The product support staff is available to assist with any issues that may arise.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q17-Q22):

NEW QUESTION # 17

Which role should be assigned to a user so they can read and retrieve data from any table of the Release Management application to generate reports?

- A. Project manager
- B. Release admin
- C. Business stakeholder
- D. Release user

Answer: C

Explanation:

According to the Product Documentation for ServiceNow, the business stakeholder role (rm_business_stakeholder) can read and

retrieve data from any table of the Release Management application to generate reports. This role can also view the release dashboard, release calendar, and release roadmap. The other roles have different levels of access and permissions for the Release Management application. You can find more information about the roles and responsibilities for Release Management in the Product Documentation for ServiceNow.

NEW QUESTION # 18

When creating a program, which of the following cannot be part of multiple programs? Select all that apply.

Choose 2 answers

- A. Demand.
- B. Portfolio.
- C. Project.
- D. Tasks.

Answer: A,C

NEW QUESTION # 19

What role must be assigned to users to be considered for resource planning?

- A. rate_model_user
- B. resource_manager
- C. pps.resource_resource_user
- D. timecard_user

Answer: C

NEW QUESTION # 20

On the demand form, what does the Discount Rate impact?

- A. Financial Benefit.
- B. ROI.
- C. Internal Rate of Return %.
- D. Net Present Value (NPV).

Answer: D

Explanation:

According to the ServiceNow documentation¹, the discount rate on the demand form impacts the net present value (NPV) of the demand. The NPV is the difference between the present value of the benefits and the present value of the costs of the demand. The discount rate is the rate used to discount future cash flows to their present value. A higher discount rate means that future cash flows are worth less in the present, and vice versa. The other options are incorrect because:

A . ROI: The ROI (return on investment) is the ratio of the net value to the estimated cost of the demand. The discount rate does not affect the ROI, as both the net value and the estimated cost are based on the present value of the cash flows².

C . Financial Benefit: The financial benefit is the sum of the present value of the benefits of the demand. The discount rate does not affect the financial benefit directly, but only indirectly through the NPV calculation³.

D . Internal Rate of Return %: The internal rate of return % (IRR) is the discount rate that makes the NPV of the demand equal to zero. The discount rate does not affect the IRR, but rather the IRR is derived from the NPV equation⁴.
