But what certificate is valuable and useful and can help you a lot? Passing the DEP-2025 test certification can help you prove that you are competent in some area and if you buy our DEP-2025 Study Materials you will pass the test almost without any problems for we are the trustful verdor of the DEP-2025 practice guide for years.

Apple Deployment and Management Exam Sample Questions (Q194-Q199):

NEW QUESTION # 194
Your organization is buying books through Apple Business Manager. Which of these is an assignment criteria for books?

- A. Shared iPad devices
- B. Mac computers
- C. iPhone and iPad devices
- D. Users with a Managed Apple Account

Answer: D

Explanation:
Apple Business Manager allows organizations to purchase and distribute books (such as textbooks or reference material) using the Apps and Books section. Apple Learning states that books can only be assigned to users, not to devices. Specifically, the users must have a Managed Apple Account in order to receive the content.
Unlike apps, which can be assigned either to users or devices, books are linked to the individual account. This ensures that digital rights management (DRM) is preserved while also protecting user access. Books cannot be assigned directly to iPhones, iPads, or Macs as standalone hardware, nor can they be tied to Shared iPad device pools. Therefore, the correct assignment criteria for books in Apple Business Manager is Managed Apple Account users.
References: Apple Business Manager User Guide - "Distribute books to users with Managed Apple Accounts."

NEW QUESTION # 195
Which feature of an MDM solution gives you the ability to integrate with internal tools and custom automations?

- A. Support for Automated Device Enrollment or zero-touch deployment
- B. A robust Application Programming Interface (API)
- C. Support for the latest Apple MDM framework features
- D. Integration with Apple's Global Service Exchange (GSX)

Answer: B

Explanation:
Apple emphasizes that modern MDM solutions must be extensible, and the primary way this is achieved is through a robust Application Programming Interface (API). APIs allow administrators and developers to automate device actions, integrate with existing IT service management systems (like ServiceNow), or build custom workflows. For example, an organization can script automated assignment of devices, license tracking, or compliance reporting. While Automated Device Enrollment and MDM frameworks provide device management capabilities, they are not the integration points for custom automation. GSX integration is used by resellers and service providers, not directly for IT automation. Therefore, APIs are the feature that enable deep integration with internal enterprise systems and advanced automation.
References: Apple Platform Deployment - "Extend MDM with APIs and custom automation."

NEW QUESTION # 196
You are using your MDM solution to distribute Managed apps. Which statement is correct?

- A. Apps can be distributed to only users, not devices.
- B. Apps can't be assigned without a Managed Apple Account.
- C. Apps can be revoked or reassigned.
- D. Books can be distributed to only devices, not users.

Answer: C

Explanation:
Managed apps offer flexibility. The Apple Business Manager User Guide states, "Managed apps can be revoked or reassigned to other users or devices via MDM." Option B is false as device assignment is possible, C is incorrect for books, and D is wrong as apps can be device-assigned.
References:
Apple Business Manager User Guide, "Managed Distribution" section.
Mobile Device Management Protocol Reference, "App Management" section.

NEW QUESTION # 197

Your organization begins buying from a new Apple Authorized Reseller. What information do you give the reseller to ensure that your devices appear in Apple Business Manager or Apple School Manager?

- A. Purchase Order Number
- B. Organization ID
- C. Reseller Number
- D. D-U-N-S Number

Answer: B

Explanation:

The Organization ID links purchases. The Apple Business Manager User Guide states, "Provide your Organization ID to the reseller to ensure devices are assigned to your Apple Business Manager account." Reference:
Apple Business Manager User Guide, "Purchasing Devices" section.
Apple Platform Deployment Guide, "Device Assignment" section.

NEW QUESTION # 198

Which macOS tool allows IT administrators to create configuration profiles?

- A. System Preferences
- B. Profile Manager
- C. Terminal
- D. Apple Configurator

Answer: B

Explanation:

Profile Manager, part of macOS Server (now integrated into macOS as a standalone service), is a tool that allows IT administrators to create, edit, and distribute configuration profiles for macOS, iOS, and iPadOS devices. These profiles define settings and restrictions that can be deployed via MDM or manually. Apple Configurator (option A) is primarily for iOS/iPadOS/tvOS device supervision and configuration, not profile creation for macOS. System Preferences (option C) is a user-facing settings app, not a profile creation tool.
Terminal (option D) can be used for scripting but isn't designed for profile creation. The Apple Platform Deployment Guide identifies Profile Manager as the macOS tool for this purpose.
Reference: Apple Platform Deployment Guide (Chapter: Profile Manager).

NEW QUESTION # 199

......

Undoubtedly, passing the Apple DEP-2025 certification exam is one big achievement. Regardless of how tough the DEP-2025 exam is, it serves an important purpose of improving your skills and knowledge of a specific field. Once you become certified by Apple DEP-2025, a whole new career scope will open up to you.
