As you can find that on our website, we have three versions of our SAFe-Practitioner study materials for you: the PDF, Software and APP online. The PDF can be printable. While the Software and APP online can be used on computers. When you find it hard for you to learn on computers, you can learn the printed materials of the SAFe-Practitioner Exam Questions. What is more, you absolutely can afford for the three packages. The price is set reasonably. And the Value Pack of the SAFe-Practitioner practice guide contains all of the three versions with a more favourable price.

The SAFe 5 Practitioner Exam is a challenging exam that is designed to test the knowledge and skills of professionals who want to become SAFe practitioners. SAFe-Practitioner exam consists of multiple-choice questions that are designed to assess the candidate's understanding of SAFe concepts, principles, and practices. SAFe-Practitioner exam also includes scenario-based questions that require the candidate to apply their knowledge of SAFe in real-world situations.

Scrum SAFe-Practitioner (SAFe 5 Practitioner (SP)) certification exam assesses candidates' understanding of SAFe principles and its application in the Agile environment. SAFe-Practitioner exam evaluates candidates' knowledge and skills in Agile practices, Lean-Agile leadership, Agile team leadership, and Agile program execution. Successful candidates prove their competencies in implementing Agile practices across multiple teams and their ability to align these teams with the organization's goals and objectives to drive business outcomes.

The SAFe 5 Practitioner Exam is the second level in the SAFe certification path. It covers the SAFe® 5.0 Framework and the role

of SAFe Practitioners in its implementation. SAFe-Practitioner Exam takers must have prior SAFe experience, Scrum experience, and should be familiar with Agile methodologies. SAFe 5 Practitioner Exam certification is a prerequisite for higher-level SAFe certifications such as SAFe-Advanced Scrum Master (SASM) or SAFe-Release Train Engineer (RTE).

Welcome to come to consult us. We are looking forward to your coming at any time.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q145-Q150):

NEW QUESTION # 145

Team B has elected to stop holding retrospective events so they can spend more time completing Stories. Which of the following Agile Team responsibilities is Team B over-prioritizing?

- A. Plan the work
- **B. Deliver value**
- C. Connect with the customer
- D. Applying systems thinking

Answer: B

Explanation:

= Deliver value is one of the six Agile Team responsibilities in SAFe, along with aligning to a common mission, applying systems thinking, building incrementally with fast feedback, collaborating and making decisions together, and improving relentlessly. While delivering value is essential for Agile Teams, it should not come at the expense of other responsibilities, especially improving relentlessly. By skipping the retrospective events, Team B is missing an opportunity to reflect on their practices, identify what is working well and what is not, and plan actions to improve their performance and quality. Retrospectives are a key mechanism for implementing the SAFe Core Value of Relentless Improvement and the SAFe Principle #12 - Assume variability; preserve options. References: = Agile Teams - Scaled Agile Framework, Core Values - Scaled Agile Framework, SAFe Principles - Scaled Agile Framework, Exam Study Guide: SP (6.0) - SAFe Practitioner

NEW QUESTION # 146

Which of the following are outputs of Iteration Planning?

- A. PI Objectives
- **B. Iteration Goal**
- C. Program Backlog
- **D. Backlog with Team Commitment**

Answer: B,D

NEW QUESTION # 147

What is one of the inputs to the Portfolio canvas?

- A. Value Stream budgets
- B. Strategic Themes
- C. Portfolio Epics
- **D. Enterprise Strategy**

Answer: D

Explanation:

The Portfolio canvas is a tool that helps define the value streams, solutions, customers, budgets, and other key aspects of a SAFe

portfolio. One of the inputs to the Portfolio canvas is the Enterprise Strategy, which describes the vision, mission, goals, and objectives of the organization. The Enterprise Strategy provides the context and direction for the portfolio vision, which in turn guides the identification and prioritization of portfolio epics and value streams. The Enterprise Strategy also influences the allocation of lean budgets and the alignment of strategic themes across the portfolio. NEW QUESTION # 148

Which of the following Story components captures details on testing for completion?

- A. Story map
- B. User voice
- C. Release plan
- D. Acceptance criteria

Answer: D

Explanation:

Acceptance criteria are the conditions that a story must satisfy to be accepted by the Product Owner and the stakeholders. They define the boundaries of the story and provide guidance on how to test it for completion.

Acceptance criteria are usually written as a list of statements or scenarios that describe the expected behavior and outcomes of the story. They help to ensure that the story delivers value to the user and meets the Definition of Done¹²³⁴. NEW QUESTION # 149

The CALMR approach to DevOps includes Automation, Lean flow, Measurement, and Recovery. What does the "C" represent?

- A. Cycle-time
- B. Cadence
- C. Culture
- D. Continuous Integration

Answer: C

Explanation:

Culture is the first element of the CALMR approach to DevOps in SAFe. It refers to the shared mindset and values that support successful DevOps adoption. Culture in SAFe is influenced by the Lean-Agile principles and practices that guide the entire framework. Culture in DevOps requires customer-centricity, collaboration, trust, empowerment, learning, and feedback among all the stakeholders involved in the value stream. Culture also fosters a shift-left mentality, where operational and quality concerns are addressed early and often in the development process. Culture is the foundation for the other elements of CALMR: automation, lean flow, measurement, and recovery.
