

# Pass Guaranteed 300-540 - High-quality Reliable Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Test Online

BONUS!!! Download part of NewPassLeader 300-540 dumps for free: [https://drive.google.com/open?id=1\\_Y8CPEbFE\\_SxEmkBSTakHOrXm8FLd8Nk](https://drive.google.com/open?id=1_Y8CPEbFE_SxEmkBSTakHOrXm8FLd8Nk)

You choosing NewPassLeader to help you pass Cisco certification 300-540 exam is a wise choice. You can first online free download NewPassLeader's trial version of exercises and answers about Cisco Certification 300-540 Exam as a try, then you will be more confident to choose NewPassLeader's product to prepare for Cisco certification 300-540 exam. If you fail the exam, we will give you a full refund.

## Cisco 300-540 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Security: This section of the exam measures the skills of Network Security Engineers and covers the implementation of infrastructure-level protection in cloud and NFVI ecosystems. It includes topics such as ACLs, uRPF, RTBH, router hardening, BGP flowspec, TACACS, and MACSEC. Candidates should understand DoS mitigation methods and apply security practices within NFVI, focusing on API protection, securing the control and management plane, and segmentation strategies in service provider cloud environments. The domain also evaluates basic knowledge of TLS, mTLS, and general cloud security solutions related to DNS protection, zero-day defenses, and malware detection.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Virtualized Architecture: This section of the exam measures the skills of Cloud Network Engineers and covers the foundational concepts of virtualized infrastructures used in modern service provider and cloud environments. Candidates are expected to understand constraints in IaaS designs, determine appropriate cloud service models, and demonstrate awareness of container orchestration compared to traditional virtual machines. The exam also evaluates the ability to implement key virtualization functions such as NFV, VNF, NSO, and virtualized Cisco platforms. Learners must be able to deploy NFV with automation tools, manage VNF onboarding, work with NSO-driven orchestration, and use protocols like NETCONF, RESTCONF, REST APIs, and gNMI within automated cloud ecosystems. A general understanding of supporting platforms such as OpenStack also forms part of the required knowledge in this domain.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Service Assurance and Optimization: This section of the exam measures the skills of Cloud Operations Engineers and covers assurance mechanisms used to maintain performance, stability, and visibility across NFVI environments. It includes network assurance concepts such as MANO frameworks, VNF workload monitoring, VIM control plane KPIs, and streaming telemetry with gRPC and gNMI. Candidates must understand cloud infrastructure performance monitoring tools, including SR-PM, NetFlow, IPFIX, syslog, SNMP traps, RMON, cloud agents, and automated fault management systems. The domain also touches on diagnosing NFVI-related errors and optimizing VNFs using techniques such as SR-IOV and software-accelerated virtual switching technologies like DPDK and VPP.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Cloud Interconnect: This section of the exam measures the skills of Service Provider Network Engineers and covers how large networks interconnect with cloud platforms and carrier-neutral facilities. Candidates are expected to understand various connectivity options to cloud providers, customer sites, and other neutral facilities, as well as evaluate WAN connectivity models such as direct connect, MPLS or segment routing, and IPsec VPN links. The domain also includes the ability to troubleshoot advanced data center interconnect solutions, including EVPN VXLAN, EVPN over SR</li> <li>MPLS, ACI-based connectivity, and pseudowire architectures supporting cloud-to-cloud and cloud-to-edge communication.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>High Availability: This section of the exam measures the skills of Cloud Infrastructure Architects and covers the design and implementation of redundancy and resiliency mechanisms in virtualized network functions and distributed cloud platforms. It includes data plane redundancy for VNFs, high availability within a single VIM control plane, and resilient compute, vNIC, and top-of-rack switching. The exam requires an understanding of multi-homing, EVLAG configurations, virtual private cloud deployment, and ECMP strategies for NFVI integrations with physical routing protocols such as BGP, OSPF, and IS-IS. Candidates must also recommend suitable high-availability models involving DNS, routing, and load balancing.</li> </ul>

## **Choosing The Reliable 300-540 Test Online Means that You Have Passed Designing and Implementing Cisco Service Provider Cloud Network Infrastructure**

As the feedbacks from our worthy customers praised that our 300-540 exam braindumps are having a good quality that the content of our 300-540 learning quiz is easy to be understood. About some esoteric points, our experts illustrate with examples for you. Our 300-540 learning quiz is the accumulation of professional knowledge worthy practicing and remembering, so you will not regret choosing our 300-540 study guide.

### **Cisco Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Sample Questions (Q111-Q116):**

#### **NEW QUESTION # 111**

Which format is used by Cisco Container Platform for configuration files?

- **A. YAML**
- B. XHTML

- C. XML
- D. HTML

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation

Cisco Container Platform (CCP), built on Kubernetes orchestration, uses YAML files for:

- \* Cluster configuration
- \* Pod definitions
- \* Network settings
- \* Storage mappings

YAML is the industry-standard declarative syntax for Kubernetes and container orchestration platforms.

HTML, XHTML, and XML are not used for CCP configuration.

#### NEW QUESTION # 112

Cloud edge facilities are designed to:

- **A. Reduce latency by bringing cloud resources closer to the end-user**
- B. Centralize cloud operations in a single location
- C. Increase the physical storage capacity for cloud providers
- D. Provide backup power solutions for data centers

**Answer: A**

#### NEW QUESTION # 113

Software accelerated virtual switch technologies like DPDK and VPP aim to:

- A. Slow down packet processing
- **B. Improve network function virtualization performance**
- C. Increase physical network dependency
- D. Decrease network security

**Answer: B**

#### NEW QUESTION # 114

ACI (Application Centric Infrastructure) is designed to:

- A. Increase manual configuration requirements
- B. Reduce application deployment flexibility
- **C. Simplify the operational management of data centers**
- D. Focus on physical, rather than virtual, network infrastructure

**Answer: C**

#### NEW QUESTION # 115

NSO in the context of virtualized architecture stands for:

- A. Network Scale Optimization
- B. Non-Secure Operations
- C. Network Service Operator
- **D. Network Service Orchestrator**

**Answer: D**

## NEW QUESTION # 116

.....

Our Company is always striving to develop not only our 300-540 latest practice materials, but also our service because we know they are the aces in the hole to prolong our career. Reliable service makes it easier to get oriented to the 300-540 exam. The combination of 300-540 Exam Guide and sweet service is a winning combination for our company, so you can totally believe that we are sincerely hope you can pass the 300-540 exam, and we will always provide you help and solutions with pleasure, please contact us through email then.
