obtain the certification of 6V0-21.25, so they dare not choose to start. We are willing to appease your troubles and comfort you. We are convinced that our 6V0-21.25 test material can help you solve your problems. Compared to other learning materials, our products are of higher quality and can give you access to the 6V0-21.25 certification that you have always dreamed of.
