Practice Exam: ICC National Standard General Building Contractor Exam (Class A)

1. What is the minimum required slope for a roof to be considered a steep-slope roof according to the IBC?

A. 1/12
B. 2/12
C. 3/12
D. 4/12

Answer: B. 2/12

Rationale: A roof is considered steep-slope when it has a slope of 2 units vertical in 12 units horizontal or more, as per the IBC.

2. Which of the following is NOT a primary function of a building's foundation?

A. Support the structure
B. Transfer loads to the soil
C. Provide insulation
D. Anchor the building against wind forces

Answer: C. Provide insulation

P.S. Free 2026 International Code Council M2 dumps are available on Google Drive shared by Pass4sureCert:

Once installed M2 practice exam software onto your computer, you can get started as it does not require an internet connection to run. The M2 practice exam software is essential for your International Code Council M2 exam preparation as it gives you hands-on experience before the actual M2 Certification Exam. This kind of exam preparation ensures that a well-prepared and more confident candidate enters the examination arena.

International Code Council M2 Exam Syllabus Topics:

Section	Objectives
Chimneys and Vents	- Connectors and Terminations • 1. Termination Requirements • 2. Vent Connectors - Vent Systems • 1. Vent Sizing • 2. Chimney Clearances

Ventilation and Exhaust Systems	- Ventilation • 1. Mechanical Ventilation • 2. Exhaust Air Systems - Commercial Kitchens • 1. Kitchen Exhaust Hoods • 2. Grease Ducts
Duct Systems	- Duct Construction • 1. Dampers and Protection • 2. Materials and Installation - Air Distribution • 1. Duct Insulation • 2. Plenums
Combustion Air and Fuel Supply	- Combustion Air • 1. Combustion Air Openings • 2. Indoor and Outdoor Air Requirements - Fuel Supply Systems • 1. Fuel Oil Systems • 2. Fuel Gas Piping
Heating and Cooling Systems	- Cooling Systems • 1. Refrigeration Equipment • 2. Cooling Appliances - Heating Appliances • 1. Furnaces • 2. Boilers • 3. Water Heaters
General Administration	- Code Scope and Administration • 1. Definitions • 2. Referenced Standards • 3. Permits and Inspections
Materials and Specifications	- Approved Materials • 1. Equipment Labeling • 2. Installation Standards
Hydronic Piping and Refrigeration	- Hydronic Systems • 1. Piping Installation • 2. Pressure Testing - Refrigeration • 1. Safety Controls • 2. Refrigerant Piping

Pass Guaranteed Quiz 2026 M2: Unparalleled Exam Commercial Mechanical Inspector Preparation

With all the questions and answers of our M2 study materials, your success is 100% guaranteed. Moreover, we have Demos as freebies. The free demos give you a prove-evident and educated guess about the content of our M2 practice questions. As long as you make up your mind on this M2 Exam, you can realize their profession is unquestionable. And you will be surprised to find the high-quality of our M2 exam braindumps.

International Code Council Commercial Mechanical Inspector Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which of the following is not a required mechanical inspection?

- A. Rough-in
- B. Final
- C. Underground
- D. Annual system test

Answer: D

Explanation:

The ICC mechanical administrative inspection sequence includes underground inspection, rough-in inspection, and final inspection as required inspections. An annual system test is not listed as one of the required permit inspections in that section, so Option D is the correct answer. This fits the M2 General Administration content area, which includes permit and inspection administration.

NEW QUESTION # 15

An 8-inch Type B venting system with a listed vent cap must terminate a minimum of _____ feet above the flat roof through which it passes.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

For a Type B gas vent with a listed vent cap terminating through a flat roof, the minimum required termination height is 1 foot above the roof. That makes Option A correct. This is consistent with gas vent termination tables used with listed Type B vent systems and the code framework for Type B vent terminations.

NEW QUESTION # 16

Exhaust is required for which of the following areas?

- A. Gambling casinos
- B. High school locker rooms
- C. Office break rooms
- D. Prison guard stations

Answer: B

Explanation:

Under the IMC ventilation table, locker/dressing rooms and sports locker rooms are identified with required mechanical exhaust, while spaces such as guard stations do not carry that same exhaust requirement in the table. A high school locker room falls within

the locker-room/sports-locker-room category, so Option C is the correct answer. Gambling casinos and office break rooms are provided outdoor air rates, but they are not the required-exhaust space among these listed choices.

NEW QUESTION # 17

The optional integral clearance reduction system is designed to meet which NFPA standard?

APPLICATION: Low proximity, low CFM requirements. Designed for all types of cooking equipment with surface temperatures ranging from 450 – 700 degrees. Optional rear plenum provides up to 90 percent make-up air. Product requires minimal kitchen space.

DESIGN FEATURES AND ADVANTAGES

- UL Listed for use over 450° and 700° F cooking surface temperatures. UL Listed to Canadian safety standards, NGF Listed, and built in accordance with NFPA 96 as required by ICC
- Up to 80% make-up air supplied through optional rear air plenum
- Separate flue gas chamber not required
- Stainless steel construction with double wall, insulated front panel
- Aluminum filters with optional stainless steel or high velocity cartridge filters (model ABC)
- Factory pre-wired lighting for illumination of cooking surface
- 30" minimum width
- Insulated stainless steel double-end panels provided to maximize hood performance and eliminate effects of cross draft
- Optional UL Listed light and fan control switches, pre-wired and flush mounted through built-in electrical chaseway
- Optional integral clearance reduction system meet requirements of NFPA 96
- Optional UL Listed grease filter damper (model AB-100)

GENERAL SPECIFICATIONS

- Fabricated of Type 430 stainless steel #3 or #4 polish, on all exposed surfaces, optional Type 304 stainless steel available
- Fitted with 12" high, UL Classified, baffle-type aluminum filters, removable for cleaning
- An 1/8 inch per foot minimum sloped grease trough with removal 1/2 pint cup to drain grease
- Pre-punched hanging angles on each end of hood

PERFORMANCE DATA

Hood Model Type	Cooking Surfaces	Max Avg. Cooking Surface Temp (°F) Filter Type	Min. Exhaust CFM/Ft	Suggested Supply CFM/Ft via Optional Back Supply Plenum
AB AB-100	Gas Charbroilers Electric Charbroilers Meatpile Grills	700° with standard baffle filter	200	160
ABC ABC-100	Charcoal Charbroilers Gas Conveyor Charbroilers	700° with high velocity cartridge filter	180	144
AB AB-100	Ovens Steamers Kettles	450° with standard baffle filter	150	135
ABC ABC-100	Open-Burner Ranges Griddles Fryers	125	112	

- A. 0
- B. 92A
- **C. 1**
- D. 2

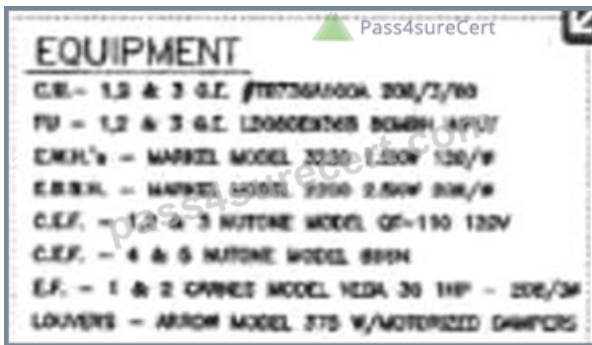

Answer: C

Explanation:

Based on the specification sheet shown in the exhibit, the design features state that the optional integral clearance reduction system meets the requirements of NFPA 96 . Therefore, the correct answer is D .

NEW QUESTION # 18

Exhibit:

EQUIPMENT	
C.E. - 1,2 & 3 G.E.	1/2" TYPICAL DIA. 200/1/10
FV - 1,2 & 3 G.E.	1200000000 BOMBH 14P/17
C.M.H. - MARKEL MODEL 2030	120W 120/1/10
E.B.H. - MARKEL MODEL 2030	2.50W 120/1/10
C.E.F. - 1,2 & 3 NUTONE MODEL QF-150	120V
C.E.F. - 4 & 5 NUTONE MODEL 800H	
E.F. - 1 & 2 CORNET MODEL 12DA 30 1HP	200/1/10
LOUVERS - ARROW MODEL 375 W/MOTORIZED DAMPERS	

CEF-5 is a ceiling exhaust fan manufactured by:

- A. Markel
- **B. Nutone**
- C. G.E.
- D. Carnes

Answer: B

Explanation:

This is also an exhibit-reading question. From the equipment schedule in the image, CEF-5 is listed as a Nutone unit, so Option D is correct. This falls under reading commercial mechanical drawings and equipment schedules related to exhaust/ventilation components.

NEW QUESTION # 19
